Time and Death Carol J. White, edited by Mark Ralkowski, 2017-03-02 In Time and Death Carol White articulates a vision of Martin Heidegger's work which grows out of a new understanding of what he was trying to address in his discussion of death Acknowledging that the discussion of this issue in Heidegger's major work Being and Time is often far from clear White presents a new interpretation of Heidegger which short circuits many of the traditional criticisms White claims that we are all in a better position to understand Heidegger's insights after fifty years because they have now become a part of the conventional wisdom of common opinion His view shows up in accounts of knowledge in the physical sciences in the assumptions of the social sciences in art and film even in popular culture in general but does so in ways ignorant of their origins Now that these insights have filtered down into the culture at large we can make Heidegger intelligible in a way that perhaps he himself could not White presents the best possible case for Heidegger making him more intelligible to those people with a long acquaintance with his work those with a long aversion to it and in particular to those just starting to pursue an interest in it White places the problems with which Heidegger is dealing in the context of issues in contemporary Anglo American philosophy in order to better locate him for the more mainstream audience The language and approach of the book is able to accommodate the novice but also offers much food for thought for the Heidegger scholar

Space, Time and Evaluation in Ideological Discourse Laura Filardo-Llamas, Christopher Hart, Bertie Kaal, 2017-10-02 Bringing together a body of related research which has recently developed in Critical Discourse Analysis this book is the first to address the role of perspective in socio political discourse Specifically the contributions to this volume seek to explore from a cognitive standpoint the way in which perspective functions in three dimensions space time and evaluation to enact ideology and persuasion A range of discourse genres are analysed including political discourse media discourse and songs used as political tools Starting from the contention that discourse processing relies on the same mechanisms that support our understanding and experience of space the book finds a recurrent theme in the way in which perspectival concepts like distance and focus prompted by linguistic signs feature in our discursively constructed knowledge of social and political realities By highlighting the complex nature of perspective taking in ideological discourse the volume sets the agenda for further research in this area The book will appeal to linguists discourse analysts media scholars and political scientists and all who are interested in the

relationship between language and cognition in the socio political domain This book was originally published as a special issue of Critical Discourse Studies

Thinking, Childhood, and Time Walter Omar Kohan, Barbara Weber, 2020-10-06 *Thinking Childhood and Time* Contemporary Perspectives on the Politics of Education is an interdisciplinary exploration of the notion of childhood and its place in a philosophical education Contributors consider children s experiences of time space embodiment and thinking By acknowledging Hannah Arendt s notion that every child brings a new beginning into the world they address the question of how educators can be more responsive to the Otherness that childhood offers while assuming that most educational models follow either a chronological model of child development or view children as human beings that are lacking The contributors explore childhood as a philosophical concept in children adults and even beyond human beings Childhood as a forgotten dimension of the world Contributors also argue that a pedagogy that does not aim for an exodus of childhood but rather responds to the arrival of a new human being responsibly dialogically fosters a deeper appreciation of the newness that children bring in order to sensitize us for our own Childhood as adults as well and allow us to welcome other forms of childhood in the world As a whole this book argues that the experience of natality such as the beginning of life is not chronologically determined but rather can occur more than once in a human life and beyond Scholars of philosophy

education psychology and childhood studies will find this book particularly useful

Reciprocity, Spatial Mapping and Time Reversal in Electromagnetics C. Altman, K. Suchy, 2013-03-09 The choice of topics in this book may seem somewhat arbitrary even though we have attempted to organize them in a logical structure The contents reflect the path of search and discovery followed by us on and off for the in fact last twenty years In the winter of 1970-71 one of the authors C A on sabbatical leave with L R O Storey's research team at the Groupe de Recherches Ionosphériques at Saint Maur in France had been finding almost exact symmetries in the computed reflection and transmission matrices for plane stratified magnetoplasmas when symmetrically related directions of incidence were compared At the suggestion of the other author K S also on leave at the same institute the complex conjugate wave fields used to construct the eigenmode amplitudes via the mean Poynting flux densities were replaced by the adjoint wave fields that would propagate in a medium with transposed constitutive tensors et voila a scattering theorem reciprocity in k space was found in the computer output To prove the result analytically one had to investigate the properties of the adjoint Maxwell system and the two independent proofs that followed in 1975 and 1979 proceeded respectively via the matrix method and the thin layer scattering matrix method for solving the scattering problem according to the personal preferences of each of the authors The proof given in Chap 2 of this book based on the hindsight provided by our later results is simpler and much more concise

Space, Time, and Stuff Frank Arntzenius, Cian Seán Dorr, 2012-01-19 Frank Arntzenius presents a series of radical ideas about the structure of space and time and establishes a new metaphysical position which holds that the fundamental structure of the physical world is purely geometrical structure He argues that we should broaden our conceptual horizons and accept that spaces other than spacetime may exist

Political concepts and time Javier Fernández Sebastián, Hans Erich Bödeker, Pim den Boer, Peter Burke, Giuseppe Duso, Alexandre Escudier, João Feres Júnior, Michael Freeden, Jacques Guilhaumou, Jörn Leonhard, Christian Meier, Faustino Oncina, Kari Palonen, Elías José Palti, 2011-08-10 The essays compiled in this volume written by distinguished experts present a broad panorama of the most important methodological challenges faced by conceptual history today as well as some more specific contributions regarding the temporal dimension of certain modern concepts At a moment when time and concepts and political concepts in particular are no longer obvious and taken for granted but have themselves become historical matter this book does not limit itself to an updating of the state of the art it also offers very useful lessons for the development of future research into this field

Echoes in Now-Time Naguib Elias Lozano Manzur, 2009 For the reader this book could be a journey into the author's mind his heart and sometimes even his soul full of defining moments a peek into the man he's becoming And for him this is a journey that began and remained in a dream for nearly 40 years Not quite awake not quite asleep but definitely and always present The journals that were the landscapes he painted with words of passion of love or fury but never indifference were also the buffers that allowed an intensely private young man full and safe expression A few of the poems he shares are simply

whimsical Their substance may be felt like the fluffy feathers of a down pillow Something soft and cool to lay your head on and feel pleasantly OK For him though most of his poetry feels and looks like the rings of a once handsome but rugged tree Not cut down but only momentarily exposed so as to share not its own but nature s history and gifts of beauty The author begs the reader s indulgence in allowing him the outpouring of his bilingual spirit on some of these pages The inspiration that flows may look like a florescent yellow cactus flower in a sea of white Spring lilies but where the heart goes the pen just follows Like this book he has opened himself up and invites any who will dare to meander through his sometimes quirky imagination Now no more the guarded reserved dreamer but a wiser optimist and a realist at least every other Tuesday No teacher is he as the majestic brother Wolf but the mythical Coyote prankster whose many plans and schemes often cause him to flail and fall only to get back up and try again to sometimes succeed in the light of his efforts Dear reader this book is his way of giving thanks and giving back by sharing with complete abandon for all the pleasures and sorrows and even each breath we take for granted
