**Immunology** James Sneyd,2002 In many respects biology is the new frontier for applied mathematicians This book  
demonstrates the important role mathematics plays in the study of some biological problems It introduces mathematicians to  
the biological sciences and provides enough mathematics for bioscientists to appreciate the utility of the modelling approach  
The book presents a number of diverse topics such as neurophysiology cell biology immunology and human genetics It  
examines how research is done what mathematics is used what the outstanding questions are and how to enter the field Also  
given is a brief historical survey of each topic putting current research into perspective The book is suitable for  
mathematicians and biologists interested in mathematical methods in biology      **The School Musician Director and**

**Topology** Hansjörg Geiges,2008-03-13 This text on contact topology is a comprehensive introduction to the subject including  
recent striking applications in geometric and differential topology Eliashberg's proof of Cerf's theorem via the classification  
of tight contact structures on the 3 sphere and the Kronheimer Mrowka proof of property P for knots via symplectic fillings of  
contact 3 manifolds Starting with the basic differential topology of contact manifolds all aspects of 3 dimensional contact  
manifolds are treated in this book One notable feature is a detailed exposition of Eliashberg's classification of overtwisted  
contact structures Later chapters also deal with higher dimensional contact topology Here the focus is on contact surgery  
but other constructions of contact manifolds are described such as open books or fibre connected sums This book serves both  
as a self contained introduction to the subject for advanced graduate students and as a reference for researchers      Catalog
