Nuclear Arms Control:

Strategic Stalemate Michael Krepon, 1984-06-18 **Nuclear Arms Control, with Effective International Agreements** Julie Dahlitz, 1983 House of Cards Colin S. Gray, 1992 If peace breaks out can arms control be far behind According to Colin S Gray this sardonic motto describes events of the 1990s just as well as it did those of the 1920s Gray offers a provocative history of twentieth century attempts at arms limitation as he challenges the fundamental assumptions of arms control theory Arms control has never worked he concludes because it never can Existing approaches to arms control appeal to common sense but they are logically unsound and inherently impractical Gray argues because they fail to take political realities into account He outlines their inadequacies in what he calls the Arms Control Paradox the more motivated nations are to fight one another the less interested they will be in supporting significant arms limitations Under these conditions arms control agreements must be to echo a phrase of George Will s either impossible or unimportant Documenting the naval treaties of the 1920s and 1930s and the initiatives to limit strategic nuclear arms from 1969 to the present Gray seeks to demonstrate that the fortunes of negotiated arms limitation have merely reflected the temperature of international relations rather than influencing those relations National security analysts students and scholars of international relations and others interested in arms control issues will want to read *House of Cards* and debate its conclusions *The Superpowers and Nuclear Arms Control* Dennis Menos, 1990-04-23 The nuclear arsenals of the United States and the Soviet Union are larger better equipped and deadlier than at any other time in history This incisive book contends that the superpowers while exhibiting enormous ingenuity in the area of arms development have shown only a minimal interest toward the containment of arms This is a carefully documented evaluation of the mismanagement of nuclear arms control by the superpowers and of their failure to contain the nuclear arms race despite their involvement in the process for over a quarter of a century Only the superpowers can reduce the proliferation of nuclear arms and in the process lessen the likelihood of nuclear war through accident miscalculation or crisis escalation Yet forty four years after Hiroshima not a single wanted nuclear weapon has been eliminated by them *The Superpowers and Nuclear Arms Control* addresses a broad spectrum of nuclear arms control issues beginning with the history of the nuclear arms race the lukewarm attempts by the superpowers at nuclear arms control and the role of the nuclear havenots The book then considers current threats to arms control evidenced by the termination of the SALT regime and plans to discard the ABM Treaty A discussion of the congressional executive split on numerous key arms control issues is followed by conclusions drawn from observing decades of negotiation Comprehensive appendices contain valuable charts and other documents that reinforce the content of the text This resource is a useful tool for arms control and disarmament activists students and researchers and for the many men and women everywhere who are at a loss to understand why so little is being accomplished in this critical area **A Guide to the Nuclear Arms Control Treaties** David Browning Thomson, 2001 Documents on Disarmament United States. Arms

Control and Disarmament Agency,1966 **Nuclear Arms Control** National Academy of Sciences,Policy and Global Affairs,Office of International Affairs,Committee on International Security and Arms Control,1985-02-01 This nontechnical overview of developments in nuclear arms control describes how the United States and the Soviet Union arrived at their present positions and where they might go from here According to Foreign Affairs This book is proof that the complexities of arms control can be successfully explained in a nontechnical and even more importantly nonpartisan manner It presents the key issues in a clear thorough and remarkably up to date way Strongly recommended as a primary source for classroom and public discussions **Arms Control** Nancy W. O'Hanlon,2012-10-11 For some observers nuclear arms control is either a relic of the cold war or a utopian

dream about a denuclearized planet decades in the future But as Brookings scholars Steven Pifer and Michael O Hanlon argue in *The Opportunity* arms control can address some key security challenges facing Washington today and enhance both American and global security Pifer and O Hanlon make a compelling case for further arms control measures to reduce the nuclear threat to the United States and its allies to strengthen strategic stability to promote greater transparency regarding secretive nuclear arsenals to create the possibility for significant defense budget savings to bolster American credibility in the fight to curb nuclear proliferation and to build a stronger and more sustainable U S Russia relationship President Obama gave priority to nuclear arms control early in his first term and by all accounts would like to be transformational on these questions Can there be another major U S Russia arms treaty Can the tactical and surplus strategic nuclear warheads that have so far escaped controls be brought into such a framework Can a modus vivendi be reached between the two countries on missile defense And what of multilateral accords on nuclear testing and production of fissile materials for nuclear weapons Pifer and O Hanlon concisely frame the issues the background and the choices facing the president provide practical policy recommendations and put it all in clear and readable prose that will be easily understood by the layman

Understanding Nuclear Weapons and Arms Control Teena Mayers, 1986 **Nuclear Arms Control in Peril** Thomas D. Grant, 2024-12-10 In this book a former US Department of State senior arms control official critically analyses two pivotal nuclear arms control treaties the established Treaty on the Non Proliferation of Nuclear Weapons NPT and the rising Treaty on the Prohibition of Nuclear Weapons TPNW The book offers a concise and critical analysis of the two illuminating both their strengths and shortcomings The author acknowledges the idealistic goal of the TPNW but argues that its immediate abolitionist stance lacks a roadmap for achievement Instead the book advocates realistic progress within the NPT framework It provides twelve key negotiation topics for fostering meaningful dialogue among nuclear weapon states while emphasizing the urgency of concrete action in a world facing growing nuclear threats *The Future of Arms Control* Michael A. Levi, Michael E. O'Hanlon, 2004-12-07 Arms control for decades at the core of the foreign policy consensus today is among the more contentious issues in American politics It is pilloried and considered out of mode in many conservative quarters while being viewed as nearly sacrosanct in many liberal circles In this new book Michael Levi and Michael O Hanlon argue that neither the left nor the right has a correct view of the proper utility of arms control in the age of terror Arms control in the traditional sense lengthy treaties to limit nuclear and other military competitions among the great powers is no longer particularly useful Nor should arms control be pursued as a means to the end of constraining the power of nations or

of promoting global government It is still a critical tool though for controlling dangerous technologies particularly those that in the hands of hostile states or terrorist organizations could cause massive death and destruction Arms control and coercive action including military force must be integrated into an overall strategy for preventing proliferation now more than ever before Arms control should be used to gain earlier warning of illicit activities inside dangerous states allowing the international community to take coercive action in a timely way The authors propose three new criteria to guide future arms control efforts designed to respond to today s geopolitical realities Arms control must focus on the dangers of catastrophic technology not so much in the hands of major powers as of small states and terrorist groups Their criteria lead to a natural focus on nuclear and biological technologies Much tougher measures to prevent countries from gaining nuclear weapons technology while purportedly complying with the Nuclear Non Proliferation Treaty and procedures for controlling dangerous biological technologies will be most prominent in this framework while lower priority is given to efforts such as bilateral nuclear accords and most t

Cornerstones of Security Thomas Graham, Damien J LaVera, 2003 This anthology presents the complete text of 34 treaties that have effectively contained the spread of nuclear biological and conventional weapons during the Cold War and beyond The treaties are placed in historical context by individual commentaries from noted authorities Thomas Graham Jr and Damien J LaVera which provide unique insights on each treaty s negotiation and implementation There is no comparable resource available for diplomats international lawyers and arms control specialists
