Nuclear Disarmament In The Twentyfirst Century:

Nuclear Disarmament in the Twenty-first Century Wade L. Huntley, Mitsuru Kurosawa, Kazumi Mizumoto, 2005-03-06

This work provides a comprehensive examination of the current state and future prospects for nuclear disarmament at the turn of the century. The work juxtaposes a sober review of progress made during the last decade with a proactive agenda of proposals for new disarmament initiatives in the next decade. Taken together, the contributions to this volume suggest that contrary to current conventional wisdom, the increasing global cache of nuclear weapons and the waning progress on nuclear disarmament of recent years need not become the defining features of the post Cold War era. Rather, by examining the new conditions that have emerged at the dawn of the 21st century through both national and issue based perspectives, this work reveals how the likelihood of continuing uncertainty and change in world affairs creates opportunities as well as the need for renewed progress toward significant nuclear disarmament.

Deterrence in the Twenty-first Century Max G.

Manwaring, 2013-02-01. This anthology argues that facing the diverse threats in the new world disorder requires a new look and new approaches. The requirement is to establish that contemporary deterrence demands replacing the old nuclear theology with new policy and strategy to deal with the myriad state, non-state, and transnational nuclear and non-nuclear menaces that have heretofore been ignored or wished away.

Twenty-First Century Weapons Proliferation James M.

Ludes, Henry Sokolski, 2014-01-14. Leading US security practitioners from the Ford, Carter, Reagan, Bush, and Clinton administrations, plus other experts on proliferation, clarify the weapons proliferation threats that the US and its allies will face and suggest what new policies their governments should consider.

Nuclear Ethics in the Twenty-First Century

Thomas E. Doyle, II, 2020-01-31. This book relates a complex ethical re-assessment of the continued reliance by some states on nuclear weapons as instruments of state power. This re-assessment is more urgent considering the relatively recent intensification of great power conflict dynamics and the nuclear weapon states' recommitments to modernizing, augmenting, or tailoring their nuclear forces to address vital state and alliance interests. And especially since the beginning of the administration of US President Donald J. Trump, these recommitments have accelerated the degree to which the political and moral dilemmas of the threat of nuclear use define and intensify existential risks for specific states and the international community at large. To execute this re-assessment, this book details how strategic, political, legal, and moral reasoning are deeply intertwined on the questions of vital state and global values. Its ontological assumptions are taken from a broadly construed IR Constructivist stance, and its epistemological approach applies non-ideal moral principles informed by Kantian thought to selected problems of nuclear armed security competition as they evolved since President Barack Obama's 2009 Prague Declaration. This non-ideal moral approach employed is committed to the view that the dual imperatives of humanity's survival and the common security of states requires an international order which privileges considerations of justice over power, political considerations. This non-ideal moral approach is a necessary element of theorizing a set of practices to

effectively address the challenges and dilemmas of reordering international politics in terms of justice Nuclear India in the Twenty-First Century D. SarDesai,R. Nuclear Weapons and Cooperative Security in the 21st Century Stephen J. Cimbala, 2009-09-10 This book looks at the prospects for international cooperation over nuclear weapons proliferation in the 21st century Nuclear weapons served as stabilizing forces during the Cold War or the First Nuclear Age on account of their capability for destruction the fear that this created among politicians and publics and the domination of the nuclear world order by two superpowers the United States and the Soviet Union The end of the Cold War the dissolution of the Soviet Union and the potential for nuclear weapons acquisition among revisionist states or even non state actors including terrorists creates the possibility of a wolves eat dogs phenomenon in the present century In the 21st century three forces threaten to undo or weaken the long nuclear peace and fast forward states into a new and more dangerous situation the existence of large US and Russian nuclear weapons arsenals the potential for new technologies including missile defenses and long range precision conventional weapons and a collapse or atrophy of the nuclear nonproliferation regime and the opening of the door for nuclear weapons to spread among more than the currently acknowledged nuclear states This book explains how these three weakening forces interact with one another and with US and Russian policy making in order to create an environment of large possibilities for cooperative security but also of considerable danger Instead the choices made by military planners and policy makers will create an early twenty first century story privileging nuclear stability or chaos The US and Russia can and should make incremental progress in arms control and nonproliferation This book will be of much interest to students of nuclear proliferation and arms control strategic studies international security and IR in general Stephen J Cimbala is Distinguished Professor of Political Science at Pennsylvania State University He is the author of numerous works in the fields of international security defense studies nuclear arms control and other topics He has consulted for various US government agencies and defense contractors

Italy's Foreign Policy in the Twenty-First Century Bertjan Verbeek, Giampiero Giacomello, 2011-11-16 Italy's Foreign Policy in the Twenty First Century The New Assertiveness of an Aspiring Middle Power edited by Giampiero Giacomello and Bertjan Verbeek shows how changes in Italy's international and domestic environment since the early 1990s have affected Italy's foreign policy and raised its aspiration to become and be treated as a middle power The contributors theoretically engage with both rationalist and constructivist accounts of middle power behavior They reveal that the end of the Cold War the advent of globalization and the increase in institutionalized regional cooperation have increased Italy's freedom to maneuver by reducing its dependence on the United States while simultaneously causing Italy's policy freedom to decrease as a result of delegation of policy competencies to the EU and the need for cooperation in a globalized world Domestic changes notably the transition from the First to the Second Republic and the transformation of political leadership in Italy under Prime Minister Silvio Berlusconi have altered the specific way

domestic politics is played out in foreign policy Rather than adopting the more common focus on Italy's bilateral relations with other countries or regions Italy's Foreign Policy in the Twenty First Century centers on actors issues and policy instruments in vital areas of Italy's foreign In addition it discusses the search for Italy's position in global affairs and emphasizes the importance of leadership styles domestic political agendas and party rhetoric in determining Italy's foreign policy As Giacomello and Verbeek's volume demonstrates being consistent with such strategic prescription has always been a problematic undertaking for various Italian governments

Social Catholicism for the Twenty-first Century?--Volume

2 William F. Murphy, 2024-09-19 This rich collection of essays by distinguished scholars from across the globe can be read as sketching key steps on the path toward working in solidarity to build a future worthy of the human family through a new social Catholicism These steps include a contemporary renewal of Christian humanism and of human rights while learning to live as authentic Christian witnesses in pluralistic societies after the end of Christendom They will also include working for a just and sustainable economic paradigm becoming missionary disciples with a continual orientation toward the marginalized and overcoming the plague of racism by working to build a constitutional democracy for every citizen This societal renewal will require fostering robust movements of social Catholicism apt for our age within which Catholics will pursue the Universal Call to Holiness through living their earthly vocations in a spirit of social friendship They will creatively employ social media to foster apostolates extending beyond borders In an age of dark clouds threatening dystopia a new social Catholicism will require a reinvigorated pastoral leadership that has come to appreciate the dangers of populism and the need to instead foster solidarity and incarnate Christian charity through a better kind of politics

US Foreign Policy in the Twenty-First Century J. Martin Rochester, 2018-05-04

The issues raised by the Iraq War are symptomatic of larger phenomena that will continue to preoccupy American foreign policy makers well into the twenty first century The war on terror the proliferation of weapons of mass destruction humanitarian intervention and a litany of other concerns on the

foreign policy agenda pose complex dilemmas for which there are no simple answers Through lucid lively analysis as well as multiple illustrations and case studies US Foreign Policy in the Twenty First Century explores the difficult choices that confront the United States today in a complicated and often dangerous post Cold War environment Author J Martin Rochester engages students in an intelligent examination of American foreign policy past present and future involving them in critical thinking about how foreign policy is made what factors affect foreign policy decisions and behavior and how one might go about not only describing and explaining foreign policy but also evaluating it and prescribing solutions A *Disarmament Agenda for the Twenty-first Century*, 2002 House of Commons - Defence Committee: Deterrence in the Twenty-First Century - HC 1066 Great Britain: Parliament: House of Commons: Defence Committee, James Arbuthnot, 2014-03-27 The MoD's financial settlement in the next Comprehensive Spending Review must be made in the light of the need to retain a credible deterrent capacity in the country's Armed Forces The Committee welcomes the emphasis that the Government places on the importance of cyber defence and the commitment of resources to a new cyber strike capability But the difficulty in identifying actors in a cyber attack makes the ability to deter that much harder Similar questions arise in deterrence against the asymmetrical threat of terrorism as it is difficult to identify interests and groups against which a response can be legitimately targeted The Committee is calling on the MoD to set out how it can make clear that both cyber and terrorist attack will elicit an appropriate and determined response Looking at the nuclear deterrent the Committee points out that the UK's ability to effect a nuclear response is not credible in dealing with all threats and so strong conventional deterrence is also required And given the importance of communication to the concept of deterrence investment in diplomatic and intelligence assets must be integral to the UK's security apparatus The Committee concludes that it would be naive to assume that a decision not to invest in the nuclear deterrent would release substantial funds for investment in other forms of security The Committee believes that the decision on the retention of the nuclear deterrent should be made on its own merits *Moral Responsibility in Twenty-First-Century Warfare* Steven C. Roach, Amy E. Eckert, 2020-09-01 2021 CHOICE Outstanding Academic Title Moral Responsibility in Twenty First Century Warfare explores the complex relationship between just war theory and the ethics of autonomous weapons systems AWS One of the challenges facing ethicists of war particularly just war theorists is that AWS is an applicative concept that seems in many ways to lie beyond the humanist scope of the just war theory tradition The book examines the various ethical gaps between just war theory and the legal and moral status of AWS addresses the limits of both traditional and revisionist just war theory and proposes ways of bridging some of these gaps It adopts a dualistic notion of moral responsibility or differing related notions of moral responsibility and legitimate authority to study the conflicts and contradictions of legitimizing the autonomous weapons that are designed to secure peace and neutralize the effects of violence Focusing on the changing conditions and dynamics of accountability responsibility autonomy and rights in twenty first century warfare the volume sheds light on the effects of violence and the

future ethics of modern warfare **Clausewitz in the Twenty-First Century** Hew Strachan, Andreas Herberg-Rothe, 2007-09-13 The volume considers Clausewitz's timeless *On War* against the background of actual armed conflict. With scholars from a range of disciplines and countries, it throws new light on a classic text and contemporary issues.

The Russian Military Into the Twenty-first Century Stephen J. Cimbala, 2001 This work attempts to clarify the major problems facing Russia's armed forces in the present and immediate future. It covers threats from terrorists, breakaway republics and threats from outside Russia's borders. The book also includes political and economic problems facing the military.

The Oxford Companion to Politics of the World Joel Krieger, 2001-08-02 The world has seen dramatic changes since the publication of the first edition of *The Oxford Companion to Politics of the World* in 1993. In the post-Cold War world, globalization now offers wealth and opportunities on a broader scale as well as greater international harmony, but threatens to reinforce the advantage gap between wealthy and poor regions and intensify environmental degradation. Conflict and squalor expressed in brutal brushfire wars, epidemics and chronic underdevelopment vie with equally dramatic accounts of growth and democracy associated with a liberal political order and the global diffusion of trade, investment and communications. Drawing on the breadth of the first edition, this updated edition reflects the changing world with a reassessment of many of the core themes of the Companion and new articles on the people, concepts and events that have shaped the world since 1993. The second edition includes biographies of Kofi Annan, Tony Blair, Bill Clinton and Gerhard Schröder; articles on events such as the Rwandan Genocide and the war in Kosovo; and coverage of international trade developments such as NAFTA and the World Trade Organization. Eighty-seven of the 672 articles in the Second Edition are completely new; most others are thoroughly revised. This edition also features a substantial new set of articles: a dozen essays on critical issues written by influential figures. Recognizing the importance of including varying viewpoints, the editors have commissioned these essays to provide an informed and often passionate debate on controversial topics. Discussions include Lani Guinier and Glenn Loury on Affirmative Action; Francis Fukuyama and Milton Fisk on the Limits of Liberal Democracy; and Lloyd Axworthy and John Bolton on the United Nations. The contributors discuss nearly every nation in the world, including extensive information on institutions, political parties, leaders and the sources of political mobilization and conflict. The volume also includes biographies of more than seventy-five political leaders and thinkers who have shaped the contemporary political world. Articles include detailed discussions of critical historical developments and events, concepts, international law and organizations. *The Oxford Companion to Politics of the World*, Second Edition, is an accessible, timely, thought-provoking and comprehensive reference that captures the complexity and vitality of contemporary world affairs.

Urban Warfare in the Twenty-First Century Anthony King, 2025-05-14 War is urbanising. From Mosul to Mumbai, Aleppo to Marawi, the largest and most intense battles of the twenty-first century have taken place in densely populated urban areas. In the Ukraine War, Russian and Ukrainian troops have converged on urban areas: Kyiv, Mariupol and Bakhmut, to fight brutal

attritional sieges Meanwhile the Battle of Gaza rages Through a close analysis of recent urban conflicts and their historical antecedents sociologist Anthony King explores the changing typography of the urban battlescape Whilst many tactics used in urban warfare are not new he shows how operations in cities today have coalesced into localised micro sieges which extend from street level and below to the airspace high above the city as combatants fight for individual buildings streets and districts At the same time digitalized social media and information networks communicate these battles to global audiences across an urban archipelago with these spectators often becoming active participants in the fight Fully revised and updated to include detailed examples from Ukraine and Gaza to illustrate the anatomy of twenty first century urban warfare the second edition of this popular text is a timely reminder of the costs and the horror of war and violence in cities As such it offers an invaluable interdisciplinary introduction to urban warfare in the new millennium for students of international security urban studies and military science as well as military professionals
