The Logic of Humanitarian Arms Control and Disarmament Nik Hynek, Anzhelika Solovyeva, 2020-11-10 This novel and original book examines and disaggregates theoretically and empirically operations of power in international security regimes These regimes varying in degree from regulatory to prohibitory are understood as sets of normative discourses political structures and dependencies anarchies hierarchies and heterarchies and agencies through which power operates within a given security issue area with a regulatory effect In International Relations regime analysis has been dominated by several generations of regime theory theorization As this book makes clear not only has the IR Regime Theory been of limited utility for security domain due to its heavy focus on economic and environmental regimes but it too heuristically suffered from its rigid pegging to general IR Theory It is not surprising then that the evolution of IR Regime Theory has largely been mirroring the evolution of IR Theory in general from the neo realist neo liberal institutionalist convergence regime theory through cognitivism to constructivist regime theory The commitment of this book is to remedy this situation by bringing together robust power analysis and international security regimes It provides the reader with a theoretically and empirically uncompromising and comprehensive analysis of the selected international security regimes which goes beyond one or another school of IR Regime Theory In doing so it completely abandons existing and piecemeal analysis of regimes within the intellectual field of IR based on conventional grand mid range theorization

Civilization-States of China and India Ravi Dutt Bajpai, 2024-01-30 Ravi Dutt Bajpai examines some of the pivotal episodes in the modern history of China and India to argue that their behaviours reflect the self identity of a civilization state The book starts from the progression of China and India into putatively modern polities during the colonial period as the two indigenous societies imagined their national identities and nationalist aspirations primarily by contrasting their civilizational attributes with the Western colonial occupiers As newly independent nation states both

believed that their international status flowed from their civilizational glories Therefore despite their material and institutional fragility China and India decided to pursue complete autonomy to manage their domestic and foreign affairs Indian Prime Minister Nehru s policy of non alignment envisioning an alternate world order beyond the great power competition was inspired by Indian civilizational ethos The book also examines the Sino Indian war of 1962 from a civilization state perspective and argues that Tibet represented a conflict of civilizational influence Chapters also explore some of the more recent developments such as the Indian nuclear test of 1998 China s ambitious Belt and Road BRI infrastructure project aimed at reviving the ancient Silk Road and India s campaign to regain its civilizational status of Vishwa Guru as the continued manifestations of the two civilization states endeavouring to regain their past glories in the contemporary world
