Nuclear Physics At Intermediate Energies:

Intermediate-Energy Nuclear Physics A.S. Iljinov, 2018-01-18 Intermediate Energy Nuclear Physics is devoted to discussing the interaction between hadrons with nuclei which leads to the emission of particles during an intranuclear cascade and subsequent decay of a highly excited residual nucleus Experimental data and the methods and results of the calculation of probabilities of various processes initiated by intermediate energy hadrons in nuclei are set forth and discussed The potential for obtaining information on the structure and properties of nuclei by comparing experimental data with theoretical results is analyzed New issues such as analytic methods for the solution of kinetic equations describing the cascade nuclear absorption of hadrons from bound states of hadronic atoms interaction of antinucleons with nuclei multifragmentation of highly excited residual nuclei and polarization phenomena are discussed in detail The book also demonstrates hadron nucleus interactions that bridge the gap between low energy and heavy ions physics It is an interesting reference for nuclear physicists and other researchers interested in the analysis of problems associated with the evolution of the early hot universe neutron stars and supernovas after burning of radioactive waste in nuclear energy installations and electronuclear energy breeding

Perspectives in nuclear physics at intermediate energies, 1984 Perspectives In Nuclear Physics At Intermediate Energies - Proceedings Of The Conference Sigfrido Boffi, Claudio Ciofi Degli Atti, Mauro Giannini, 1996-03-20 This book focuses on the latest theoretical and experimental results and future perspectives regarding electromagnetic and hadronic physics at intermediate energies Nucleon form factors and spin structure functions deep inelastic scattering excited baryons and mesons and correlations in nuclei are discussed Many new results and the scientific programmes of the different laboratories in Europe and North America are also presented A special section is devoted to relativistic approaches to hadrons and nuclei at intermediate energies
