strategy since the end of the Cold War What nuclear attack options would the president have during a war How are these war plans developed and reviewed by civilian and military leaders How would presidential orders be conveyed to the uniformed men and women who are entrusted with U S nuclear weapons systems And are these communications systems and supporting capabilities vulnerable to disruption or attack The answers to such questions depend on the process by which national strategy for nuclear deterrence developed by civilian leaders is converted into nuclear war plans and the entire range of procedures for implementing those plans if necessary The chapter authors have extensive experience in government the armed forces and the analytic community Drawing on their firsthand knowledge as well as the public record they provide unique authoritative accounts of how the United States manages its nuclear forces today This book will be of interest to the national security community particularly younger experts who did not grow up in the nuclear centric milieu of the Cold War Any national security analyst professional or government staffer seeking to learn more about nuclear modernization policy and the U S nuclear arsenal should be interested in this book It should also be of interest to professors and students who want a deep understanding of U S nuclear policy *Artificial intelligence and the future of warfare* James
