Nuclear Weapons In The Changing World Perspectives From Europe Asia And North America:

Nuclear Weapons in the Changing World Patrick J. Garrity, Steven A. Maaranen, 2012-12-06 Lawrence Freedman One of the major bonuses of the collapse of communism in Europe is that it may never again be necessary to enter into a sterile debate about whether it is better to be red or dead This appeared as the ultimate question in the great nuclear debate of the early 1980s When put so starkly the answer appeared obvious better to live and struggle in a totalitarian system than to destroy totalitarian and democratic systems alike There were a number of points to be made against this Communist regimes had demonstrated the possibility of being both red and dead while the West had managed successfully to avoid the choice If we allowed nuclear disarmament to become an overriding priority this might encourage excessive respect for Soviet interests and a desire to avoid any sort of provocation to Moscow a point not lost on those in Eastern Europe who were then struggling against repression and could not see why disarmament should be given a higher priority than freedom Now that the old communist states have liberated themselves and the West no longer risks conspiring in their enslavement there is a correspondingly reduced danger of mass death As a result and with so much else of immediate Lawrence Freedman Department of War Studies King's College University of London London WC2R 2LS England *Nuclear Weapons in the Changing World Perspectives from Europe Asia and North America* *Nuclear Weapons and India's National Security* M. L. Sondhi, 2000 This Book Covers A Wide Range Of Subjects Form Fundamentalism And Terrorism To Regional And International Security China's Contribution To Nuclear And Missile Proliferation And Bargaining Asymmetries Between India And China **Strategic Nuclear Sharing** J. Schofield, 2014-01-21 The sharing of nuclear weapons technology between states is unexpected because nuclear weapons are such a powerful instrument in international politics but sharing is not rare This book proposes a theory to explain nuclear sharing and surveys its rich history from its beginnings in the Second World War **Weapons Proliferation and World Order** Brad Roberts, 2023-09-29 With the end of the Cold War the subject of weapons proliferation has acquired new interest and prominence So too have questions about the nature of the world order that will succeed the structure of the last fifty years This study explores the connections among these topics It describes the prevailing conceptual model of nuclear proliferation evaluates proliferation's changing technical features considers economic and political factors bearing on its future rate and character and speculates about proliferation's implications on the post cold war world order It also considers the role of international public policy in meeting proliferation's challenges Arguing that updated approaches are needed the analysis emphasizes cooperative over coercive approaches to order It concludes with an assessment of progress to date in meeting these new challenges arguing that the new agenda is only slowly coming into focus *The Evolution of Strategy* Beatrice Heuser, 2010-10-14 Is there a Western way of war which pursues battles of annihilation and single minded military victory Is warfare on a path to ever greater destructive force This magisterial account answers these questions by tracing the history of Western thinking about strategy the employment of military force as a

political instrument from antiquity to the present day Assessing sources from Vegetius to contemporary America and with a particular focus on strategy since the Napoleonic Wars Beatrice Heuser explores the evolution of strategic thought the social institutions norms and patterns of behaviour within which it operates the policies that guide it and the cultures that influence it Ranging across technology and warfare total warfare and small wars as well as land sea air and nuclear warfare she demonstrates that warfare and strategic thinking have fluctuated wildly in their aims intensity limitations and excesses over the past two millennia

Deterrence Now Patrick M. Morgan, 2003-04-17 Patrick Morgan's authoritative study revisits the place of deterrence after the Cold War

Nonproliferation Norms Maria Rost Rublee, 2010-01-25 Too often our focus on the relative handful of countries with nuclear weapons keeps us from asking an important question Why do so many more states not have such weapons More important what can we learn from these examples of nuclear restraint Maria Rost Rublee argues that in addition to understanding a state's security environment we must appreciate the social forces that influence how states conceptualize the value of nuclear weapons Much of what Rublee says also applies to other weapons of mass destruction as well as national security decision making in general The nuclear nonproliferation movement has created an international social environment that exerts a variety of normative pressures on how state elites and policymakers think about nuclear weapons Within a social psychology framework Rublee examines decision making about nuclear weapons in five case studies Japan Egypt Libya Sweden and Germany In each case Rublee considers the extent to which nuclear forbearance resulted from persuasion genuine transformation of preferences social conformity the desire to maximize social benefits and or minimize social costs without a change in underlying preferences or identification the desire or habit of following the actions of an important other The book offers bold policy prescriptions based on a sharpened knowledge of the many ways we transmit and process nonproliferation norms The social mechanisms that encourage nonproliferation and the regime that created them must be preserved and strengthened Rublee argues for without them states that have exercised nuclear restraint may rethink their choices

Critical Masses and Critical Choices Kerry G. Herron, Hank C. Jenkins-Smith, 2010-11-23 *Critical Masses and Critical Choices* examines American attitudes on issues of national and international security Based on over 13 000 in depth interviews conducted over a ten year period Kerry Herron and Hank Jenkins Smith have created a unique and rich set of data providing insights into public opinion on nuclear deterrence terrorism and other security issues from the end of the Cold War to the present day Their goal is to shed light not only on changes in public opinion about a range of security related policy issues but also to gauge the depth of the public's actual understanding of these matters Prior to this study the predominant view held that the American people were incapable of articulate and consistent thought on complex political subjects This book overturns that notion and demonstrates the sometimes surprisingly cogent positions held by ordinary members of the public on intricate national issues The book's solid data based on long term studies combined with crisp writing and often startling conclusions will appeal to a wide range of

readers scholars journalists and policy makers **Critical Masses and Critical Choices** is the definitive account of the change in public perceptions on security threats and reactive strategies from the early 1990s to the post 9 11 period This broad and highly original study will prove an indispensable tool for policy makers and scholars alike **Why the Gulf War Still Matters** Patrick J. Garrity,1993 SCOTT Copy 1 From the John Holmes Library Collection **Statecraft and Power** Christopher C. Harmon,David Tucker,1994 These essays on strategy war and statecraft have been written during the current reassessment of United States national strategy But they also take strategic thinking back to certain principals and interests which have guided America before during and after the Cold War Co published with The Institute for Public Policy **China and Global Nuclear Order** Nicola Horsburgh,2015 This book offers an empirically rich study of Chinese nuclear weapons behaviour and the impact of this behaviour on global nuclear politics since 1949 China s behaviour as a nuclear weapons state is a major determinant of global and regional security For the United States there is no other nuclear actor with the exception of Russia that matters more to its long term national security However China s behaviour and impact on global nuclear politics is a surprisingly under researched topic Existing literature tends to focus on narrow policy issues such as misdemeanours in China s non proliferation record the uncertain direction of its military spending and nuclear force modernization or enduring opaqueness in its nuclear policy This book proposes an alternative context to understand both China s past and present nuclear behaviour its engagement with the process of creating and maintaining global nuclear order The concept of global nuclear order is an innovative lens through which to consider China as a nuclear weapons state because it draws attention to the inner workings institutional and normative that underpin nuclear politics It is also a timely subject because global nuclear order is considered by many actors to be under serious strain and in need of reform Indeed today the challenges to nuclear order are numerous from Iranian and North Korean nuclear ambitions to the growing threat of nuclear terrorism This book considers these challenges from a Chinese perspective exploring how far Beijing has gone to the aid of nuclear order in addressing these issues *Weapons Proliferation in the 1990s* Brad Roberts,1995 The proliferation of weapons of mass destruction has emerged as a major topic of international security in the post Cold War world This compendium of articles published in The Washington Quarterly between 1991 and 1995 describes the changing nature of the problem discusses new trends in nonproliferation and counterproliferation policy identifies new arms control challenges at the regional and global levels and concludes by addressing the global politics of proliferation **Regional Security Governance in Post-Soviet Eurasia** Igor Davidzon,2021-10-06 This book explores post Soviet Eurasian regional security governance as embedded in the military alliance of Collective Security Treaty Organization CSTO CSTO was established in 2002 and consists of six post Soviet countries Russia Belarus Armenia Tajikistan Kazakhstan and Kyrgyzstan Moving studies of regional security governance beyond the so called Eurocentrism trend expressed inter alia via the focus on Western military alliance such as NATO this book examines CSTO as a new post Soviet form of regional security cooperation

by looking at the reasons and drivers behind the establishment of the post Soviet Eurasian security governance the organization's institutional design the military capabilities of its member states the degree of the members integration within the alliance the cooperation pattern adopted by CSTO members as well as the effect and effectiveness of this military alliance

Nuclear Policies in Europe Bruno Tertrais, 2013-09-13 While international security has radically changed since 1989 nuclear weapons remain a subject of debate and contention This paper provides an analytical framework for understanding post Cold War Europe's strategic debates It offers insights into Europe's national nuclear policies and perspectives It examines the possible outcomes of current debates and gives policy recommendations for managing the new nuclear debates faced by Europe and by NATO

On Absolute War Eric Fleury, 2019-01-15 Nearly two decades after the declaration of a War on Terror the precise relationship between warfare and terrorism remains unclear The United States and its allies have long sought to inflict a decisive defeat upon groups such as Al Qaeda and ISIS while regarding their individual members as malevolent criminals undeserving of combatant status A clearer understanding of how terrorists define victory and how their method of fighting relates to conventional military forces is necessary in order to devise more realistic and effective strategies of counterterrorism *On Absolute War* constructs a theoretical framework for the study of terrorism based on Carl von Clausewitz's *On War* widely regarded as the greatest analysis of war ever written Through a review of Clausewitz's work and a set of historical case studies ranging from the Fenian Dynamite Campaign of the 1880s to the wars in Iraq and Afghanistan Prof Fleury reveals just how closely terrorism mimics the logic of war Terrorism attempts to restore war to its theoretical baseline a condition that Clausewitz called absolute war featuring relentless escalation toward a climactic result While never achieving this ideal in practice terrorists succeed to the extent that they compel their enemies and their prospective followers to engage mutual escalation which will ultimately favor whichever side is better able to jettison logistical and normative limits Consequently states must engage terrorists on the basis of Clausewitz's two most important injunctions namely that war is temporary and subordinate to political controls Given the very real prospect of a war without any temporal and spatial limits *On Absolute War* provides the theoretical basis for a strategy of limiting the effects of terrorism rather than repeatedly trying and failing to destroy it
