Drew,Fred J. Reule,Air University (U.S.). Center for Aerospace Doctrine, Research, and Education,1986 The subject of this study was particularly difficult to approach The problems were caused by both the scope of the subject and the complexity of the issues involved The key to understanding the study is to fully comprehend the assumptions outlined in chapter 1 and to keep them clearly in mind as each chapter is read In short chapter 1 is essential reading We believe that the true value of this study will be found in the debate that it generates The nature of the subject is such that men of exceptional knowledge and goodwill can examine the same evidence and come to conflicting conclusions Thus the speculations are fair game for those with different points of view To aid in the critique of the study the format should facilitate the reader in highlighting portions of the text and in writing marginalia Special Bibliography Series United States Air Force Academy.
