Contemporary philosophy seems a great swirling almost chaos Every situation must seem so at the time probably because philosophy itself resists structuration and because personal and political factors within as well as without the discipline must fade in order for the genuinely philosophical merits of performances to be assessed Nevertheless some remarks can still be made to situate the present volume For example at least half of philosophy on planet Earth is today pursued in North America which is not to say that this portion is any less internally incoherent than the whole of which it thus becomes the largest part and the present volume is North American Incidentally the recognition of culturally geographic traditions and tendencies nowise implies that striving for cross cultural if not trans cultural philosophical validity has failed or ceased Rather it merely recognizes a significant aspect relevant from the historical point of view Episteme Aesthetics Ethics Etc mology Analytic Philosophy Marxism Existentialism Etc Figure 1 There are two main ways in which philosophical developments are classified One is in terms of tendencies movements and schools of thought and the other is in terms of traditional sub disciplines When there is little contention among schools the predominant way is in terms of sub disciplines such as aesthetics ethics politics etc Today this mode of classification can be seen to intersect with that in terms of movements and tendencies both of which are represented in the above chart Energy and the Missing Resource I. Dostrovsky,1988 This 1989 book provides a nontechnical analysis of present and future energy resources and their potential development to meet future demand
