Nuclear Deterrence Does It Deter:

Nuclear deterrence--does it deter? Honoré Marc Catudal, 1985 *The Future of U.S. Nuclear Weapons Policy* Committee on International Security and Arms Control, National Academy of Sciences, 1997-07-01 The debate about appropriate purposes and policies for U S nuclear weapons has been under way since the beginning of the nuclear age With the end of the Cold War the debate has entered a new phase propelled by the post Cold War transformations of the international political landscape This volume based on an exhaustive reexamination of issues addressed in *The Future of the U S Soviet Nuclear Relationship* NRC 1991 describes the state to which U S and Russian nuclear forces and policies have evolved since the Cold War ended The book evaluates a regime of progressive constraints for future U S nuclear weapons policy that includes further reductions in nuclear forces changes in nuclear operations to preserve deterrence but enhance operational safety and measures to help prevent proliferation of nuclear weapons In addition it examines the conditions and means by which comprehensive nuclear disarmament could become feasible and desirable

What Causes War? Greg Cashman, 2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory's implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations

The Arms Race in an Era of Negotiations David Carlton, Carlo Schaerf, 1991-08-05 The countries of NATO and the Warsaw Pact have begun to negotiate for nuclear and conventional arms reductions The world is no longer bipolar as the arsenals of China France and Britain become more significant This book looks at strategic realities and current global and European problems

Countering Weapons of Mass Destruction Albert J. Mauroni, 2016-10-12 The Cold War phrase weapons of mass destruction continues to be used despite significant changes in international political cultures military concepts of operation and technology advances Today the term weapons of mass destruction WMD is used to address many things from grams of ricin and barrels of

industrial chemicals to megaton nuclear weapons As a direct result of the decision to refer to all nuclear biological and chemical NBC weapons as well as biological chemical and radiological CBR hazards as WMD we have lost the ability to accurately develop assess and discuss policy concerns relating to the contemporary use of unconventional weapons on the battlefield and within the homeland This book uses a public policy framework to examine how the U S government and in particular the U S military should address the potential use of unconventional weapons in the 21st century It defines the problem identifies the policy actors and reviews policy options It discusses past policy efforts before offering a critical review of current strategies and how WMD issues are integrated into the current military Joint Operating Concepts deterrence cooperative security major combat operations irregular warfare stability and homeland security and proposes new national framework for countering WMD The aim is to answer such questions as what does counterproliferation mean and whether the U S government is adequately prepared to protect U S citizens and its armed forces from adversaries developing unconventional weapons

Detering Russia in Europe Nora Vanaga, Toms Rostoks, 2018-09-21 This edited volume examines deterrence and the defense efforts of European states neighboring Russia following the Crimean intervention Deterrence after being largely absent from debates among academics and policy makers for almost a quarter of a century has made a comeback in Europe Since Russia's annexation of Crimea and the start of the military conflict in Ukraine's Donbass region eastern and northern European states have revised their assessments of Russia's policies and intentions The approach used by Russia in Ukraine has rendered lessons learned from the Cold War deterrence only partially applicable due to the changing security situation in Europe The emergence of the cyber realm a smaller emphasis on nuclear deterrence and the ideological conflict between Russia and the West are among the key differences between the Cold War and the current security environment Structured into two parts the first part discusses conceptual aspects of deterrence while the second discusses ten country case studies which include both NATO and non NATO countries This allows for an in depth analysis of the changing character of deterrence and its practical application by Russia's European neighbours This volume will be of much interest to students of strategic studies European politics Russian foreign policy security studies and international relations in general

Arms Control Policy Marie Isabelle Chevrier, 2012-08-17 In this work an expert on biological weapons offers a thoughtful examination of the political and technical issues that have affected the implementation of arms control agreements from the 1960s to the present Arms Control Policy A Guide to the Issues examines the history of the

major arms control treaties since the early 1960s It offers readers a broad understanding of the ways in which arms control agreements were negotiated and implemented during the Cold War the international and national events that affected treaty negotiation and implementation and how the arms control landscape has changed in the war s aftermath Specifically the handbook overviews the obligations contained in bilateral U S Soviet Russian and multilateral arms control agreements covering nuclear and nonnuclear weapons It also treats such agreements as the Biological Weapons Convention the Chemical Weapons Convention the Treaty to Ban Land Mines and the Treaty to Ban Cluster Munitions The book concludes with a look at the current challenges in the implementation of arms control agreements and the future of arms control On the

Horizon Reja Younis,2021-08-15 The Nuclear Scholars Initiative is a signature program run by the Project on Nuclear Issues PONI at the Center for Strategic and International Studies CSIS to engage emerging nuclear experts in thoughtful and informed debate over how to best address the nuclear community s most pressing problems The papers included in this volume comprise research from participants in the 2020 Nuclear Scholars Initiative These papers explore a variety of topics such as the future of arms control treaties the role of artificial intelligence and cyber resilience in nuclear security and the role of regional dynamics in nuclear security Understanding Cyber Conflict George Perkovich,Ariel E. Levite,2017-11-01

Cyber weapons and the possibility of cyber conflict including interference in foreign political campaigns industrial sabotage attacks on infrastructure and combined military campaigns require policymakers scholars and citizens to rethink twenty first century warfare Yet because cyber capabilities are so new and continually developing there is little agreement about how they will be deployed how effective they can be and how they can be managed Written by leading scholars the fourteen case studies in this volume will help policymakers scholars and students make sense of contemporary cyber conflict through historical analogies to past military technological problems The chapters are divided into three groups The first What Are Cyber Weapons Like examines the characteristics of cyber capabilities and how their use for intelligence gathering signaling and precision striking compares with earlier technologies for such missions The second section What Might Cyber Wars Be Like explores how lessons from several wars since the early nineteenth century including the World Wars could apply or not to cyber conflict in the twenty first century The final section What Is Preventing and or Managing Cyber Conflict Like offers lessons from past cases of managing threatening actors and technologies **India-Pakistan Strategic Relations**

Christoph Mumtaz, Uzma Bluth,2020-05-25 India and Pakistan have been in a state of persistent conflict that goes back to the very creation of these states after decolonization This conflict has resulted in several wars and continuing armed clashes After both states became nuclear powers one would have expected a fundamental change in the way they wage war since it is a fundamental principle of International Relations theory that nuclear armed states do not go to war with each other But the situation in South Asia seems to defy this principle India s conventional superiority should be neutralized by Pakistan s nuclear capability while Pakistan s risk taking behavior should be reduced But as a matter of fact the situation has turned out

quite differently Although large scale conventional wars have not occurred the nuclear status seems to have encouraged conflict and risk taking The number of armed clashes rose Bluth and Mumtaz scrutinize the atypical and seemingly paradoxical impact of nuclearization on the conflict between India and Pakistan paying extra attention on the question of how stable this paradoxical strategic relationship is They demonstrate that the dominant paradigm used in the International Relations literature is by far not adequate to explain the strategic relations between India and Pakistan and set to work on developing a more coherent explanation A must read for everyone interested in International Relations and conflict resolution research

Proceedings of a Workshop on Deterring Cyberattacks National Research Council, Policy and Global Affairs, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Deterring Cyberattacks: Informing Strategies and Developing Options for U.S. Policy, 2010-10-30 In a world of increasing dependence on information technology the prevention of cyberattacks on a nation's important computer and communications systems and networks is a problem that looms large Given the demonstrated limitations of passive cybersecurity defense measures it is natural to consider the possibility that deterrence might play a useful role in preventing cyberattacks against the United States and its vital interests At the request of the Office of the Director of National Intelligence the National Research Council undertook a two phase project aimed to foster a broad multidisciplinary examination of strategies for deterring cyberattacks on the United States and of the possible utility of these strategies for the U S government The first phase produced a letter report providing basic information needed to understand the nature of the problem and to articulate important questions that can drive research regarding ways of more effectively preventing discouraging and inhibiting hostile activity against important U S information systems and networks The second phase of the project entailed selecting appropriate experts to write papers on questions raised in the letter report A number of experts identified by the committee were commissioned to write these papers under contract with the National Academy of Sciences Commissioned papers were discussed at a public workshop held June 10 11 2010 in Washington D C and authors revised their papers after the workshop Although the authors were selected and the papers reviewed and discussed by the committee the individually authored papers do not reflect consensus views of the committee and the reader should view these papers as offering points of departure that can stimulate further work on the topics discussed The papers presented in this volume are published essentially as received from the authors with some proofreading corrections made as limited time allowed

Bernard Brodie and the Foundations of American Nuclear Strategy Barry Howard Steiner, 1991 Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom
