European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it

Twomey, 2011-07-15 In *The Military Lens* Christopher P Twomey shows how differing military doctrines have led to misperceptions between the United States and China over foreign policy and the potential dangers these might pose in future relations Because of their different strategic situations histories and military cultures nations may have radically disparate definitions of effective military doctrine strategy and capabilities Twomey argues that when such doctrines or theories of victory differ across states misperceptions about a rival's capabilities and intentions and false optimism about one's own are more likely to occur In turn these can impede international diplomacy and statecraft by making it more difficult to communicate and agree on assessments of the balance of power When states engage in strategic coercion either to deter or to compel action such problems can lead to escalation and war Twomey assesses a wide array of sources in both the United States and China on military doctrine strategic culture misperception and deterrence theory to build case studies of attempts at strategic coercion during Sino American conflicts in Korea and the Taiwan Strait in the early years of the Cold War as well as an examination of similar issues in the Arab Israeli conflict After demonstrating how these factors have contributed to past conflicts Twomey amply documents the persistence of hazardous miscommunication in contemporary Sino American relations His unique analytic perspective on military capability suggests that policymakers need to carefully consider the military doctrine of the nations they are trying to influence      *Contending with Terrorism* Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 2010-07-09 Experts explore the sources of contemporary terrorism what terrorists want and how the United States and other countries should respond Since the attacks of September 11 2001 scholars and policy analysts in national security have turned their attention to terrorism considering not only how to prevent future attacks but also the roots of the problem This book offers some of the latest research in terrorism studies The contributors examine the sources of contemporary terrorism discussing the impact of globalization the influence of religious beliefs and the increasing dissatisfaction felt by the world's powerless They consider the strategies and motivations of terrorists offering contending perspectives on whether or not terrorists can be said to achieve their goals explore different responses to the threat of terrorism discussing such topics as how the United States can work more effectively with its allies and contemplate the future of al Qaeda asking if its networked structure is an asset or a liability The essays in *Contending with Terrorism* address some of the central topics in the analysis of contemporary terrorism They promise to guide future policy and inspire further research into one of most important security issues of the twenty first century Contributors Max Abrahms Daniel

Brown,Owen R. Cote,Sean M. Lynn-Jones,Steven E. Miller,2009-01-30 Experts consider whether American primacy will endure or if the future holds a multipolar world of several great powers The unprecedented military economic and political power of the United States has led some observers to declare that we live in a unipolar world in which America enjoys primacy or even hegemony At the same time public opinion polls abroad reveal high levels of anti Americanism and many foreign governments criticize U S policies Primacy and Its Discontents explores the sources of American primacy including the uses of U S military power and the likely duration of unipolarity It offers theoretical arguments for why the rest of the world will or will not align against the United States Several chapters argue that the United States is not immune to the long standing tendency of states to balance against power while others contend that wise U S policies the growing role of international institutions and the spread of liberal democracy can limit anti American balancing The final chapters debate whether countries are already engaging in soft balancing against the United States The contributors offer alternative prescriptions for U S foreign policy ranging from vigorous efforts to maintain American primacy to acceptance of a multipolar world of several great powers Contributors Gerard Alexander Stephen Brooks John G Ikenberry Christopher Layne Keir Lieber John Owen IV Robert Pape T V Paul Barry Posen Kenneth Waltz William Wohlforth      **Cultural Anthropology of the Middle East** ,1992 During the last two decades the number of anthropologists conducting research in the Middle East has increased considerably Together they have produced an abundance of valuable studies often based on prolonged periods of ethnographic fieldwork Cultural Anthropology of the Middle East A Bibliography offers a comprehensive survey of their results The first volume published in 1992 covered publications which appeared between 1965 and 1987 The second volume brings the bibliography further up to date listing publications between 1988 and 1992 and adds some 260 titles which were published up through 1987 As in the first volume the majority of the titles are annotated      **Perils of Anarchy** Michael E. relative ease of offense and defense varies in international politics Offense defense theory argues that the relative ease of offense and defense varies in international politics When the offense has the advantage military conquest becomes easier and war is more likely the opposite is true when the defense has the advantage The balance between offense and defense depends on geography technology and other factors This theory and the body of related theories has generated much debate and research over the past twenty five years This book presents a comprehensive overview of offense defense theory It includes contending views on the theory and some of the most recent attempts to refine and test it **The Origins of**

**Major War** Dale C. Copeland, 2013-02-15 One of the most important questions of human existence is what drives nations to war especially massive system threatening war Much military history focuses on the who when and where of war In this riveting book Dale C Copeland brings attention to bear on why governments make decisions that lead to sustain and intensify conflicts Copeland presents detailed historical narratives of several twentieth century cases including World War I World War II and the Cold War He highlights instigating factors that transcend individual personalities styles of government geography and historical context to reveal remarkable consistency across several major wars usually considered dissimilar The result is a series of challenges to established interpretive positions and provocative new readings of the causes of conflict Classical realists and neorealists claim that dominant powers initiate war Hegemonic stability realists believe that wars are most often started by rising states Copeland offers an approach stronger in explanatory power and predictive capacity than these three brands of realism he examines not only the power resources but the shifting power differentials of states He specifies more precisely the conditions under which state decline leads to conflict drawing empirical support from the critical cases of the twentieth century as well as major wars spanning from ancient Greece to the Napoleonic Wars

**Theories of War and Peace** Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 1998-09-15 New approaches to understanding war and peace in the changing international system What causes war How can wars be prevented Scholars and policymakers have sought the answers to these questions for centuries Although wars continue to occur recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and prevention of war This volume includes essays by leading scholars on contemporary approaches to understanding war and peace The essays include expositions analyses and critiques of some of the more prominent and enduring explanations of war Several authors discuss realist theories of war which focus on the distribution of power and the potential for offensive war Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace In light of the apparent increase in nationalism and ethnic conflict several authors present hypotheses on how nationalism causes war and how such wars can be controlled Contributors also engage in a vigorous debate on whether international institutions can promote peace In a section on war and peace in the changing international system several authors consider whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war

*Redeemer Nation* Orrin Schwab, 2004 In this book Dr Orrin Schwab develops the concept of the modern technocratic state as part of a global technocratic culture and civilization The author argues that technocratic cultural and institutional forms were and are part of a collective script for Western culture The American script combined the scientific commercial and technological aspects of the Enlightenment with the radical 17th century Protestant belief in America as a new Zion In the twentieth century the synthesis of mission along with global technocratic knowledge and institutions created the Wilsonian liberal technocratic order As the principal agent and protector of the modern capitalist international system America the self defined Redeemer Nation has moved through the controlled anarchy of international relations from one war and crisis to the next confirmed in its self defined role and mission

Security, Arms Control and Defence Restructuring in East Asia Bjørn Møller, 2019-01-22 First published in 1998 this volume examines East Asia especially Northeast Asia which has been a region of considerable political security of importance for several key reasons It features several great and medium powers China Japan and Russia as well as North and South Korea Even though no arms race is yet discernible among these states with the partial exception of the two Koreas it is conceivable that one might commence If it did the level of militarization could become quite alarming if only because of the tremendous and rapidly growing economic potential of the regional states Even though relations among regional states except the two Koreas are currently peaceful the region features several unresolved issues e g concerning territory and a historical legacy of enmity between several states To prevent such conflicts of interest from erupting into armed conflict is of the utmost importance A stabilizing factor is that the military potentials in the region are still predominantly defensively oriented i e most states lack the requisite power projection or invasion capabilities to inflict serious harm on each other However this might change in the not so distant future Hence the importance of confidence building measures of an institutionalization of regional relations and of a strengthening of commitments to defensive military strategies and postures
