Digital Image Processing in Medicine K. H. Höhne,2013-03-07 In diagnostic medicine a large part of information about the patient is drawn from data which more or less are represented in an opti calor pictorial form There is a very wide range of such data as e g the patients appearance the various kinds of radiological images or cytological imagery In conventional diagnostics the data as it comes from the acquisition device is perceived by the physician and is interpreted with the help of a large amount of a priori knowledge to give a diagnostic finding During the last 15 years a steadily rising number of attempts have been made to support these processes by the application of com puters The attempts mainly concentrate on three objectives 1 Support of the perception process by the production of better or new types of images e g by Computer tomography or Computer angio graphy image processing 2 Automation of the interpretation process e g for bloodcell dif ferentiation pattern recognition 3 Management of the steeply rising amount of medical image data in the hospital image data bases Although the early applications of digital methods aimed at the second objective in the last years much more success has been a achieved in the support of the perception process by methods of image process ing The reason for this is obvious in the case of automatic interpre tation the a priori knowledge of the physician has to be formalized

Nuclear Techniques in Diagnostic Medicine Peter P. van Rijk,2012-12-06 This book was conceived by Professor K H Ephraim the former director of the Institute for Nuclear Medicine of the University Hospital of Utrecht Unfortunately due to a serious illness he was not able to finish the work he started He is however very pleased to know that the book is nevertheless being published In principle the volume consists of two parts The first is dedicated to basic science and technology in nuclear medicine It provides the data which are necessary to a clear understanding of the possibilities and limitations of investigations which make use of radioactive materials The second part of the book covers those disciplines in

medicine in which nuclear medicine can be of help in solving certain clinical problems Each chapter can be read separately even without thorough knowledge of the first part of the book The contributors to this book come from both Europe and North America Each of them has written his chapter out of long standing personal interest in his particular field of nuclear medicine This book will be of value to a wide variety of professionals It is of interest not only to clinicians of various specialties but also to diagnostic professionals i e radiologists and nuclear medicine clinicians Last but not least it will be of use to physicians in training *BRH Bulletin* ,1980 **Technical Book Review Index** ,1987 **Diagnostic Nuclear Medicine** Alexander Gottschalk,1988 **ACCP 2008 Sleep Medicine Board Review Syllabus Book** , Handbook of Medical Physics Robert G.
