Nuclear Proliferation In The 1980s Perspectives And Proposals:

Nuclear Proliferation in the 1980's William H. Kincade, Christoph Bertram, 1982-06-18 **China and Nuclear Proliferation, 1980-1990** Yan Kong, 1990 Nuclear Proliferation in South Africa Lucky E. Asuelime, Raquel A. Adekoye, 2016-06-06 This book investigates drivers and trends in nuclear proliferation in the Global South Based on an in depth analysis of South Africa s nuclear history it examines general causes of proliferation such as technical capabilities and constraints a country s motivation to build a nuclear bomb and particular domestic and international situations It also highlights Britain s role in the development of technological capability in South Africa and explains how nuclear weapons influence international relations Finally the study offers effective solutions to the problem of nuclear proliferation in developing countries **Strategic Dynamics and Nuclear Weapons Proliferation in South Asia** Bhumitra Chakma, 2004 This book analyses India and Pakistan s decision to go nuclear against the odds of Nuclear Non Proliferation Treaty based nuclear order It reflects upon the key factors that contributed to and the process that prompted India and Pakistan s nuclear programmes to take a military orientation which eventually culminated in the May 1998 nuclear tests It also explains the motivation which underscored both India and Pakistan s determination to advance nuclear postures in 1998 that appeared to be inconsistent with the post Cold War global strategic environment Further this book explains why international and regional nuclear non proliferation regimes were ineffective in preventing India and Pakistan from going nuclear *International Nuclear Nonproliferation System* John Simpson, Anthony G. McGrew, 1984-06-18 *Nuclear Non-Proliferation and Global Security* David B. Dewitt, 2020-11-19 The nuclear non proliferation treaty had recently undergone its third formal review by its signatories who had assessed its effectiveness and considered how it might better be implemented This book originally published in 1987 written by experts many of whom were leading participants in the nuclear non proliferation treaty regime at the time examines the whole range of issues connected with nuclear non proliferation and the treaty It looks at non proliferation from the point of view of nuclear nations non nuclear nations and the nuclear industry It assesses the work of the international monitoring bodies and reconsiders the place of non proliferation in the changing balance of global nuclear power It concludes by discussing the way forward The Nuclear Freeze Debate Paul M Cole, William J Taylor Jr, 2019-06-26 From a local ballot initiative in Massachusetts the nuclear weapons freeze movement has grown during the last three years into an important national issue By 1983 Congress had been asked to consider more than two dozen freeze resolutions and more than 25% of the voters in the U S had the opportunity to vote on state wide and regional freeze initiatives This book explores the issues behind the current debate over nuclear weapons and the freeze movement from a wide range of perspectives The contributors assess the goals and implications of the freeze movement examine its origins in religious and secular pacifism explain the amendments to the original freeze proposal introduced in Congress and discuss the reaction and policies of the Reagan administration The nuclear freeze movement is

placed in an international context with discussions of recent arms negotiations European views of U S policies and the possible effects of a freeze on NATO allies and on U S national security The book includes a comprehensive annotated bibliography Nuclear Weapons Proliferation in the Indian Subcontinent Ziba Moshaver,1991-06-18 There is concern about the proliferation of nuclear arms in the sub continent This book examines what influences arms policies there and argues that although both India and Pakistan are determined to retain their nuclear option both would welcome a situation which allowed them to de militarize **Opaque Nuclear Proliferation** Benjamin Frankel,2019-07-02 This examination of nuclear arms control addresses the question of what kind of posture do second generation nuclear weapons states adopt in a world in which the presumption of non proliferation is accepted **Nuclear proliferation in the nineteen hundred and eighties** ,1982 The Proliferation Puzzle Zachary S. Davis,Benjamin Frankel,2020-12-01 Originally published in 1993 this volume was unique in its scope and approach Unlike most literature on nuclear weapons proliferation at the time the essays in this volume offer theoretical discussions and suggest testable hypotheses about the causes and effects of nuclear weapons proliferation The proliferation of nuclear weapons is an ideal subject for social science scholarship and such scholarship is especially timely now Among the topics discussed in The Proliferation Puzzle are The building of nuclear weapons is a complex task touching upon many of the subjects of study at the core of social science and international relations Nuclear weapons may be acquired as a hedge against external threat for reasons of national prestige or as a result of pressures by domestic coalitions among scientists bureaucrats and the military They may be sought for defensive purposes or to support hegemonic aspirations Nuclear weapons also raise questions about civilian command and control especially in crisis situations During the last two decades the acquisition of nuclear weapons has been proscribed by the non proliferation regime The decisions countries made about acquiring these weapons and the manner they chose to build them serve as a test of the efficacy of this particular regime and of international regimes more generally Nuclear weapons were introduced at the time bipolarity became the international order As the world moves away from bipolarity there is a need to answer questions such as What would be the effect of nuclear weapons in a multipolar order How will the spread of nuclear weapons affect the distribution of capabilities among states If nuclear weapons spread to additional countries will they enhance stability or exacerbate instability Can the spread of these weapons be managed or controlled This book brings together scholars from different schools within international relations and the social sciences to address the question of why nuclear weapons spread A disciplined rigorous examination of proliferation is important not only for scholarship but also for informed policymaking The purpose of social science is to formulate hypotheses and devise theories that advance our understanding of society and aid in the fashioning of enlightened policy The essays in this volume show how explicit hypotheses about the causes and consequences of nuclear weapons proliferation provide a deeper understanding of the problem and suggest specific theory informed policy recommendations **Disarmament** ,1986 South Asia Approaches The Millennium

Marvin G Weinbaum, Chetan Kumar, 2019-07-09 This innovative volume offers a comprehensive analysis of the issues surrounding South Asia's precarious security. Going far beyond common considerations of border defense and regime, the contributors rigorously trace the social, economic, and ecological origins of present antagonisms. Although careful attention is paid to state military policies in the post-Cold War era, particularly as governments respond to a growing arms trade and nuclear proliferation, the authors also explore the far-reaching implications of environmental degradation and narcotics trafficking for security in the region, arguing that threats such as these transcend boundaries and local political regimes. Exposing the fallacies of purely geopolitical, state-centric models for considering security issues, the authors highlight the complex historical interplay between state and unofficial actors. Concrete applications of their analysis to specific cases like the Kashmir dispute between Pakistan and India demonstrate the importance of confidence-building measures and the inefficacy of zero-sum approaches to security. Finally, through its dynamic model of security, this volume offers insights into the emerging significance of new regional identities and relations in the next millennium. *Air University Library Index to Military Periodicals*, 1984

Nuclear Proliferation A. M. Babkina, 1999 Since the nuclear genie was let out of the bottle, nuclear weapons have been the exclusive domain of a select few countries. At the dawn of the millennium, however, the notion that small countries and even individuals may acquire and use them or threaten to do so is a major concern. This annotated bibliography presents 643 entries which deal with this dangerous issue. *Disarmament's Missing Dimension* Markland Policy Group, 1990-11 A collection of essays discussing Canada's role in accelerating the process of ascertaining the appropriate degree and form of UN involvement in arms control verification. *International Third World Studies Journal & Review*, 1995

America, Britain and Pakistan's Nuclear Weapons Programme, 1974-1980 Malcolm M. Craig, 2017-06-26 This book analyses US and UK efforts to shut down Pakistan's nuclear programme in the 1970s, between the catalytic Indian nuclear test of May 1974 and the decline of sustained non-proliferation activity from mid-1979 onwards. It is a tale of cooperation between Washington and London but also a story of divisions and disputes. The brutal economic realities of the decade, globalisation, and wider geopolitical challenges all complicated this relationship. Policy and action were also affected by changes elsewhere in the world. Iran's 1979 revolution brought a new form of political Islamic radicalism to prominence. The fears engendered by the Ayatollah and his followers, coupled to the blustering rhetoric of Pakistani leaders, gave rise to the Islamic bomb, a nuclear weapon supposedly created by Pakistan to be shared amongst the Muslim ummah. This study thus combines cultural, diplomatic, economic, and political history to offer a rigorous, deeply researched account of a critical moment in nuclear history. **Foreign Relations of the United States, 1977-1980: China**, 2013 **Journal of the Third World Spectrum**, 1998
