Nuclear Proliferation Prospects For Control:

Nuclear Proliferation [i.e. Proliferation]: Prospects for Control American Society of International Law, 1970 *Nuclear Proliferation-prospects for Control* American Society of International Law. Panel on Nuclear Energy & World Order, Joseph I. Coffey, 1970 **Nuclear Proliferation** Bernhard G. Bechhoefer, 1970 *Export Control and WMD Nonproliferation Law* Wei Luo, 2009 *Losing Control* Paul Rogers, 2010-03-03 When *Losing Control* was first published a decade ago it was years ahead of its time Its argument was simple the real causes of global insecurity were the widening socio economic divide global marginalisation and environmental limitations especially climate change and conflict over energy resources Paul Rogers one of the most original thinkers on international security pointed to a world in which irregular warfare from the margins would prevent powerful states from maintaining their position He even predicted accurately how the United States would respond to a catastrophic attack The new edition brings the whole analysis right up to date arguing persuasively that the world's elite cannot maintain control and that a far more emancipatory and sustainable approach to global security has to be developed

Weapons of Mass Destruction Raja Menon, 2004 Against the backdrop of international attempts to prevent the use of weapons of mass destruction this volume of essays by well known analysts examines what the threat to India could entail highlights the differences between state use of these weapons and their use by non state actors discusses possible scenarios India needs to guard against and protective measures it can take and determines the position the Indian government needs to take in the international arena in respect of initiatives to prevent the use of weapons of mass destruction A salient feature of the book is the detailed suggestions it offers of efforts required to set up material and human resources to respond to such catastrophes *The Prospects for Future Arms-control Negotiations* Louis B. Sohn, 1961 *The United Nations In Action* David J. Whittaker, 2002-11-01 This is a clear survey of the role played by the United Nations in the major political crises of the post war world In covering its high profile peace keeping role its support of new nations and its involvement in new initiatives such as famine relief and drug control the author presents an introduction to the UN in action **Energy**

Abstracts for Policy Analysis, 1988 **Nuclear Proliferation** Charles P. Cozic, Karin Swisher, 1992 Presents differing opinions on the threat of nuclear proliferation the need for arms control the role of NATO the elimination of nuclear weapons and other related topics *Air University Quarterly Review*, 1977 *Hearings, Reports and Prints of the Senate Committee on Governmental Affairs* United States. Congress. Senate. Committee on Governmental Affairs, 1980 **Threat Assessment, Military Strategy, and Defense Planning** United States. Congress. Senate. Committee on Armed Services, 1992 *The Global Politics of Science and Technology - Vol. 1* Maximilian Mayer, Mariana Carpes, Ruth Knoblich, 2014-08-20 An increasing number of scholars have begun to see science and technology as relevant issues in International Relations IR acknowledging the impact of material elements technical instruments and scientific practices on international security statehood and global governance This two volume collection brings the debate about science and

technology to the center of International Relations It shows how integrating science and technology translates into novel analytical frameworks conceptual approaches and empirical puzzles and thereby offers a state of the art review of various methodological and theoretical ways in which sciences and technologies matter for the study of international affairs and world politics The authors not only offer a set of practical examples of research frameworks for experts and students alike but also propose a conceptual space for interdisciplinary learning in order to improve our understanding of the global politics of science and technology This first volume summarizes various time tested approaches for studying the global politics of science and technology from an IR perspective It also provides empirical theoretical and conceptual interventions from geography history innovation studies and science and technology studies that indicate ways to enhance and rearticulate IR approaches In addition several interviews advance possibilities of multi disciplinary collaboration **Peace Watch** ,1997

Air University Library Index to Military Periodicals ,1992 Legal Aspects of Planetary Defence Irmgard Marboe,2021-09-27 Winner of the 2022 International Academy of Astronautics IAA Social Sciences Book Award Impacts by asteroids or comets on Earth may lead to natural disasters of catastrophic dimensions one of the most devastating having caused the extinction of the dinosaurs 66 million years ago Space agencies and other actors are increasingly dedicated to the development of technology to predict and mitigate such risks This book addresses legal and policy aspects of planetary defence activities aiming at the mitigation of Near Earth Objects NEO impact threats These include responsibility and liability for damage caused by such activities or their failure as well as international cooperation and possible decision making processes **Nuclear Weapons in the Information Age** Stephen J. Cimbala,2012-02-02 In today s information age the coexistence of nuclear weapons with advanced conventional weapons and information based concepts of warfare is a military contradiction Nuclear deterrence was initially predicated on geopolitical military and technical assumptions These were based on Cold War politics rational deterrence theory the concept of mutual vulnerability and the fact that information and technology diffusion were limited Today however far from being obsolete nuclear and other weapons of mass destruction have not only survived but have become weapons for states that face security threats including perceived threats of nuclear blackmail or expectation of conflicts This study focuses on this unplanned coexistence of two distinct arts of war including the possibility that states like the U S may be held hostage to nuclear blackmail by outlier regimes or terrorists such as North Korea It shows that restricting nuclear proliferation should still be on the agenda of policymakers and calls for a revitalized global nonproliferation regime This unique survey by a leading expert will appeal to anyone interested in arms control nuclear proliferation and defense policy *Weapons Proliferation in the 1990s* Brad Roberts,1995 The proliferation of weapons of mass destruction has emerged as a major topic of international security in the post Cold War world This compendium of articles published in The Washington Quarterly between 1991 and 1995 describes the changing nature of the problem disusses new trends in nonproliferation and counterproliferation policy identifies new arms control challenges at

the regional and global levels and concludes by addressing the global politics of proliferation
