Accelerator Mass Spectrometry Techniques and Applications Shan Jiang, Ming He, Kejun Dong, 2025-05-23 This book highlights the advances in the technology instrumentation method developments and applications of Accelerator Mass Spectrometry AMS It systematically introduces the principles and structure of AMS The authors put emphasis on the new techniques and measurement methods of AMS with detailed descriptions of its applications in the fields of nuclear science archaeology geoscience biomedicine and environmental science The advances made by global researchers are mainly in three directions 1 the miniaturization of AMS instruments 2 inventions based on new technology and new theories such as superionization AMS and MS 3 new methods and applications including measurements of noble gases ^{85}Kr ^{133}Xe and ^{39}Ar using superionization AMS dating of human history with ^{41}Ca increasing ^{14}C dating from 40 ky to more than 60 ky and measurements with such important dating nuclides as ^{40}K ^{40}Ca ^{40}Ar ^{87}Ru ^{87}Sr and ^{187}Re ^{187}Os in geology and archeology The book is not only a good reference for technicians of MS and accelerators but also a helpful information source on how to use AMS for researchers and graduate students in their research and work in geology archeology environmental science nuclear science materials science and biomedicine

Symposium Of North Eastern Accelerator Personnel, Sneap 31 F Dworschak, R Holzle, 1999-09-20 Electrostatic particle accelerators are used in a number of fields such as nuclear physics atomic physics materials science accelerator mass spectrometry environmental science and even art The annual SNEAP meetings act as an efficient medium for exchanging experiences in the operation of electrostatic particle accelerators The proceedings with submitted manuscripts transcribed discussion sessions and technical laboratory status reports are a valuable source of practical knowledge for all accelerator staff In the 31st Symposium of Northeastern Accelerator Personnel 76 delegates from 19 countries representing 47 laboratories and companies Fourteen papers dealt both with the operating status and new developments at low energy linear accelerator laboratories in Australia France Germany Hungary India Russia and the United States Additionally laboratories from Austria Germany and Sweden introduced the function of their accelerators in high quality accelerator mass spectrometry and four laboratories from Germany Japan and the United States demonstrated interesting applications of electrostatic particle accelerators Finally seventeen laboratories presented their annual reports

European Particle Accelerator Conference (Epac 94) (In 3 Volumes) Christine Petit-jean-genaz,Vic Suller,1994-11-26 These proceedings aim to provide a comprehensive overview of research technology and applications in the field of accelerators Contributions from the entire field of accelerators are presented including low and high energy machines and medical and industrial accelerators **Distributed Computer Control Systems 1985** G. J. Suski,2014-05-23 Focuses on recent advances in the theory applications and techniques for distributed computer control systems Topics covered include DCCS applications and case studies DCCS communications architectural considerations in DCCS DCCS tools for design and development DCCS communication management function and resource allocation in DCCS design methodologies for DCCS DCCS applications and systems Contains 22 papers **Science in the Mission Agencies and Federal Laboratories** United States. Congress. House. Committee on Science and Technology. Task Force on Science Policy,1987 **In the Steps of Alan Turing: Working in the Digital Age** James Lenton Alty,2024-08-16 Computing has developed at an astonishing pace over the last 40 years and Professor Alty has been involved in most aspects from working at the bits bytes level to higher level management As a member of the Computer Board for Universities and Research Councils

between 1976-81 he chaired a very influential working party on microtechnology which had a major impact both in universities and in industry One commentator wrote This report should be tattooed on the DTI's backside In 1976 he and his team were the first to recognise that the postcode was much more important than assisting the posting of letters and they pioneered its commercial use He spent a great deal of effort making computers easier to use for the average person Between 1984 and 1990 he was Executive Director of the Turing Institute for Artificial Intelligence and became very involved with artificial intelligence research around the world Between 1990 and 2000 his research team made significant improvements to critical computer interfaces in power stations and aircraft In the 1990s Professor Alty examined the techniques of musical composition and showed that they could be used in computer interfaces In 1996 he pioneered the commercial use of digital radio producing with Roberts Radio the first successful DAB Radio one of which is on display in the British Science Museum Finally in 2000 he and his team performed some important research into dyslexia which is still highly quoted even today This book provides an interesting insight into working in the digital age

Reviews Of Accelerator Science And Technology - Volume 9: Technology And Applications Of Advanced Accelerator Concepts Alexander Wu Chao, Weiren Chou, 2017-02-20

Since its invention in the 1920s particle accelerators have made tremendous progress in accelerator science technology and applications However the fundamental acceleration principle namely to apply an external radiofrequency RF electric field to accelerate charged particles remains unchanged As this method either room temperature RF or superconducting RF is approaching its intrinsic limitation in acceleration gradient measured in MeV/m it becomes apparent that new methods with much higher acceleration gradient measured in GeV/m must be found for future very high energy accelerators as well as future compact table top or room size accelerators This volume introduces a number of advanced accelerator concepts AAC their principles technologies and potential applications For the time being none of them stands out as a definitive direction in which to go But these novel ideas are in hot pursuit and look promising Furthermore some AAC requires a high power laser system This has the implication of bringing two different communities accelerator and laser to join forces and work together It will have profound impact on the future of our field Also included are two special articles one on Particle Accelerators in China which gives a comprehensive overview of the rapidly growing accelerator community in China The other features the person of the issue who was well known nuclear physicist Jerome Lewis Duggan a pioneer and founder of a huge community of industrial and medical accelerators in the US
