Nuclear Weapons And International Behavior:

Nuclear Weapons and International Behavior Henry T. Nash, 1975-05-20 *Nuclear Weapons and International Behaviour* H.T. Nash, 2024-12-30 **Nuclear Weapons in the Changing World** Patrick J. Garrity, Steven A. Maaranen, 2012-12-06 Lawrence Freedman One of the major bonuses of the collapse of communism in Europe is that it may never again be necessary to enter into a sterile debate about whether it is better to be red or dead This appeared as the ultimate question in the great nuclear debate of the early 1980s When put so starkly the answer appeared obvious better to live and struggle in a totalitarian system than to destroy totalitarian and democratic systems alike There were a number of points to be made against this Communist regimes had demonstrated the possibility of being both red and dead while the West had managed successfully to avoid the choice If we allowed nuclear disarmament to become an overriding priority this might encourage excessive respect for Soviet interests and a desire to avoid any sort of provocation to Moscow a point not lost on those in Eastern Europe who were then struggling against repression and could not see why disarmament should be given a higher priority than freedom Now that the old communist states have liberated themselves and the West no longer risks conspiring in their enslavement there is a correspondingly reduced danger of mass death As a result and with so much else of immediate Lawrence Freedman Department of War Studies King's College University of London London WC2R 2LS England **Nuclear Weapons in the Changing World Perspectives from Europe Asia and North America** **Beyond 1995** R.E. Pendley, J.F. Pilat, 2012-12-06 There is almost universal support for the view that the world would be an even more dangerous place if there were to be more nuclear weapon states There would be more fingers on more triggers and probably a greater risk that a trigger might be pulled with incalculable consequences It is easy to see therefore that there is a collective interest in avoiding the spread of nuclear weapons to further countries Nations do not however normally undertake or refrain from actions because of such a collective interest they do so because of their individual interests This is especially true in the field of national security A nation perceiving that it has a real interest in developing nuclear weapons is not very likely to refrain from doing so merely because it is told such development would be bad for the world community If the global interest in avoiding the spread of nuclear weapons to more countries is to succeed conditions that make it in the interest of each individual nation to renounce nuclear weapons need to be created or maintained Fortunately conditions have prevailed in which the vast majority of nations have seen an advantage in making legally binding nonproliferation commitments An important rationale for many of these countries has been that these commitments would facilitate the transfer of desired civil nuclear technology **How Nations Behave** Louis Henkin, 1979 Previous edition 1st published in 1968 *Nonproliferation Reader* United States. Arms Control and Disarmament Agency, 1994 Arms Control in the 21st Century Oliver Meier, Christopher Daase, 2013-05-02 This volume evaluates the impact of coercive arms control efforts to curb the spread of weapons of mass destruction in the twenty first century A new paradigm in arms control is gradually

replacing the idea that mutually agreed restrictions on armaments can improve international security Thus Hedley Bull s classic definition of arms control as the cooperation between antagonistic pairs of states in military affairs needs to be amended by a new notion of coercive arms control as the set of non cooperative and non reciprocal measures to restrict the weapons or military capabilities of certain states This volume addresses the topic of how this ongoing paradigmatic shift will affect the effectiveness of arms control as a conflict management instrument While some argue that new instruments can complement and strengthen traditional multilateral and inclusive arms control regimes others maintain that conflicts and contradictions between coercive and cooperative arms control regimes will severely limit their effectiveness This volume provides a forum for academics and practitioners from around the globe to discuss these developments in depth and to assess the specific strengths and weaknesses of these new instruments of arms control This book will be of much interest to students of arms control global governance foreign policy and IR Security Studies in general

Nuclear Authority Robert L. Brown, 2015-03-03 Once dismissed as ineffectual the International Atomic Energy Agency IAEA has in the past twenty years emerged as a powerful international organization Member states allow the IAEA to render judgment on matters vital to peace and security while nations around the globe comply with its rules and commands on proliferation safety and a range of other issues Robert L Brown details the IAEA s role in facilitating both control of nuclear weapons and the safe exploitation of nuclear power As he shows the IAEA has acquired a surprising amount of power as states for political and technological reasons turn to it to supply policy cooperation and to act as an agent for their security and safety The agency s success in gaining and holding authority rests in part on its ability to apply politically neutral expertise that produces beneficial policy outcomes But Brown also delves into the puzzle of how an agency created by states to aid cooperation has acquired power over them

The Future of Arms Control Michael A. Levi, Michael E. O'Hanlon, 2004-12-07 Arms control for decades at the core of the foreign policy consensus today is among the more contentious issues in American politics It is pilloried and considered out of mode in many conservative quarters while being viewed as nearly sacrosanct in many liberal circles In this new book Michael Levi and Michael O Hanlon argue that neither the left nor the right has a correct view of the proper utility of arms control in the age of terror Arms control in the traditional sense lengthy treaties to limit nuclear and other military competitions among the great powers is no longer particularly useful Nor should arms control be pursued as a means to the end of constraining the power of nations or of promoting global government It is still a critical tool though for controlling dangerous technologies particularly those that in the hands of hostile states or terrorist organizations could cause massive death and destruction Arms control and coercive action including military force must be integrated into an overall strategy for preventing proliferation now more than ever before Arms control should be used to gain earlier warning of illicit activities

inside dangerous states allowing the international community to take coercive action in a timely way The authors propose three new criteria to guide future arms control efforts designed to respond to today's geopolitical realities Arms control must focus on the dangers of catastrophic technology not so much in the hands of major powers as of small states and terrorist groups Their criteria lead to a natural focus on nuclear and biological technologies Much tougher measures to prevent countries from gaining nuclear weapons technology while purportedly complying with the Nuclear Non Proliferation Treaty and procedures for controlling dangerous biological technologies will be most prominent in this framework while lower priority is given to efforts such as bilateral nuclear accords and most t
