REPORT OF THE WORLD COMMISSION ON FORESTS AND SUSTAINABLE DEVELOPMENT

Our Forests Our Future

Ricardo Kaufer

Our Forests Our Future:

Our Forests, Our Future Emil Salim, Ola Ullsten, World Commission on Forests and Sustainable Development, 1999-04-15
Forests are extraordinary in their contribution to the basic human need for environmental stability and security as well as in their contribution to the livelihood of many The World Commission on Forests and Sustainable Development WCFSD through its unique makeup and independent nature has been able to address the most significant issues surrounding the world's forests in a manner not possible for any other body or institution By convening public hearings all over the world to give voice to those who depend on forests and by engaging itself in the politics of the issues at the highest levels the WCFSD has endeavored to address fundamental and serious concerns This report representing the culmination of these efforts discusses forest practices politics and policies and the social situations which they create or perpetuate and presents the Commission's findings conclusions and recommendations *Our Forests Our Future: Report of the World Commission on Forests and Sustainable Development* Emil Salim, Ola Ullsten, 2012 *Our Forests, Our Future* World Commission on Forests and Sustainable Development, 1999 *Our Forests, Our Future* Kogan Page, Limited, 1999-12-01 *Reconsidering REDD+* Julia Dehm, 2021-06-03 In *Reconsidering REDD Authority Power and Law in the Green Economy* Julia Dehm provides a critical analysis of how the Reducing Emissions from Deforestation and Forest Degradation REDD scheme operates to reorganise social relations and to establish new forms of global authority over forests in the Global South in ways that benefit the interests of some actors while further marginalising others In accessible prose that draws on interdisciplinary insights Dehm demonstrates how through the creation of new legal relations including property rights and contractual obligations new forms of transnational authority over forested areas in the Global South are being constituted This important work should be read by anyone interested in a critical analysis of international climate law and policy that offers insights into questions of political economy power and unequal authority **Forest Politics from Below** Ricardo Kaufer, 2023-01-01 This book presents an analysis of forest politics that employs a broader scope to include non institutionalized actors It offers a comparative perspective on various environmental social movements fighting to protect forests around the globe including indigenous communities in the Amazon and eco anarchists in Europe By examining the political goals motives and tactics of these sometimes radical environmentalists it helps readers understand the commonalities and differences among these grass roots forest politicians In addition the book highlights the importance of forest related struggles for a just transition to a carbon neutral future Accordingly it will appeal to scholars of political science public policy and political sociology as well as anyone interested in social movements and forest conservation **Beaver in Western North America** Charles W. George, Dean E. Medin, Stephen W. Barrett, William S. Platts, 1988 **Forest Strategy** Michael Gane, 2007-06-28 In the past lack of understanding at the nexus between the forest sector on the one hand and strategic management on the other has led to failures in many countries to realise the potential that forest sector development offers This important new book adopts a

more holistic approach to propose a new theoretical framework for this once traditional sector one which reconciles current thinking in strategic management with natural resource management The book will provide a valuable resource for both forestry professionals particularly those in managerial positions in government departments and forest services throughout the world and for advanced students and researchers exploring the issues around forest sector administration The latter will include researchers from a range of backgrounds including forestry ecology geography conservation rural development economics forest or environmental policy social studies and public affairs and will be of particular interest to groups adopting an interdisciplinary approach to forestry issues

The Devouring Dragon Craig Simons, 2025-06-25 China's rise is assaulting the natural world at an alarming rate In a few short years China has become the planet's largest market for endangered wildlife its top importer of tropical trees and its biggest emitter of greenhouse gases Its rapid economic growth has driven up the world's very metabolism in Brazil farmers clear large swaths of the Amazon to plant soybeans Indian poachers hunt tigers and elephants to feed Chinese demand in the United States clouds of mercury and ozone drift earthward after trans Pacific jet stream journeys Craig Simons The Devouring Dragon looks at how an ascending China has rapidly surpassed the U S and Europe as the planet's worst polluting superpower It argues that China's most important 21st century legacy will be determined not by jobs corporate profits or political alliances but by how quickly its growth degrades the global environment and whether it can stem the damage Combining in depth reporting with wide ranging interviews and scientific research The Devouring Dragon shines a spotlight on how China has put our planet's forests wildlife oceans and climate in jeopardy multiplying the risks for everyone in our burgeoning increasingly busy world

Sustainable management of logged tropical forests in the Caribbean to ensure long-term productivity Gräfe, S., Köhl, M., Eckelmann, C.M., Bremner, Q., Oatham, M., Pacheco, R., Playfair, M., Shono, K., 2021-09-01 To facilitate sustainable management of logged forests in the Caribbean forest authorities of Belize Guyana Suriname and Trinidad and Tobago jointly with the Food and Agriculture Organization of the United Nations and the University of Hamburg as a scientific partner implemented the regional project Ensuring Long Term Productivity of Lowland Tropical Forests in the Caribbean financed by the German Federal Ministry of Food and Agriculture The main objective of the project was to support the sustainable management of logged forests to maintain productivity and prevent further degradation For this purpose extensive field studies were conducted in the project countries which resulted in silvicultural recommendations presented in this publication The project findings revealed that the application of general sustainable forest management protocols for tropical production forests that set limits on harvesting does not necessarily ensure sustained productivity if the composition and management of the residual stand are not considered The ratio of the number of harvested trees to the remaining future crop trees can provide a simple indicator of the sustainability of harvest If the current harvest exceeds the number of future crop trees the harvest is not sustainable As a rule of thumb at least one preferably two future crop trees per harvested tree should be

retained for future use Protection of future crop trees can be a simple and practical approach to prevent high grading and degradation of the forest growing stock The importance of reduced impact logging to reduce unnecessary damage to the future crop trees and for sustainable forest management in general is stressed
