organ works reveals a new and unique insight into Stokowski's unparalleled career in music The Organ in Manitoba James B. Hartman, 1997-12-15 Pipe organs were once a central and sometimes hotly debated part of Manitoba's cultural life. The Organ in Manitoba portrays that history: the instruments, builders, players, and critics from the date of the earliest known installations to the 1990s and includes information on musical organizations such as the Royal Canadian College of Organists. It documents over a century of evolution and changes from concepts of tonal design to styles of musical commentary and tastes and includes an inventory of installations and specifications for over 100 organs. Well illustrated with photographs and excerpts from historical reviews and other documents, it will be of interest to musicians, teachers, and music church and cultural historians Musical Times and Singing Class Circular, 1915 **Reader's Guide to Music** Murray Steib, 2013-12-02 The Reader's Guide to Music is designed to provide a useful single volume guide to the ever increasing number of English language book length studies in music. Each entry consists of a bibliography of some 3-20 titles and an essay in which these titles are evaluated by an expert in the field in light of the history of writing and scholarship on the given topic. The more than 500 entries include not just writings on major composers in music history but also the genres in which they worked from early chant to rock and roll and topics important to the various disciplines of music scholarship from aesthetics to gay/lesbian musicology Joseph Jongen and His Organ Music John Scott Whiteley, 1997 Joseph Jongen was Director of the Brussels Conservatoire from 1925 to 1939. He was first and foremost a composer and yet his career as an organist and composer of organ music was remarkable. His Sonata Eroica has become one of the enduring works of the repertoire and the Symphonie Concertante commissioned by Rodman Wanamaker for the organ of the Philadelphia store has been considered the finest of all twentieth century organ concertos. This is the first book ever to appear about Joseph Jongen in any language. It is based on twenty years of research by its author John Scott Whiteley. Part I traces Jongen's life and achievements as an organist from his earliest training in Franck's birthplace Liège to his exile in England and his final years in Brussels during which time he headed the team that designed the organ for Belgian Radio. Part II is a guide to the organ music from the points of view of both performer and musicologist. Appendices provide a catalogue of works, a numbering system for his works without opus numbers, specifications of the organs he played, and lists of variant readings in his manuscripts. This book is indispensable for serious students of the organ, the Romantic organ repertoire, and European music of the early twentieth century Organ Works, Volume I César Franck, 1999-12-21 Expertly arranged Organ music by César Franck from the Kalmus Edition series. These works are from the Romantic era.
