Pleasing The Punters:

The Punters Retirement Plan the Ultimate Punter's Bible Col Wingate, 2012 Have you heard a saying that goes something like back favorites and lose your money Again do yourself a favor and ignore it This Betting Plan may seem frustrating at times because some of the dividends are small but you must be disciplined and follow it step by step Do not deviate from the formula not even if someone tells you a horse is a sure thing This system involves backing favorites But it is done with a set procedure and it is the Staking Plan that is the key to making it successful Knowing when to bet and how much to invest is crucial to making this plan work effectively Our plan involves betting in a specific order This system is applicable to all Race Meetings all around the world You don't have to be an expert on Horse or Greyhound Racing If you have never been to a Race Meeting never had a bet in your life or don't even know what a horse or a greyhound is it doesn't matter this system will work for you

Soccer Punters - Who Bets and Which Bias Is Produced Farshid Bröker, 2012-05-06 Master's Thesis from the year 2012 in the subject Economics Micro economics grade 1-3 Frankfurt School of Finance Management language English abstract The online sports betting markets industry has been gaining in popularity worldwide during the last decade The Internet gives punters faster access to their bookmaker and lets them easily compare the odds of many different bookmakers Furthermore many online gambling sites offer a wide range of different sports events and specialized bets for their customers Nowadays it is not only possible to bet on the final outcome of a soccer match but even on the half time result or the amount of goals scored during the match The betting exchange betfair makes it possible to bet against a certain outcome meaning the punter can act as a bookmaker for a chosen event Betting on outcomes of soccer matches is very interesting with regard to probability theory because it is based on a numerical code 0 for a draw 1 if the home team wins and 2 if the home team loses Therefore many textbooks on combinatorics consider soccer bets to be a prime example for probability theory H Matthes and H K Chenhoff claim that soccer bets are a great example for the so called subjective probability which they define as the degree of confidence with which an observer believes in the occurrence of a certain event based on the information he currently has $P(A)$ would be the maximum amount in EUR that he is willing to risk if he receives exactly EUR 1 on the occurrence of A For a bookmaker this would mean that his odd for a certain event will not exceed 2 if he believes that the probability of its occurrence is 50% Hence odds that are offered by a bookmaker on the occurrence of a certain result reflect his individual estimation regarding the probability of the occurrence of the given result Of course bookmakers can be wrong If it were possible to identify a pattern for their mistakes this would help in exploiting them Furtherm
