The Cavernous Mind of Thomas Jefferson, an American Savant M. Andrew Holowchak, 2019-10-07 While every biographer has something to say concerning Thomas Jefferson's cavernous mind, his varied interests, and the depth of his understanding of them, there has never been strange as it might seem, a non-anthology dedicated to fleshing out key features of his mind, exploring Jefferson's varied interests through his varied personae. This book, studying Jefferson as lawyer, moralist, politician, scientist, epistolist, aesthetician, farmer, educationalist, and philologist, does just that. In tracing out the many hats Jefferson wore, there are many disclosures here. For instance, personal growth and human betterment were driving forces throughout his life, and they shaped his liberal and agrarian political philosophy, which in turn shaped his philosophy of education. Moreover, Jefferson was a great lover of beauty, but beauty for him was always second to functionality. That had implications for his views on agriculture, morality, aesthetics, philology, and even the Fine Arts. The structure of this book, covering an array of topics related to the mind of Jefferson, will make it appeal to a large audience. In addition, scholarly details in each chapter will make it a must-read for Jeffersonian researchers.

The Smoke of London William M. Cavert, 2016-04-07 The Smoke of London uncovers the origins of urban air pollution two centuries before the industrial revolution. By 1600 London was a fossil-fuelled city; its high-sulfur coal, a basic necessity for the poor and a source of cheap energy for its growing manufacturing sector. The resulting smoke was found ugly and dangerous throughout the seventeenth and eighteenth centuries, leading to challenges in court, suppression by the crown, doctors' attempts to understand the nature of good air, increasing suburbanization, and changing representations of urban life in poetry and on the London stage. Neither a celebratory account of proto-environmentalism nor a declensionist narrative of degradation, *The Smoke of London* recovers the seriousness of pre-

modern environmental concerns even as it explains their limits and failures Ultimately Londoners learned to live with their dirty air an accommodation that reframes the modern process of urbanization and industrial pollution both in Britain and beyond

The Poem, the Garden, and the World Jim Ellis, 2023-02-15 How an early modern understanding of place and movement are embedded in a performative theory of literature How is a garden like a poem Early modern writers frequently compared the two and as Jim Ellis shows the metaphor gained strength with the arrival of a spectacular new art form the Renaissance pleasure garden which immersed visitors in a political allegory to be read by their bodies movements The Poem the Garden and the World traces the Renaissance era relationship of place and movement from garden to poetry to a confluence of both Starting with the Earl of Leicester s pleasure garden for Queen Elizabeth s 1575 progress visit Ellis explores the political function of the entertainment landscape that plunged visitors into a fully realized golden world a mythical new form to represent the nation Next he turns to one of that garden s visitors Philip Sidney who would later contend that literature s golden worlds work to move us as we move through them reorienting readers toward a belief in English empire This idea would later be illustrated by Edmund Spenser s Faerie Queen as with the pleasure garden both characters and readers are refashioned as they traverse the poem s dreamlike space Exploring the artistic creations of three of the era s major figures Ellis argues for a performative understanding of literature in which readers are transformed as they navigate poetic worlds
