Pleistocene And Recent Environments Of The Central Great Plains:

Pleistocene and Recent Environments of the Central Great Plains J. Knox Jones (Jr.), Wakefield Dort, 1970

Pleistocene and Recent Environments of the Central Great Plains: Papers of the Symposium... Held in Lawrence, Kansas, on October 25 and 26, 1968, Sponsored by Kansas University Department of Geology and Others Kansas University Symposium on Pleistocene and Recent Environments of the Central Plains (1968.d), Archaeology on the Great Plains W. Raymond Wood, 1998 This synthesis of Great Plains archaeology brings together what is currently known about the inhabitants of the ancient Plains The essays review the Paleo Indian Archaic Woodland and Plains Village peoples providing information on technology diet settlement and adaptive patterns *The Nature of Nebraska* Paul A. Johnsgard, 2005-01-01 Where the eastern and western currents of American life merge as smoothly as one river flows into another is a place called Nebraska There we find the Platte a river that gave sustenance to the countless migrants who once trudged westward along the Mormon and Oregon trails We find the Sandhills a vast region of sandy grassland that represents the largest area of dunes and the grandest and least disturbed region of mixed grass prairies in all the Western Hemisphere And below it all we find the Ogallala aquifer the largest potential source of unpolluted water anywhere These ecological treasures are all part of the nature of Nebraska With characteristic clarity energy and charm Paul A Johnsgard guides us through Nebraska s incredible biodiversity introducing us to each ecosystem and the flora and fauna it sustains and inviting us to contemplate the purpose and secrets of the natural world as we consider our own roles and responsibilities in our connection with it *Ecology and Human Organization on the Great Plains* Douglas B. Bamforth, 2013-06-29

Archaeology of the High Plains James H. Gunnerson, 1987 **Hunters of the Recent Past** Leslie B. Davis, Brian O.K. Reeves, 2014-10-30 One of a series of more than 20 volumes resulting from the World Archaeological Congress September 1986 which brought together archaeologists and anthropologists from many parts of the world academics from contingent disciplines and non academics from a wide range of cultural backgrounds This book considers prehistoric and more recent manifestations of human hunting behaviour with a general emphasis on communal hunting It demonstrates that the combination of archaeological ethnographic and ethnohistorical approaches provides a researched basis for consideration of the topic on worldwide regional and local scales It includes theoretical and methodological issues within a context of enquiry original data presentation and discussion It is of interest to archaeologists anthropologists and ethnohistorians *The Horner Site* George C. Frison, Lawrence C. Todd, 2014-06-28 The Horner Site **Bibliography of North American Geology**, 1970 1919 28 cumulation includes material previously issued in the 1919 20 1935 36 issues and also material not published separately for 1927 28 1929 39 cumulation includes material previously issued in the 1929 30 1935 36 issues and also material for 1937 39 not published separately Geological Survey Bulletin, 1973 The Settlement of the American Continents C. Michael Barton, Geoffrey A. Clark, David R. Yesner, Georges A. Pearson, 2016-03-04 When many scholars are

asked about early human settlement in the Americas they might point to a handful of archaeological sites as evidence Yet the process was not a simple one and today there is no consistent argument favoring a particular scenario for the peopling of the New World This book approaches the human settlement of the Americas from a biogeographical perspective in order to provide a better understanding of the mechanisms and consequences of this unique event It considers many of the questions that continue to surround the peopling of the Western Hemisphere focusing not on sites dates and artifacts but rather on theories and models that attempt to explain how the colonization occurred Unlike other studies this book draws on a wide range of disciplines archaeology human genetics and osteology linguistics ethnology and ecology to present the big picture of this migration Its wide ranging content considers who the Pleistocene settlers were and where they came from their likely routes of migration and the ecological role of these pioneers and the consequences of colonization Comprehensive in both geographic and topical coverage the contributions include an explanation of how the first inhabitants could have spread across North America within several centuries the most comprehensive review of new mitochondrial DNA and Y chromosome data relating to the colonization and a critique of recent linguistic theories Although the authors lean toward a conservative rather than an extreme chronology this volume goes beyond the simplistic emphasis on dating that has dominated the debate so far to a concern with late Pleistocene forager adaptations and how foragers may have coped with a wide range of environmental and ecological factors It offers researchers in this exciting field the most complete summary of current knowledge and provides non specialists and general readers with new answers to the questions surrounding the origins of the first Americans

Index of the Journal of Paleontology Richard D. Hoare, 1980-03 This is an index of Vols 26-50 of the *Journal of Paleontology*

Great Wildlife of the Great Plains Paul A. Johnsgard, 2003 Provides an overview of 121 birds mammals and reptiles native to the Great Plains organized by habitat with information on each animal's behavior and ecology

Ecology of North American Freshwater Fishes Stephen T. Ross Ph. D., 2013-06-01 The North American freshwater fish fauna is the most diverse and thoroughly researched temperate fish fauna in the world *Ecology of North American Freshwater Fishes* is the only textbook to provide advanced undergraduate and graduate students and researchers with an up to date and integrated view of the ecological and evolutionary concepts principles and processes involved in the formation and maintenance of this fauna *Ecology of North American Freshwater Fishes* provides readers with a broad understanding of why specific species and assemblages occur in particular places Additionally the text explores how individuals and species interact with each other and with their environments how such interactions have been altered by anthropogenic impacts and the relative success of efforts to restore damaged ecosystems This book is designed for use in courses related to aquatic and fish ecology fish biology ichthyology and related advanced ecology and conservation courses and is divided into five sections for ease of use Chapter summaries supplemental reading lists online sources extensive figures and color photography are included to guide readers through the material and facilitate student learning Part 1 Faunal origins evolution and diversity

Presents a broad picture both spatially and temporally of the derivation of the fauna including global and regional geological and climatological processes and their effects on North American fishes Part 2 Formation maintenance and persistence of local populations and assemblages Focuses on how local fish populations and assemblages are formed and how they persist or not through time Part 3 Form and function Deals with the relationship of body form and life history patterns as they are related to ecological functions Part 4 Interactions among individuals and species Discusses the numerous interactions among individuals and species through communication competition predation mutualism and facilitation Part 5 Issues in conservation Focuses on several primary conservation issues such as flow alterations and the increasing biotic homogenization of faunas **Proceedings RMRS.** ,1998 Quaternary Extinctions Paul S. Martin,Richard G. Klein,2022-01-04 What caused the extinction of so many animals at or near the end of the Pleistocene Was it overkill by human hunters the result of a major climatic change or was it just a part of some massive evolutionary turnover Questions such as these have plagued scientists for over one hundred years and are still being heatedly debated today Quaternary Extinctions presents the latest and most comprehensive examination of these questions Geological Magazine May be regarded as a kind of standard encyclopedia for Pleistocene vertebrate paleontology for years to come American Scientist Should be read by paleobiologists biologists wildlife managers ecologists archeologists and anyone concerned about the ongoing extinction of plants and animals Science Uncommonly readable and varied for watchers of paleontology and the rise of humankind Scientific American Represents a quantum leap in our knowledge of Pleistocene and Holocene palaeobiology Many volumes on our bookshelves are destined to gather dust rather than attention But not this one Nature Two strong impressions prevail when first looking into this epic compendium One is the judicious balance of views that range over the whole continuum between monocausal cultural or environmental explanations The second is that both the data base and theoretical sophistication of the protagonists in the debate have improved by a quantum leap since 1967 American Anthropologist *Stratigraphy and Paleoenvironments of Late Quaternary Valley Fills on the Southern High Plains* Steven Bozarth,1995-01-01 Advances in Archaeological Method and Theory Michael B Schiffer,2014-06-30 Advances in Archaeological Method and Theory Volume 3 presents the progressive explorations in methods and theory in archeology This book discusses the general cultural significance of cult archeology Organized into nine chapters this volume begins with an overview of the spectrum of professional reactions to cult archeology This text then examines the applicability of evolutionary theory to archeology Other chapters consider the fundamental principles of adaptation as applied to human behavior and review the state of application of adaptational approaches in archeology This book discusses as well the convergence of evolutionary and ecological perspectives in anthropology that has given rise to a distinct concept of culture The final chapter deals with obsidian dating as a chronometric method and explains the problems that limit its effectiveness This book is a valuable resource for archeologists and anthropologists Graduate students and archeology students will also find this book

extremely useful *Proceedings* ,2007 The 26 papers in these proceedings are divided into five sections The first two sections are an introduction and a plenary session that introduce the principles and role the shrub life form in the High Plains including the changing dynamics of shrublands and grasslands during the last four plus centuries The remaining three sections are devoted to fire both prescribed fire and wildfire in shrublands and grassland shrubland interfaces water and ecophysiology shrubland ecosystems and the ecology and population biology of several shrub species Earth Under Fire
Paul A. LaViolette,2005-10-25 In *Earth Under Fire* Paul LaViolette investigates the connection between ancient world catastrophe myths and modern scientific evidence of a galactic destruction cycle demonstrating how past civilizations accurately recorded the causes of these cataclysmic events knowledge of which may be crucial for the human race to survive the next catastrophic superwave cycle
