Christopher Booker then leads us through the extraordinary changes in the nature of storytelling over the past 200 years and why so many stories have lost the plot by losing touch with their underlying archetypal purpose Booker analyses why evolution has given us the need to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years This seminal book opens up in an entirely new way our understanding of the real purpose storytelling plays in our lives and will be a talking point for years to come
