Women Filmmakers in Mexico Elissa J. Rashkin, 2009-01-27 Women filmmakers in Mexico were rare until the 1980s and 1990s when women began to direct feature films in unprecedented numbers. Their films have won acclaim at home and abroad and the filmmakers have become key figures in contemporary Mexican cinema. In this book, Elissa Rashkin documents how and why women filmmakers have achieved these successes as she explores how the women's movement, film studies programs, governmental film policy, and the transformation of the intellectual sector since the 1960s have all affected women's filmmaking in Mexico. After a historical overview of Mexican women's filmmaking from the 1930s onward, Rashkin focuses on the work of five contemporary directors: Marisa Sistach, Busi Cortés, Guitta Schyfter, María Novaro, and Dana Rotberg. Portraying the filmmakers as intellectuals participating in the public life of the nation, Rashkin examines how these directors have addressed questions of national identity through their films, replacing the patriarchal images and stereotypes of the classic Mexican cinema with feminist visions of a democratic and tolerant society.

Masculinity and Sexuality in Modern Mexico Víctor M. Macías-González, Anne Rubenstein, 2012-08-31 In *Masculinity and Sexuality in Modern Mexico*, historians and anthropologists explain how evolving notions of the meaning and practice of manhood have shaped Mexican history. In essays that range from Texas to Oaxaca and from the 1880s to the present, contributors write about file clerks and movie stars, wealthy world travelers and ordinary people whose adventures were confined to a bar in the middle of town. The Mexicans we meet in these essays lived out their identities through extraordinary events: committing terrible crimes, writing world famous songs, and ruling the nation, but also in everyday activities like falling in love, raising families, getting dressed, and going to the movies. Thus, these essays in the history of masculinity connect the major topics of Mexican political history since 1880 to the history of daily life.

Men at Work Cecile Jackson,2013-10-23 Gender analysis of development focuses on gender relations rather than women and men as separate gender categories but it has necessarily been women orientated in its concerns with subordination This work moves gender analysis towards a fuller understanding of men s diverse gendered identities and how these are implicated in their everyday working lives in developing country contexts The questions addressed in the papers range from conceptual and methodological issues of definitions and measurement of men s work to case studies of working men in specific settings but all are concerned with the recognition of gendered vulnerabilities of some men as men as well as with a re thinking of gender relations in the light of consideration of the subjectivities of specific groups of men

Beyond Eurocentrism Peter Gran,2021-02-01 Eurocentrism influences virtually all established historical writing With the rise of Prussia and by extension Europe eurocentrism became the dominant paradigm for world history Employing the approaches

of Gramsci and Foucault Peter Gran proposes a reconceptualization of world history He challenges the traditional convention of relying on totalitarian or democratic functions of a particular state to explain and understand relationships of authority and resistance in a number of national contexts Gran maintains that there is no single developmental model but diverse forms of hegemony that emerged out of the political crisis following the penetration of capitalism into each nation In making comparisons between seemingly disparate and distinctive nations and by questioning established canons of comparative inquiry Gran encourages people to recognize the similarities between the West and non West nations

Domestic Economies Ann Shelby Blum, 2009-01-01 When Porfirio Díaz extended his modernization initiative in Mexico to the administration of public welfare the families and especially the children of the urban poor became a government concern Reforming the poor through work and by bolstering Mexico's emerging middle class were central to the government's goals of order and progress But Porfirian policies linking families and work often endangered the children they were supposed to protect especially when state welfare institutions became involved in the shadowy traffic of child labor The Mexican Revolution which followed generated an unprecedented surge of social reform that was focused on families and accelerated the integration of child protection into public policy political discourse and private life In ways that transcended the abrupt discontinuities and conflicts of the era Porfirian officials revolutionary leaders and social reformers alike invoked idealized models of the Mexican family as the primary building block of society making families especially those of Mexico's working classes the object of moralizing reform in the name of state construction and national progress Domestic Economies Family Work and Welfare in Mexico City 1884-1943 analyzes family practices and class formation in modern Mexico by examining the ways in which family oriented public policies and institutions affected cross class interactions as well as relations between parents and children
