

EMERGENCY: PRIORITIES

Always keep in mind your primary responsibilities as a Visit Leader:

1. Keep your group safe.
2. Prevent the situation getting worse.
3. Promote recovery and safe return.

It's also **important** that you:

- do not discuss fault or liability
- do not discuss details
- get witness details
- take photographs
- do not discuss

KEEP A RECORD
who, what, when, where, how

WHO TO INFORM

Call your Emergency Contact if any of the following apply:

- You need support
- The emergency contact is not available
- The emergency contact is not the correct person to contact

Tell your emergency contact:

FIRST AID

REMEMBER: The aims of First Aid are to:

1. Preserve life:
 - Casualties need to be able to breathe
 - Unconscious put them into a safe position
 - Try to find and stop any serious bleeding
2. Prevent the condition worsening
 - Protect the casualty from the weather
 - Keep them warm and dry
 - Monitor their condition
3. Promote recovery
 - Talk to the casualty
 - Reassure them

trans boundary movement of waste has been addressed in numerous international agreements it still reaches developing countries in many forms While thousands of people depend on waste for their livelihood throughout the world many others face problems due to poor waste management In this context solid waste has not remained an issue to be tackled by the local urban bodies alone It has become a subject of importance for engineers as well as doctors psychologist economists and climate scientists and any others There are huge changes in waste management in different parts of the world at different times in history To address these issues an effort has been made by the authors to combine their experience and bring together a new text book on the theory and practice of the subject covering the important relevant literature at the same time

The Politics of Waste Management in Greater China Natalie Wai Man Wong, 2021-04-21 The growth of municipal waste is a common challenge found in the urbanised cities of Greater China but the question of how to manage municipal waste is controversial Wong examines the politics of managing municipal waste in three cities of Greater China Guangzhou Taipei and Hong Kong She looks at the controversies that arise from the issue and the consequent politicisation of the various solutions that are adopted Focusing particularly on the dynamics of policy actors in the three cities she compares the different political situations in each with the others This provides a valuable lens through which to explore the larger issue of the political transformation of Environmental Management in the Greater China region A compelling insight into environmental policymaking in Greater China for scholars studying the dynamics of Chinese politics

Untrodden Fields of Anthropology Dr. Jacobus X, 1898

The New Empire of AI Rachel Adams, 2024-11-05 As AI takes hold across the planet and wealthy nations seek to position themselves as global leaders of this new technology the gap is widening between those who benefit from it and those who are subjugated by it As Rachel Adams shows in this hard hitting book growing inequality is the single biggest threat to the transformative potential of AI Not only is AI built on an unequal global system of power it stands poised to entrench existing inequities further consolidating a new age of empire AI's impact on inequality will not be experienced in poorer countries only it will be felt everywhere The effects will be seen in intensified international migration as opportunities become increasingly concentrated in wealthier nations in heightened political instability and populist politics and in climate related disasters caused by an industry blind to its environmental impact across supply chains We need to act now to address these issues Only if the current inequitable trajectory of AI is halted the incentives changed and the production and use of AI decentralized from wealthier nations will AI be able to deliver on its promise to build a better world for all

Waste Management Research Trends Toma V. Golush, 2008 This book focuses on waste management which is the collection transport processing recycling or disposal of waste materials The term usually relates to materials produced by human activity and is generally undertaken to reduce their effect on health aesthetics or amenity Waste management is also carried out to reduce the materials effect on the environment and to recover resources from them Waste management can involve solid liquid or gaseous substances with different methods and fields of expertise for each Waste management practices differ for developed and developing nations for urban and rural areas and for residential and industrial producers Management for non hazardous residential and institutional waste in metropolitan areas is usually the responsibility of local government authorities while management for non hazardous commercial and industrial waste is usually the responsibility of the generator

Future Directions of Municipal Solid Waste Management in Africa Mohee, Romeela, Simelane, Thokozani, 2015-04-03 Transformation and rapid population growth in Africa indicates that urbanisation is one of the key determinants of the future of social dynamics and development of the continent Linked to these changes are

increased production levels of Municipal Solid Waste This book provides recommendations and solutions that derive from current situations experiences and observations in Africa The study is an essential tool for urban planners environmental engineering students and lecturers environmental consultants and policy makers it is also a resource for municipal authorities as it outlines future directions of Municipal Solid Waste management These need to be considered by the municipal authorities of most African countries *The Writings of Lafcadio Hearn* Lafcadio Hearn,1922
