Power Of International Theory Reforging The Link To Foreign Policy Making Through Scientific Enquiry:

The Power of International Theory Fred Chernoff, 2012-12-06 This new study challenges how we think about international relations presenting an analysis of current trends and insights into new directions It shows how the discipline of international relations was created with a purpose of helping policy makers to build a more peaceful and just world However many of the current trends post positivism constructivism reflectivism and post modernism share a conception of international theory that is inherently incapable of offering significant guidance to policy makers The Power of International Theory critically examines these approaches and offers a novel conventional causal alternative that allows the reforging of a link between IR theory and policy making While recognizing the criticisms of earlier forms of positivism and behaviouralism the book defends holistic testing of empirical principles methodological pluralism criteria for choosing the best theory a notion of causality and a limited form of prediction all of which are needed to guide policy makers This is an essential book for all students and scholars of international relations

internal consistency public discussion and worldly insight as the hallmarks of any scientific study of world politics In this second edition Jackson has centralised the philosophical history of the science question into a single chapter providing a clearer picture of the connections between contemporary concerns about the status of knowledge and classic philosophical debates about the relationship between human beings and the world they inhabit The central chapters feature more detailed and pedagogically useful illustrations of the methodological positions discussed making the book even better suited to clarify the philosophical distinctions with respect to which a scientific researcher must locate herself The second edition will continue to be essential reading for all students and scholars of International Relations Political Science and Philosophy of Science

A Poststructuralist Discourse Theory of Global Politics Dirk Nabers, 2015-10-07 This book develops a discourse theory of crisis and change in global politics Crisis is conceptualized as structural dislocation resting on difference and incompleteness Change is seen as the continuous but ultimately futile effort to gain a full identity The incompleteness and contingent character of the social represents the most important condition for democratic politics to become possible and for a theory of crisis and change to become conceivable In this new understanding crisis loses its everyday meaning of a periodically occurring event Instead crisis becomes an omnipresent feature of the social fabric It represents the absence of ground of social foundation and it rests within the subject as well as within the social whole

Explanation and Progress in Security Studies Fred Chernoff, 2014-08-20 Explanation and Progress in Security Studies asks why Security Studies as a central area of International Relations has not experienced scientific progress in the way natural

sciences have and answers by arguing that the underlying reason is that scholars in Security Studies have advanced a range of different notions of explanation or different criteria of explanatory superiority to show that their positions are better than rival positions To demonstrate this the author engages in in depth content analysis of the generally recognized exemplars of explanation and explanatory superiority in three of the core debates in the disciplines Why do states pursue policies of nuclear proliferation Why do states choose to form the alliances they do And why do liberal democratic states behave the way they do toward other liberal democracies The book reveals that authors in the debates that have shown the most progress use similar criteria in arguing for and against the key explanations In the nuclear proliferation debate there is wide divergence in the criteria the most visible authors use and there is wide divergence in the explanations offered In the alliance formation balance of power debate there is some overlap of criteria the most important authors use and there has been some limited movement toward consensus In the democratic peace debate there has been much more overlap of criteria the most prominent authors use and there is agreement on both some positive and negative conclusions
