Books in Print ,1994 **From Rechtsstaat to Universal Law-State** Åke Frändberg, 2014-07-03 In this book the author investigates what is common to the German idea of the Rechtsstaat and the Anglo American idea of the Rule of Law He argues that although dressed up in rather different garb these two concepts are in fact based on the same fundamental idea and stand for the same values the law state values all ideas that are in the European tradition older than their British and German variants The fundamental idea is that the individual shall enjoy legal protection against infringements brought about by the exercise of power on the part of the state In the book basic concepts such as legality legal equality legal certainty legal accessibility and legal security are investigated Also explored are their mutual relations in particular conflicts between them Furthermore the book offers practical advice on realising and sustaining these values in practice Finally it is argued that the characteristic law state values can only be justified by reference to an even more fundamental humanistic idea namely what the author calls a life of human dignity history of the jews Paul Johnson, 1987 **History of the Jews: From the Roman Empire to the early medieval period** Simon Dubnow, 1967 Lund political studies ,1977 *What Is Islam?* Shahab Ahmed, 2017-10-31 A bold new conceptualization of Islam that reflects its contradictions and rich diversity What is Islam How do we grasp a human and historical phenomenon characterized by such variety and contradiction What is Islamic about Islamic philosophy or Islamic art Should we speak of Islam or of islams Should we distinguish the Islamic the religious from the Islamicate the cultural Or should we abandon Islamic altogether as an analytical term In What Is Islam Shahab Ahmed presents a bold new conceptualization of Islam that challenges dominant understandings grounded in the categories of religion and culture or those that privilege law and scripture He argues that these modes of thinking obstruct us from understanding Islam distorting it diminishing it and rendering it incoherent What Is Islam formulates a new conceptual language for analyzing Islam It presents a new paradigm of how Muslims have historically understood divine revelation one that enables us to understand how and why Muslims through history have embraced values such as exploration ambiguity aestheticization polyvalence and relativism as well as practices such as figural art music and even wine

drinking as Islamic It also puts forward a new understanding of the historical constitution of Islamic law and its relationship to philosophical ethics and political theory A book that is certain to provoke debate and significantly alter our understanding of Islam What Is Islam reveals how Muslims have historically conceived of and lived with Islam as norms and truths that are at once contradictory yet coherent **History of the Jews** Simon Dubnov, Moshe Spiegel, 1980-12-31 **The Reflex**, 1928

Globalizing Markets L. Nijs,2016-01-26 In today s increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2 0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimation of the national state The Pigovian model brings home the often forgotten relationship between

taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2 0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state
