Power Geometries And The Politics Of Space Time:

Power-geometries and the Politics of Space-time Doreen B. Massey, 1999 **Massey, Doreen, Power-geometries and the politics of space-time** Wolfgang Aschauer, 2008 **Power-geometries and the Politics of Space-time** Doreen Massey, 1999-12-01 eine der interessantesten aktuellen theoretischen und fachpolitischen Publikationen Den Herausgebern ist es gelungen einen nachhaltigen Beitrag zur Einbringung neuer und progressiver Konzepte in die Geographie zu leisten Erdkunde Spaces of Hate Colin Flint, 2013-10-18 While much has been written about hate groups and extreme right political movements this book will be the first that addresses the crucial role that place and context play in generating and shaping them Ranging across geographical scales the essays start with the home and then move from the local to the regional to the national to finally the global In this collection much of the focus is on the U S as the contributors consider a variety of hate activity and hate groups across the country including rural white supremacist and neo Nazi movements anti black sentiment directed towards cities anti gay activity in cities and rural areas and the resurgent Southern nationalist movement Closing with pieces from those who combat hate activity the intention of Spaces of Hate is to recognize specific geographic settings likely to foster hate activity Spatial Politics David Featherstone, Joe Painter, 2013-01-22 This critical engagement with Doreen Massey's ground breaking work in geographic theory and its relationship to politics features specially commissioned essays from former students and colleagues as well as the artists political figures and activists whose thinking she has helped to shape It seeks to mark and take forward her compelling contributions to geographical theorizing and political debate High profile contributors include Lawrence Grossberg Chantal Mouffe Jamie Peck and Jane Wills The global reach and significance of Massey's work recommends this volume to a diverse readership Provides an agenda for work on spatial politics and critical geography Sets out the contours of a human geography informed by Doreen Massey's work

Geographers Elizabeth Baigent, André Reyes Novaes, 2019-12-26 Women are the exclusive focus of the 38th volume of Geographers For the first time in the series history the entire volume is devoted to important work of distinguished female geographers amply demonstrating how these scholars professional lives enrich the discipline's history It also illustrates how reading and writing their biographies not only expands our understanding of geography's past but points to its more diverse future The collection includes biographies of Doreen Massey winner of geography's Nobel prize the prix Vautrin Lud for her remarkable contribution to geography and neighbouring disciplines which discovered the importance of space through her work Helen Wallis geographer and historian of cartography who for many years had charge of the UK's foremost collection of maps Alice Saunier Set who applied her geographical training and formidable energy to teaching and educational reform in France Isabel Margarida Andr who lived through a turbulent political period in her native Portugal and meticulously investigated its effect on women and political geography and the many women who helped to create the UK's first Geography department the University of Oxford's School of Geography including Fanny Herbertson Nora MacMunn Marjorie Sweeting

Mary Marshall Barbara Kennedy and other women geographers who are memorialised in a group article **Gender, Identity and Migration in India** Nasreen Chowdhury, Paula Banerjee, 2022-02-10 The book focuses on voices of displaced women who constitute a critical part of the migration process through an unravelling of the engendered displacement It draws attention to the various processes methods and approaches by national and international human rights and humanitarian laws and principles and the experiences of the relevant communities organisations towards peaceful co existence The contributions to this volume embellish the argument that there is a direct correlation between an academic researcher s positionality methods and trajectories of critical knowledge production In particular feminist epistemologies with specific emphasis on post coloniality utilized in conjunction with scholarship related to transnational migration studies constitute a distinctly powerful vantage point for challenging methodological nationalism and the syndrome of seeing like the state in the area of forced migration studies

Making Geography Matter Noel Castree, Trevor Barnes, Jennifer Salmond, 2025-02-28 What is the purpose of Geography What do geographers study and why How do they seek to shape the world they interrogate This book addresses these questions by examining the lives and works of individual geographers both past and present Like all disciplines Geography is no more nor less than the collective endeavours of researchers and teachers operating in specific contexts The contexts both shape and are shaped by these individuals This book s biographical and autobiographical chapters transport readers to the times and places where geographers have sought to make Geography matter The result is a more vivid grounded understanding of the discipline than the many high level surveys of geographic thought paradigms currently written for university students This book s accessible essays each conclude with a study task Making Geography Matter is aimed at university students and their teachers who wish to understand the goals history and evolving practice of Geography It provides an alternative perspective both concrete and engaging to the many student focussed texts that map out numerous isms and ologies

Geographies of Nature Steve Hinchliffe, 2007-10-02 An exemplary introduction to cutting edge work on the geographies of nature Intellectually demanding clearly written and empirically rich this is a book that deserves a wide readership within and beyond the geographical discipline Sarah J Whatmore Oxford University Centre for the Environment *Geographies of Nature* introduces readers to conventional understandings of nature realist environmental constructivist while examining alternative accounts from different disciplines where nature resists easy classification Accessibly written it demonstrates how recent thinking has urgent relevance and impact on the ways in which we approach environmental problems The text Makes concepts like environment conservation and sustainability accessible and applicable with the extensive use of case studies Uses text boxes to introduce readers to debates and ideas Grounds the reader and proceeds to the explanation of more complex arguments progressively *Geographies of Nature* presents a new kind of environmental analysis one that refuses to view nature as wholly separate to the human and nonhuman practices through which it is constantly made and remade
