Losing Our Democratic Spirit Congressional Deliberation And The Dictatorship Of Propaganda:

Losing Our Democratic Spirit Bill Granstaff, 1999-08-30 Granstaff argues that in current partisan politics Congress systematically fails to fulfil its primary constitutional function of specifying the national interest. He begins by showing why full representative deliberation or deliberation in which all representatives can participate is one of three congressional institutions necessary to the maintenance of the country's democratic integrity. He then looks at the framers' writings, the practices of the first Congresses, and democratic theory to suggest a deliberative theory for the American constitutional system. Next, he reviews, criticizes, and supplements the literature on congressional deliberation from the theoretic perspective established earlier. After detailing his methodology, Granstaff applies it to three case studies: the use of American troops in Lebanon, the Persian Gulf, and Somalia. The findings in each case study are consistent with the hypothesis that the discourses of deliberation are phony. He then discusses the implications within the three case studies and for the American constitutional system as a whole. Ultimately, the book shows that when true deliberation is replaced by partisan posturing, various constituencies effectively lose their legitimate voice in national affairs. As a result, special interests usually guide federal policy. Granstaff concludes with a procedural suggestion that might alleviate this problem. This work is a timely critique for researchers and students of political communication, Congress, and democratic theory. [The Oxford Handbook of the American Congress](#) Eric Schickler, Frances E. Lee, 2013-03-14 No legislature in the world has a greater influence over its nation's public affairs than the US Congress. The Congress's centrality in the US system of government has placed research on Congress at the heart of scholarship on American politics. Generations of American government scholars working in a wide range of methodological traditions have focused their analysis on understanding Congress both as a lawmaking and a representative institution. The purpose of this volume is to take stock of this impressive and diverse literature, identifying areas of accomplishment and promising directions for future work. The editors have commissioned 37 chapters by leading scholars in the field; each chapter critically engages the scholarship, focusing on a particular aspect of congressional politics, including the institution's responsiveness to the American public, its procedures and capacities for policymaking, its internal procedures and development, relationships between the branches of government, and the scholarly methodologies for approaching these topics. The Handbook also includes chapters addressing timely questions, including partisan polarization, congressional war powers, and the supermajoritarian procedures of the contemporary Senate. Beyond simply bringing readers up to speed on the current state of research, the volume offers critical assessments of how each literature has progressed or failed to progress in recent decades. The chapters identify the major questions posed by each line of research and assess the degree to which the answers developed in the literature are persuasive. The goal is not simply to tell us where we have been as a field but to set an agenda for research on Congress for the next decade. The Oxford Handbooks of American Politics are a set of reference books offering authoritative and engaging critical overviews of the state of scholarship on American politics.

Each volume focuses on a particular aspect of the field The project is under the General Editorship of George C Edwards III and distinguished specialists in their respective fields edit each volume The Handbooks aim not just to report on the discipline but also to shape it as scholars critically assess the scholarship on a topic and propose directions in which it needs to move The series is an indispensable reference for anyone working in American politics General Editor for The Oxford Handbooks of American Politics George C Edwards III

The Floor in Congressional Life Andrew Taylor, 2012-02-15 The House and the Senate floors are the only legislative forums where all members of the U S Congress participate and each has a vote Andrew J Taylor explores why floor power and floor rights in the House are more restricted than in the Senate and how these restrictions affect the legislative process After tracing the historical development of floor rules Taylor assesses how well they facilitate a democratic legislative process that is how well they facilitate deliberation transparency and widespread participation Taylor not only compares floor proceedings between the Senate and the House in recent decades he also compares recent congressional proceedings with antebellum proceedings This unique systematic analysis reveals that the Senate is generally more democratic than the House a somewhat surprising result given that the House is usually considered the more representative and responsive of the two Taylor concludes with recommendations for practical reforms designed to make floor debates more robust and foster representative democracy

The Idea of Political Marketing
Nicholas O. O'Shaughnessy, Stephan C.M. Henneberg, 2002-06-30 O Shaughnessy Henneberg and their contributors examine how the theory and practice of marketing has been and can be applied to politics Particular attention was paid to the theory of political marketing with conceptual definitions developed to better facilitate communication between marketing professionals and political science researchers Political marketing is about the making and unmaking of governments in a democracy Despite its growing importance the marketing academic profession has shown very little interest in the political ramifications of their discipline while political scientists often come to political marketing with the view that it is cosmetic if not trivial O Shaughnessy Henneberg and their contributors examine how the theory and practice of marketing has been and can be applied to politics As they show elections are a persuasion task writ large most especially with the demise of inherited class loyalties Following elections governments can employ marketing techniques to build support for their actions while opposition parties can press the government and its supporters through similar marketing approaches Of particular interest

When Congress Debates Theodore F. Scheckels, 2000-09-30 Scheckels provides the first book length study of Congressional debating The limited work on the topic in the communication discipline has argued that such debating is tedious and inconsequential Scheckels however offers a new paradigm derived from the work of Mikhail Bakhtin that counteracts this assumption This paradigm also counters the often unvoiced assumption that debates are inherently bipolar with the initial premise that they are instead polyphonic The polyphony however goes beyond the recognition of the multiple speakers who participate and the drama they enact to the

awareness of the voices these speakers introduce within their discourse These voices range from the words of authorities to the narratives of average Americans from classical prosopopoeia to what Bakhtin terms stylization Speakers also sometimes enact what Bakhtin terms double voiced discourse furthermore there are moments of what Bakhtin terms carnivalesque energy Bakhtin's work finally alerts the critic to the illusion of finalizability in Congressional debates After outlining this paradigm Sheckels uses it to examine six Congressional debates ranging in date from a 1960 Senate filibuster on a civil rights matter to the 1999 House debate on articles of impeachment and includes analyses of such flash points as the Confederate flag sexual harassment in the military and partial birth abortion These case studies reveal both the utility and the flexibility of the Bakhtinian perspective Thoughtful analyses that will be of great interest to scholars and researchers involved with rhetoric and political communication

Navigating Boundaries Brenda Marshall, Molly A. Mayhead, 2000-06-30 Marshall Mayhead and their contributors explore the discourse women use to negotiate political boundaries The analysis based on the study of five governors Nellie Tayloe Ross Martha Layne Collins Ann Richards Barbara Roberts and Christine Todd Whitman illustrates that women bring issues of caring empowerment family

and inclusivity to the office These issues contrast sharply with traditional male centered ideologies and give renewed vigor to a revised moral point of view in contemporary politics The essays also demonstrate that women governors must still work within the traditional societal constructs for women Yet at the same time they need to create new paradigms that redefine women s roles and exemplify that woman s place is in the private sphere and the public political arena The work examines the common obstacles these women faced despite differences in era political affiliation geographic location and ideologies Simply by being elected each woman operated within a public private sphere duality she struggled to overcome Each woman recognized that she needed to craft appropriate rhetorical strategies to succeed in office while not abandoning the unique values and perspectives she brought to the statehouse The essays contend that women serving in the governorship resculpt the face of the office restructure the political landscape and redefine women s roles The volume will be of particular value to students and scholars dealing with issues of public address and rhetorical criticism women s communication political communication and women in politics
