Mumford, Tate, Eiseley Gale H. Carrithers, Jr.,1992-01-01 Though of diverse backgrounds and training Mumford Tate and Eiseley shared remarkably concordant and convincing views of the state of twentieth century American society All three considered America to be benighted by a dominant myth the myth of the machine in Mumford s phrase that resulted in cultural degeneration Through an examination of selected works of each critic Carrithers explains how these writers both identified and fought against this myth Carrithers asserts that Mumford Tate and Eiseley in their essays revived prophecy as a mode of expression and as a means of appraising culture in a broad historical context Like the biblical prophets the three concerned themselves not so much with the future as with the present They sought to unmask the falseness the moral emptiness of a reductive abstractive mechanized model of the world Carrithers considers Mumford as he moved from conflicted stances in the four volumes of The Renewal of Life to the more assured and comprehensive vision of society he portrayed in the two volume The Myth of the Machine He examines Tate s critique of American culture as it developed from his youthful involvement with the Fugitives and Agrarians to in later years an increasingly coherent but comber construal of the world s plight Finally he describes Eiseley s fully emergent rejection of reductive scientism and temporalism a large part of all that is crushing us Eiseley wrote evident in The Immense Journeyand other books Mumford Tate and Eiseley these watchers in the night all wrote against the grain of most of their contemporaries posing questions about generally accepted current values and proffering alternatives that would make the world a more humane and transcendent place Gale Carrithers thoughtful challenging analysis of their efforts will be required reading for anyone who wishes a better understanding of our age

Françoise Besson,2018-12-14 In all latitudes writers hold out a mirror leading the reader to awareness by telling real or imaginary stories about people of good will who try to save what can be saved and about animals showing humans the way to follow Such tales argue that in spite of all destructions and tragedies if we are just aware of and connected to the real world around us to the blade of grass at our feet and the star above our heads there is hope in a reconciliation with the Earth This may start with the emergence or rather the return of a nonverbal language restoring the connection between human beings and the nonhuman world through a form of communication beyond verbalization Through a journey in Anglophone literature with examples taken from Aboriginal African American English Canadian and Indian works this book shows the role played by literature in the protection of the planet It argues that literature reveals the fundamental idea that everything is connected and that it is only when most people are aware of this connection that the world will change Exactly as a tree is connected with all the animal life in and around it texts show that nothing should be separated From Shakespeare's theatre to ecopoetics from travel writing to detective novels from children's books to novels all literary genres show that literature responds to the violence destroying lands men and nonhuman creatures whose voices can be heard through texts Barns

of the Midwest Allen G. Noble,Hubert G. H. Wilhelm,2018-09-11 Originally published in 1995 Barns of the Midwest is a masterful example of material cultural history It arrived at a critical moment for the agricultural landscape The 1980s were marked by farm foreclosures rural bank failures the continued rise of industrialized agriculture and severe floods and droughts These waves of disaster hastened the erosion of the idea of a pastoral Heartland knit together with small farms and rural values And it wasn't just an idea that was eroded material artifacts such as the iconic Midwestern barn were also rapidly wearing away It was against this background that editors Noble and Wilhelm gathered noted experts in history and architecture to write on the nature and meaning of Midwestern barns explaining why certain barns were built as they were what types of barns appeared where and what their functions were Featuring a new introduction by Timothy G Anderson Barns of the Midwest is the definitive work on this ubiquitous but little studied architectural symbol of a region and its history **Is the Cross Still There?** George M. the questions that surface during Lent and Easter Does the cross really have anything significant to say about life and death Why is baptism so important in the worship of Lent and Easter What does my baptism into the death and resurrection of Christ really mean Is baptism more than an initiation ceremony into the Christian church How do baptism and communion

affirm the meaning and validity of the cross during Lent In the exploration of these questions Bass hopes to assist pastors and their people to experience a fuller participation in Lent and Easter and the new life all share in Christ The sermons in the book are cast in the context of the question Is the cross still there George M Bass is professor of preaching emeritus Luther Northwestern Theological Seminary Saint Paul Minnesota He occupied the Alvin N Rogness Chair of Pastoral Theology and Ministry Homiletics He has studied at Susquehanna University Lutheran Theological Seminary Philadelphia Pennsylvania Temple University the University of Edinburgh the pontifical Gregorian University in Rome and Cambridge University His CSS books include The Song and the Story Great Stories of the Faith and Lectionary Preaching Workbooks Cycles A B and C

Emerson and Environmental Ethics Susan Dunston, 2018-09-15 At the core of Emerson's philosophy is his view as a naturalist that we are made of the same atoms as the world is In counterpoint to this identity he noted the fluid evolution and diversity of combinations and configurations of those atoms Thus he argued our relation and connection to the world are not occasional or recreational but everywhere and always and also reciprocal ongoing and creative He declared he would be a naturalist which for him meant being a knowledgeable lover of nature Emerson's famous insistence on an original relation to the universe centered on morally creative engagement with the environment It took the form of a nature literacy that has become central to contemporary environmental ethics The essential argument of this book is that Emerson's integrated philosophy of nature ethics and creativity is a powerful prototype for a diverse range of contemporary environmental ethics After describing Emerson's own environmental literacy and ethical aesthetic and creative practices of relating to the natural world Dunston delineates a web of environmental ethics that connects Emerson to contemporary eco feminism living systems theory Native American science Asian philosophy and environmental activism

Rebellion James Brody, 2008-03 tiny differences in the nature of individuals require that each of us discovers, arranges and sustains his or her unique partnerships and territories Because of this uniqueness you must actively steer your life rather than just letting it happen None of us is mere clay for environment's thumbs and even the youngest of ten children is a one off architect who renovates his parents Using clarity humor and personal examples Dr James Brody shows why you simplify or complicate your life form partnerships and social networks and sometimes conform or not He also explains why certain aspects of physics are your best friends why your commonsense handles them so well why women displace men and why you shouldn't believe bell curves To illustrate Brody includes stories from his clients as well as from biologists Charles and Erasmus Darwin authors William and Henry James anthropologists Mary Leakey and Loren Eiseley and Nobel winners Richard Feynman and Rita Levi Montalcini a rich tapestry of human behavior but done in a way that gives significance to individualism using models that physics and mathematics offer Phase transitions emergent networks condensates swarming and other models are in the arsenal that he develops in the first half of the book and applies in its second half to evolution and behavior genetics conflict and suicide and resilience and personal will This is serious work yet it is not difficult to read I highly recommend it Bryen Lorenz Ph D
