Key Topics in Second Language Acquisition Vivian Cook, David Singleton, 2014-04-02 This textbook offers an introductory overview of eight hotly debated topics in second language acquisition research It offers a glimpse of how SLA researchers have tried to answer common questions about second language acquisition rather than being a comprehensive introduction to SLA research Each chapter comprises an introductory discussion of the issues involved and suggestions for further reading and study The reader is asked to consider the issues based on their own experiences thus allowing them to compare their own intuitions and experiences with established research findings and gain an understanding of methodology The topics are treated independently so that they can be read in any order that interests the reader The topics in question are how different languages connect in the mind whether there is a best age for learning a second language the importance of grammar in acquiring and using a second language how the words of a second language are acquired how people learn to write in a second language how attitude and motivation help in learning a second language the usefulness of second language acquisition research for language teaching the goals of language teaching

When in French Lauren Collins, 2017-11-07 A

language barrier is no match for love Lauren Collins discovered this firsthand when in her early thirties she moved to London and fell for a Frenchman named Olivier a surprising turn of events for someone who didn't have a passport until she was in college But what does it mean to love someone in a second language Collins wonders as her relationship with Olivier continues to grow entirely in English Are there things she doesn't understand about Olivier having never spoken to him in his native tongue Does I love you even mean the same thing as je t'aime When the couple newly married relocates to Francophone Geneva Collins fearful of one day becoming a Borat of a mother who doesn't understand her own kids decides to answer her questions for herself by learning French When in French is a laugh out loud funny and surprising memoir about the lengths we go to for love as well as an exploration across culture and history into how we learn languages and what they say about who we are Collins grapples with the complexities of the French language enduring excruciating role playing games with her classmates at a Swiss language school and accidentally telling her mother in law that she's given birth to a coffee machine In learning French Collins must wrestle with the very nature of French identity and society which it turns out is a far cry from life back home in North Carolina Plumbing the mysterious depths of humanity's many forms of language Collins describes with great style and wicked humor the frustrations embarrassments surprises and finally joys of learning and living in French

Pfenninger, Julia Festman, David Singleton, 2023-05-05 Language fundamentally defines and distinguishes us as humans as members of society and as individuals As we go through life our relationship with language and with learning shifts and changes but it remains significant This book is an up to date resource for graduate students and researchers in second language L2 acquisition who are interested in language learning across the lifespan The main goal is to survey and evaluate what is known about the linguistic cognition affect associations that occur in L2 learning from birth through senescence passing through the stages of childhood adolescence adulthood and third age the extent to which L2 acquisition may be seen as contributing to healthy and active aging the impact of the development of personalized technology enhanced communicative L2 environments and how these phenomena are to be approached scientifically and methodologically The effects of certain specific variables such as gender socio economic background and bilingualism are also analyzed as we argue that chronological age does not determine the positioning of L2 learners across the lifespan age is part of a complex web of social distinctions such as psychological and individual factors that intersect in the construction of a learner's relative status and opportunities
