Empathy in Politics and Leadership Claire Yorke, 2025-10-03 A timely account of empathy politics and leadership showing how greater understanding and connection can foster trust community and innovation Empathy has become a cliché of contemporary politics often espoused but rarely understood Yet the capacity to understand other worldviews is neither easy nor comfortable Seeing through others eyes requires strength courage integrity and an ability to reason across the harshest political divides and in a time of heightened marginalization disconnection and polarization empathy in our leaders and across society is vitally important Claire Yorke offers the first account of empathy in politics and leadership drawing on examples from across the world Including model leaders like Nelson Mandela and Jacinda Ardern as well as figures on the right such as Donald Trump who mobilize different forms of empathy Yorke asks what distinguishes empathetic leaders from the rest and examines why empathy is essential for a more human centred politics Demonstrating empathy's radical potential and disputing its connotations of weakness this book shows how we can build a political ecosystem that fosters belonging and engagement and cultivate the necessary dialogue to find common ground

The Priority of Injustice Clive Barnett, 2017-11-01 This original and ambitious work looks anew at a series of intellectual debates about the meaning of democracy Clive Barnett engages with key thinkers in various traditions of democratic theory and demonstrates the importance of a geographical imagination in interpreting contemporary political change Debates about radical democracy

Barnett argues have become trapped around a set of oppositions between deliberative and agonistic theories contrasting thinkers who promote the possibility of rational agreement and those who seek to unmask the role of power or violence or difference in shaping human affairs While these debates are often framed in terms of consensus versus contestation Barnett unpacks the assumptions about space and time that underlie different understandings of the sources of political conflict and shows how these differences reflect deeper philosophical commitments to theories of creative action or revived ontologies of the political Rather than developing ideal theories of democracy or models of proper politics he argues that attention should turn toward the practices of claims making through which political movements express experiences of injustice and make demands for recognition redress and repair By rethinking the spatial grammar of discussions of public space democratic inclusion and globalization Barnett develops a conceptual framework for analyzing the crucial roles played by geographical processes in generating and processing contentious politics
