**Customisation and Personalisation in Architecture and Construction** Poorang Piroozfar, Frank Piller, 2013-06-19. Challenged by the recent economic crisis, the building and construction industry is currently seeking new orientation and strategies. Here, mass customisation is uncovered as a key strategy in helping to meet this challenge. The term mass customisation denotes an offering that meets the demands of each individual customer whilst still being produced with mass production efficiency. Today, mass customisation is emerging from a pilot stage into a scalable and sustainable strategy. The first dedicated publication of its kind, this book provides a forum for the concept within an applied and highly innovative context. The book includes contributions from some of the most prominent thinkers and practitioners in the field from across the world, including Kasper S. Vibaek, Steve Kendall, Martin Bechthold, Mitchell M. Tseng and Masa Noguchi. Bringing together this panel of experts who have carried out research both in academia and practice, this book provides an overview of the state of the art practice related to the concept of customisation and personalisation within the built environment. *Engineering for Coastal Ecosystems* Ghanshyam Bandopadhyay, 2025-01-23. Engineering for Coastal Ecosystems provides an in-depth exploration of the principles, challenges and applications of coastal engineering, a specialized branch of civil engineering focused on construction, development and management of coastal zones. This book delves into critical areas such as coastal geochemistry, integrated coastal zone management and infrastructure design, emphasizing sustainability, professional ethics and conflict resolution in the face of environmental challenges. Readers will learn about the dynamics of coastal systems including waves, tides, storm surges and sea level changes and their implications for erosion control, port maintenance and harbor construction. Combining elements of civil engineering with oceanography and geology, this book also covers wind, temperature and environmental considerations essential to coastal engineering. Additionally, it offers a comprehensive overview of regional laws and policies relevant to coastal development and conservation. This is an invaluable resource for students, professionals and anyone interested in preserving and managing coastal ecosystems sustainably. **Research Anthology on Artificial Intelligence Applications in Security** Management Association, Information
