Agricultural Water Management A. L. Van Wijk, Wesseling J., 2020-08-27 This book is an outcome of the symposium on agricultural water management in Netherlands and discusses the methods that lead to cost effective but environmentally acceptable techniques. The book covers following topics: drainage and reclamation of soil and effect of drainage on agriculture.

Flowing Water Fish Culture Richard W. Soderberg, 1994-11-22 *Flowing Water Fish Culture* provides an in depth discussion of the husbandry of fin fish in a stream of water. It guides the reader through the technical considerations of intensive aquaculture including fish growth rates, hydraulic characteristics of fish rearing units, oxygen consumption rates in relation to oxygen solubility and fish tolerance of hypoxia and water reconditioning by reaeration and ammonia filtration. Unlike other publications that provide only general overviews on the subject, this text/reference offers specific details that will be useful in the actual design and operation of a facility. Problem sets at the end of each chapter provide ample opportunity to develop skills. The information in the book is valuable for those teaching/considering or practicing aquaculture at intensity levels ranging from conventional single pass trout hatcheries to closed aquaculture systems.

Water, Rivers, and Creeks Luna Bergere Leopold, 1997 By integrating the basics of hydrology and geomorphology with the practical formulation of policy, this book is intended for the general public, students of environmental studies, legislators, policy makers, and all others who are interested in the use, control, and management of water. Longing for Running Water Ivone Gebara, 1999-09-01 Gebara's succinct yet moving statement of her principles of ecofeminism shows how intertwined are the tarnished environment around her and the poverty that afflicts her neighbors. From her experiences with the Brazilian poor women's movement, she develops a gritty urban ecofeminism and indeed articulates a whole worldview. She shows how the connections between Western thought, patriarchal Christianity, and environmental destruction necessitate personal conversion to a new relationship with the earth and with the entire cosmos.

Concrete Structures R. Dodge Woodson, 2009-06-22 The success of a repair or rehabilitation project depends on the specific plans designed for it. *Concrete Structures: Protection, Repair, and Rehabilitation* provides guidance on evaluating the condition of the concrete in a structure, relating the condition of the concrete to the underlying cause or causes of that condition, selecting an appropriate repair material and method for any deficiency found, and using the selected materials and methods to repair or rehabilitate the structure. Guidance is also provided for engineers focused on maintaining concrete and preparing concrete investigation reports for repair and rehabilitation projects. Considerations for certain specialized types of rehabilitation projects are also given. In addition, the author translates cryptic codes, theories, specifications, and details into easy-to-understand language. Tip boxes are used to highlight key elements of the text as well as code considerations based on

the International Code Council or International Building Codes The book contains various worked out examples and equations Case Studies will be included along with diagrams and schematics to provide visuals to the book Deals primarily with evaluation and repair of concrete structures Provides the reader with a Step by Step method for evaluation and repair of Structures Covers all types of Concrete structures ranging from bridges to sidewalks Handy tables outlining the properties of certain types of concrete and their uses **Technical and Economic Problems of Channel Icing**, 2004 *Introduction*
