Musicians from a Different Shore Mari Yoshihara, 2008-05-02 Musicians of Asian descent enjoy unprecedented prominence in concert halls conservatories and classical music performance competitions In the first book on the subject Mari Yoshihara looks into the reasons for this phenomenon starting with her own experience of learning to play piano in Japan at the age of three Yoshihara shows how a confluence of culture politics and commerce after the war made classical music a staple in middle class households established Yamaha as the world's largest producer of pianos and gave the Suzuki method of music training an international clientele Soon talented musicians from Japan China and South Korea were flocking to the United States to study and establish careers and Asian American families were enrolling toddlers in music classes Against this historical backdrop Yoshihara interviews Asian and Asian American musicians such as Cho Liang Lin Margaret Leng Tan Kent Nagano who have taken various routes into classical music careers They offer their views about the connections of race and culture and discuss whether the music is really as universal as many claim it to be Their personal histories and Yoshihara's observations present a snapshot of today's dynamic and revived classical music scene

Hebert, 2011-10-20 This well researched volume tells the story of music education in Japan and of the wind band contest organized by the All Japan Band Association Identified here for the first time as the world's largest musical competition it attracts 14 000 bands and well over 500 000 competitors The book's insightful contribution to our understanding of both music and education chronicles music learning in Japanese schools and communities It examines the contest from a range of perspectives including those of policy makers adjudicators conductors and young musicians The book is an illuminating window on the world of Japanese wind bands a unique hybrid tradition that combines contemporary western idioms with traditional Japanese influences In addition to its social history of Japanese school music programs it shows how participation in Japanese school bands contributes to students sense of identity and sheds new light on the process of learning to play European orchestral instruments **Employment and Vulnerabilities in the World of Orchestral Musicians:**

Symphonic Metamorphoses Heather Kurzbauer, 2023-10-25 The state subsidies and philanthropy that traditionally allowed orchestras to flourish have greatly diminished in the wake of recent financial crises and the COVID 19 pandemic As in other fields affected by the precarious labor arrangements prevalent in the world of work today it is the employees and freelancers in this case the musicians themselves who suffer most In this deeply knowledgeable and provocative book a highly acclaimed scholar who combines the roles of law professor music journalist and orchestral violinist presents the first major legal study to focus on labor relations and the institutional dynamics at play within orchestras Drawing on personal interviews with more than 250 orchestral musicians and other stakeholders whose testimonies and actions often stand in contradiction to narratives provided by cultural economists and government cultural policymakers the author uncovers the deteriorating welfare of musicians in two countries the United States and the Netherlands in which she has considerable practical orchestral experience The methodology will reverberate with great intensity to musicians worldwide with its novel system of movements that focus on different vulnerabilities besetting orchestral players to highlight such issues and topics as orchestra financing with a special focus on the nonprofit sector and the changing nature of state subsidies in Europe the impact of the perception of orchestras as elitist and of limited social value discriminatory practices in auditions and hiring legal and practical relevance of contemporary questions of employee categorization regularly employed self employed false self employed and how fair practice codes and collective bargaining agreements can be designed implemented and enforced An interdisciplinary approach to a multiplicity of vulnerabilities in the sector the study incorporates economic historical and legal research along with a consideration of sociological factors Case studies from the EU Court of Justice the Dutch Supreme Court the Supreme Court of the United States and the U S National Labor Relations Board offer practical insight into specific legal issues including the fundamental question of how musician employees are differentiated from freelancers

Reflecting on the cutbacks and compromises that traumatize orchestral negotiations in today's musical world the book not only provides orchestral musicians with a wealth of useful information and suggestions for future action but also adds to the growing body of legal literature on the self-limitations of labor law and the increasing vulnerability of workers. Practitioners in labor and employment law as well as academics in the field will benefit from a powerful analysis of workers' vulnerabilities in today's labor market.

The Quest for Meaning, 2009-01-01 The Quest for Meaning: Teaching, Learning, and the Arts presents a narrative arts-based approach to pedagogy and research in higher education. Through narratives of experience the book offers revealing, poignant examples of the transformative power of the arts and of narrative inquiry in learners' lives and of the centrality of story in their ongoing quest for meaning. The Quest for Meaning will be valuable in a wide range of graduate and undergraduate settings. It provides a framework for the development of new pedagogies which integrate the theory and practice of narrative arts-based approaches to education. The work makes a contribution to the fields of narrative and arts-based inquiry and pedagogy, qualitative research methods, holistic and integrated studies, and self-directed inquiry. It will appeal to a range of audiences who are interested in this creative integrative approach to education and who want to gain insights into how students learn from their own unique perspectives. Grounded in Dr. Beattie's interconnected approach to research and pedagogy, the book begins with her own story of teaching, learning, research, and the arts. This provides the backdrop to an account of a collaborative pedagogy designed to enable students to conduct in-depth narrative inquiries into their lives and to learn how to do narrative arts-based research with others. The author provides insights into the practices and processes of solitary and collaborative inquiry and the interaction and integration that take place within the three kinds of dialogue she proposes: the dialogue with the self, the dialogue with others, and the dialogue between the dialogues. The book's other twelve narratives show from learners' unique perspectives how the creation and re-creation of their ways of knowing and being is a distinctively individual process involving all aspects of their humanity. Individually, these narratives provide valuable glimpses into the challenges, the joys, the frustrations, and the emotionality and the important personal satisfactions involved in the processes of learning, unlearning, and re-learning. In their own voices, these learners tell of the diverse ways in which they became more responsive to their own inner lives, to the perspectives and understandings of others, and to the creation of more meaningful narratives for their current and future lives. Collectively, the narratives highlight the importance of recognizing personal experience in settings of higher education. They also present compelling evidence for acknowledging the significance of inquiry, creativity, imagination, dialogue, interaction, and integration in enabling learners to bring the whole of their being to the learning process, to the exploration of the stories by which they live, and to the creation of new narratives for their future lives.
