Through the use of poetry and prose I hope to express the love affection tenderness and devotion which I first found with my family in our big log house far back in the woods I want to show how the urge to write about my life has followed me along mountain trails down city streets and within my own special friendships and romantic adventures All those events do not hold a candle to the importance of raising my beautiful children or to the myriad of the ongoing splendid experiences with my grandchildren and great grandchildren Happy reading There's Something I Want You to Do Charles Baxter,2015-02-03

There's something I want you to do This request sometimes simple sometimes not forms the basis for the ten interrelated short stories that comprise this latest penetrating and prophetic collection from the winner of the PEN Malamud Award and one of our most gifted writers Chicago Tribune As we follow a diverse group of Minnesota citizens each grappling with their own heightened fears responsibilities and obsessions Baxter unveils the remarkable in what might otherwise be the seemingly inconsequential moments of everyday life The Future Designer Michael Leube,2024-06-19

During periods of environmental and societal upheaval design has the potential to be a formidable catalyst towards a sustainable future However to unleash its full power significant shifts in both theory and practice are imperative This book adopts a unique approach blending anthropological perspectives with philosophy and cognitive science and advocates for a thorough transformation of the existing design curriculum Supported by a vast body of literature in evolutionary science and design research the book presents a blueprint for fostering more sustainable patterns of production and consumption This blueprint is grounded in human virtues rather than vices and proposes a new curriculum tailored towards pro sociality and sustainability Leveraging his extensive professional background and expertise in the circular economy Michael Leube offers practical examples methods and tools for implementing sustainable approaches in the practical work of experienced designers Showcasing cutting edge innovations for pro social and humanitarian design the book ultimately argues that if we change the objective of design from creating desire to creating value we can solve many of the most pressing social problems from the cooperation of citizens to sustainable cities The book will be useful for those studying and teaching design and anthropology and it will also be an important tool for practicing designers and engineers interested in learning how to design for social and ecological awareness **Stuck On Me** Hilary Freeman,2011-12-22
