Loevner,2012-08-28 This issue reviews the state of the art of head and neck imaging with clear reviews of the role of MRI in the diagnosis and treatment of some of the most common head and neck conditions Articles discuss imaging of head and neck tumors head and neck reconstruction for cancer treatment oral cavity carcinoma and imaging of the TMJ Reviews cover patterns of perineural spread MRI applications in temporal bone pathology MRI of brachial plexus and imaging of the pediatric neck Orbital pathology and optic pathways are covered as well as paranasal sinuses and sella and parasellar regions **MRI of the Brain, Head, Neck and Spine** Jaap Valk,2012-12-06 With the growing number of MR installations clinicians and radiologist are being confronted more and more with visual information they do not feel as confident with as with the more mono form information of conventional radiographs CT and US The freedom of parameter choice of the MR operator allows the same object to be depicted in various ways and the contrast in the images to be changed and inverted at will For those not experienced in interpreting MR images this may cause confusion and uncertainty about their diagnostic content This will sometimes lead to an unnecessary retreat to other diagnostic modalities The purpose of this book is to help close the gap between MR operators and readers and clinicians A variety of cases is presented together with the MRI considerations In nearly all these cases confirmation of diagnosis was obtained by histological examination Quite deliberately this book only includes the occasional CT scan or angiography for comparison to avoid the temptation of falling back on other modalities and of escaping from the often more difficult to

interpret but in the end more rewarding MR images All the MR images in this book were made with a first generation unsophisticated Teslacon I 0 6 T superconducting magnet system Hopefully they will reflect the quality of the machine Some people will agree with me that it is sad that investments in expensive health care systems are subject to the whims of those who are mainly interested in satisfying their stockholders
