**Culture and Equality** Brian Barry, 2013-05-02 All major western countries today contain groups that differ in their religious beliefs customary practices or ideas about the right way in which to live How should public policy respond to this diversity In this important new work Brian Barry challenges the currently orthodox answer and develops a powerful restatement of an egalitarian liberalism for the twenty first century Until recently it was assumed without much question that cultural diversity could best be accommodated by leaving cultural minorities free to associate in pursuit of their distinctive ends within the limits imposed by a common framework of laws This solution is rejected by an influential school of political theorists among whom some of the best known are William Galston Will Kymlicka Bhikhu Parekh Charles Taylor and Iris Marion Young According to them this difference blind conception of liberal equality fails to deliver either liberty or equal treatment In its place they propose that the state should recognize group identities by granting groups exemptions from certain laws publicly affirming their value and by providing them with special privileges or subsidies In *Culture and Equality* Barry offers an incisive critique of these arguments and suggests that theorists of multiculturalism tend to misdiagnose the problems of minority groups Often these are not rooted in culture and multiculturalist policies may actually stand in the way of universalistic measures that would be genuinely beneficial

for a variety of reasons while others are forgotten or even hidden This volume thus provides examples from across a spectrum Some phenomena are well suited to heritagisation such as animals memorialised for their bravery long past agricultural techniques and implements and impressive landscapes However this book also deals with products e g tobacco historical periods e g the Third Reich and scientific techniques e g genetic modification with negative connotations that extend beyond their heritage attributes This volume considers how the actors in the heritage industry admit valorise prioritise and rationalise historic resources as heritage products These findings provide practical examples of how heritage institutions privilege frame and or exclude a wide range of heritage items They also contrast the invocations of sectional local national or class based and more cosmopolitan heritages and consider the extent to which innovation and change are or can be acknowledged within the heritage discourse
