The Social Context of Technology Leo Webley,Sophia Adams,Joanna Bruck,2020-06-30 The Social Context of Technology explores non ferrous metalworking in Britain and Ireland during the Bronze and Iron Ages c 2500 BC to 1st century AD Bronze working dominates the evidence though the crafting of other non ferrous metals including gold silver tin and lead is also considered Metalwork has long played a central role in accounts of European later prehistory Metals were important for making functional tools and elaborate decorated objects that were symbols of prestige Metalwork could be treated in special or ritualised ways by being accumulated in large hoards or placed in rivers or bogs But who made these objects Prehistoric smiths have been portrayed by some as prosaic technicians and by others as mystical figures akin to magicians They have been seen both as independent travelling entrepreneurs and as the dependents of elite patrons Hitherto these competing models have not been tested through a comprehensive assessment of the archaeological evidence for metalworking This volume fills that gap with analysis focused on metalworking tools and waste such as crucibles moulds casting debris and smithing implements The find contexts of these objects are examined both to identify places where metalworking occurred and to investigate the cultural practices behind the deposition of metalworking debris The key questions are what was the social context of this craft and what was its ideological significance How did this vary regionally and change over time As well as elucidating a key aspect of later prehistoric life in Britain and Ireland this important examination by leading scholars contributes to broader debates on material culture and the social role of craft

Experiments in Egyptian Archaeology Denys A. Stocks,2022-07-26 In this new edition of Experiments in Egyptian Archaeology Denys A Stocks introduces further experimental research on stoneworking in Ancient Egypt through archaeological and pictorial evidence A further 20 years of research has been added to the original publication and the book now includes the results of experiments that test and evaluate over 250 reconstructed and replica tools bringing alive the methods and practices of Ancient Egyptian craftworking This practical approach to understanding the fundamentals of Ancient Egyptian stoneworking highlights the evolution of tools and techniques and how these come together to produce the wonders of Egyptian art and architecture A new chapter on Predynastic industrial transitions and convergence explores how the surge in technology particularly in the expanding production of stone vessels and in the production of faience artifacts drove the expansion of the economy of the Late Predynastic period in Egypt Introducing the results of new research to enrich our understanding of the fundamental development of stoneworking and other supporting technologies in Ancient Egypt this
