Notes on Trees and Shrubs in Arid and Semi-arid Regions Michel Baumer, Food and Agriculture Organization of the United Nations, 1983 Non-timber Uses of Selected Arid Zone Trees and Shrubs in Africa Frances E. M. Booth, G. E. Wickens, 1988-01-01 **Notes on Trees and Shrubs in Arid and Semi-arid Regions** Michel Baumer, Food and Agriculture Organization of the United Nations, 1983 *Ecophysiology of Economic Plants in Arid and Semi-Arid Lands* Gerald E. Wickens, 2013-04-17 This book deals with arid and semi arid environments and their classification and the physiological restraints and adaptations of plants to the environment Further it discusses economic botany and the needs and methods of conserving economic plants A broad view is taken regarding the definition of economic plants taking into account their value to the environment as well as to man and to livestock The individual deserts and associated semi arid regions are described in separate chapters providing background information on the regional environments in terms of climate and major plant formations The economic plants within these formations their usages geographical distribution together with their morphological and physiological adaptations are treated in detail Forestry Technologies - A Complete Value Chain Approach K. T. Parthiban, R. Seenivasan, 2017-01-01 The book on Forestry Technologies A Complete Value Chain Approach has been designed to cater to the needs of the stakeholders by judiciously incorporating the recent technologies and research outputs available in various sectors of institutions The book has four major themes viz basic and strategic technology production technology processing and value addition technology and consumption technology The basic and strategic technology incorporated seven chapters which include basic information and the recent scientific applications such as nano technology and urban forestry technology The production technology incorporated 16 chapters that includes all the recent developments such as mini clonal technology high yielding short rotation variety land development and precision silvicultural technology and multifunctional agroforestry Processing and value addition technology incorporated 11 chapters and the consumption technology incorporated five chapters which include the recent developments in processing value addition and the associated supply chain process In a holistic perspective the current book will serve as a readymade reference material to the practicing foresters scientific professionals wood based industries policy makers forestry students financial and other academic and research institutions **Handbook of Climate Change Across the Food Supply Chain** Walter Leal Filho, Ilija Djekic, Sergiy Smetana, Marina Kovaleva, 2022-04-22 This book presents climate change as a global phenomenon which affects the entire food chain Many studies analyzing environmental impacts of food systems confirm significant effects of food production on climate change Most of them associate primary production with emission of greenhouse gasses identified as one of the causes resulting in warming the atmosphere and global climate effects A wider perspective shows that the food chains start at farms with consumers being at the end of the pipeline This approach emphasizes the role of the entire food chain highlighting different kinds of environmental impacts affecting climate change On the other side

temperature changes and variations of precipitation patterns together with extreme weather events and water reduction are recognized as predictors for producing less food decreased food quality new food safety risks biodiversity losses and depletion of resources associated with food production in modified circumstances Last but not least these effects introduce new threats known as food security where some assumptions stress that almost one billion of people are hungry not receiving enough food as a result of climate changes As a result the UN highlights the need for combating climate change and promotes sustainable food consumption and production Based on the perceived need to promote and disseminate information on climate change related to food system the Handbook of Climate change across the food supply chain is being produced The publication compiles information experiences practical initiatives and projects around the subject matter and makes it available to a wide audience It is expected that the Handbook of Climate change across the food supply chain makes many benefits of climate service clearer and inter alia leads to an increase in the demand for such important services

Plants for Arid Lands G.E. Wickens, David. V. Field, Joe R. Goodin, 2012-12-06 Economic plants have been defined by SEPASAT as those plants that are utilised either directly or indirectly for the benefit of Man Indirect usage includes the needs of Man's livestock and the maintenance of the environment the benefits may be domestic commercial or aesthetic Economic plants constitute a large and so far uncalculated percentage of the quarter of a million higher plants in the World today However it has been calculated that 10% 25 000 of these species are now on the verge of extinction and extinction means that a genetic resource that could be of benefit to Man will be lost for ever Furthermore for every species lost an estimated 10 30 other dependent organisms are also doomed Fewer than 1 per cent of the World's plants have been sufficiently well studied for a true evaluation of the potential floral wealth awaiting discovery not only in the rain forests which man is now actively destroying at a rate of 20 ha a minute but also in the very much neglected dry areas of the World

Tree Biology and Biotechnology Rajwant K. Kalia, Rakesh Pathak, 2025-01-22 This edited book aims to bring out a comprehensive collection of information on tree biology breeding improvement genetics and biotechnology The focus of this book is to address the status of tree biology research through biotechnological physiological pathological and entomological aspects Trees are dominant and perennial species found in several ecosystems They are the only piece of infrastructure that gains value over time Their economic relevance is well known in terms of the production of food feed fodder fuel timber and other products Trees are

well known habitats for different organisms They also deliver various ecosystem services including temperature regulation mitigation of soil erosion and managing and filtering rainwater Tree species are versatile and are capable of providing livelihood security to people besides several other advantages In the era of high population growth and increasing pressure on agricultural systems efficient management of tree resources is the need of the time Therefore it is essential to understand tree biology breeding and improvement This book comprises information on various aspects of tree breeding biology genetics and research in the improvement of tree species Applications of tissue culture biotechnological approaches tree health management insect pest management and nutrient recycling have been covered in the book along with some chapters on case studies from Rajasthan and Africa This book is a useful read for agricultural students researchers teachers and professionals interested in the fields of agroforestry horticulture silviculture and tree improvement Economic Botany G.E. Wickens, 2012-12-06 The strength of this book is that it is written by someone who has spent a lifetime devoted to the science of economic botany The author has brought together his vast experience in the field in Africa with his studies of arid land plants at the Royal Botanic Gardens Kew The result is an informative and reliable text that covers a vast range of topics It is also firmly based upon the author's research and interest in plant taxonomy and therefore fully acknowledges the importance of correct naming and classification in the field of science of economic botany The coverage is of economic botany in its broadest sense I was delighted to find such topics as ecophysiology plant breeding the environment and conservation are included in the text This gives the book a much more comprehensive coverage than most other texts on the subject I was also glad to see that the book covers the use of various organisms that are no longer considered part of the plant kingdom such as various species of fungi and algae It is indeed a broad ranging book that will be of use to many people interested in the uses of plants and fungi Economic botany is once again being given more prominence as a discipline because of its enormous relevance to both conservation and sustainable development Those people involved in those topics should find this a most useful resource **Systematic Pomology (Vol. 1-2) (Set)** O.P. Pareek, Suneel Sharma, 2017-01-01 The book is aimed to be a treatise on the Systematic Pomology the primary component of science of fruits dealing with identification nomenclature and classification of fruit species based on the descriptions of characteristics related to their morphological genetical physiological biochemical biotechnological and eco attributes Besides taxonomic narrative of each species under the respective orders and genera considerable emphasis has been laid on cultivars The treatment is based on the latest version of Nomenclature and Phylogenetic System of Classification APG III The book is richly illustrated with diagrams and colour plates and carries fairly exhaustive bibliography and glossary Thus the book is of high academic value for research workers teachers students and anyone interested in advanced fruit culture to provide insight in identifying and classifying fruit plants providing standard nomenclature and terminology in avoiding the confusion from synonymy and promoting correct labeling to understand their genetic relations in establishing or maintaining a garden a germplasm bank a research orchard or even

herbaria in identification of new genotypes or cultivars for introduction and in deciding orchard management practices as well as methods of utilization in using the correct related cultivars kept in a genetic resources repository for improvement considering the limits of hybridization and in selecting genetic material for a breeding programme considering their taxonomic proximities and specific characters related to fruit bearing regularity nutritive and edible quality resistance to biotic and abiotic stresses and plant stature and form *The Baobabs: Pachycauls of Africa, Madagascar and Australia* G.E. Wickens, 2008-03-02 This is the only comprehensive account of all eight species in the genus *Adansonia* It describes the historical background from the late Roman period to the present It covers the extraordinary variety of economic uses of baobabs There are also appendices on vernacular names gazetteer economics nutrition and forest mensuration This book fills a gap in the botanical literature It deals with a genus that has fascinated and intrigued scientists and lay persons for centuries *Role of Acacia Species in the Rural Economy of Dry Africa and the Near East* G. E. Wickens, 1995-01-01
