Hummel's monumental treatise of 1828 Practicing Perfection Roger Chaffin, Gabriela Imreh, Mary Crawford, 2005-04-11

The memory feats of famous musicians seem almost superhuman. Can such extraordinary accomplishments be explained by the same principles that account for more ordinary everyday memory abilities? To find out, a concert pianist videotaped her practice as she learned a new piece for performance, the third movement Presto of the Italian Concerto by J. S. Bach. The story of how the pianist went about learning, memorizing, and polishing the piece is told from the viewpoints of the pianist, the second author, and of a cognitive psychologist, the first author, observing the practice. The counterpoint between these insider and outsider perspectives is framed by the observations of a social psychologist, the third author, about how the two viewpoints were reconciled. The CD that accompanies the book provides for yet another perspective, allowing the reader to hear the polished performance. Written for both psychologists and musicians, the book provides the first detailed description of how an experienced pianist organizes her practice, identifying stages of the learning process, characteristics of expert practice, and practice strategies. The main focus, however, is on memorization. An analysis of what prominent pianists of the past century have said about memorization reveals considerable disagreement and confusion. Using previous work on expert memory as a starting point, the authors show how principles of memory developed by cognitive psychologists apply to musical performance and uncover the intimate connection between memorization and interpretation. **Music and Sonic Art** John Dack, Mine Doğanatan-Dack, 2019-01-10

This volume brings together practitioners and theorists of music and sonic art. Contributions explore a wide range of historical, artistic, pedagogical, and critical issues from multiple perspectives, emphasizing the continuities and links along a broad spectrum of hearing and listening practices and art making that use sound. **Artistic Practice as Research in Music: Theory, Criticism, Practice** Mine Dogantan-Dack, 2016-03-03

Artistic Practice as Research in Music: Theory, Criticism, Practice brings together internationally renowned scholars and practitioners to explore the cultural, institutional, theoretical, methodological, epistemological, ethical, and practical aspects and implications of the rapidly evolving area of artistic research in music. Through various theoretical positions and case studies, and by establishing robust connections between theoretical debates and concrete examples of artistic research projects, the authors discuss the conditions under which artistic practice becomes a research activity, how practice-led research is understood in conservatoire settings, issues of assessment in relation to musical performance, as research methodological possibilities open to music practitioners entering academic environments, as researchers, the role of technology in processes of musical composition as research, the role and value of performer knowledge in music analytical enquiry, issues in relation to live performance as a research method, artistic collaboration and improvisation as research tools, interdisciplinary concerns of the artist-researcher, and the relationship between the affordances of a musical instrument and artistic research in musical performance. Readers will come away from the book with fresh insights about the theoretical, critical, and practical work being done by experts in this exciting new field of enquiry.
