Stewart,2024-05-31 Arming the World tells the story of the American small arms industry from the early 1800 s through the
post Civil War era Almost from the beginning the United States produced arms in new and radically different ways relying
upon machinery to mass produce guns when others still made them by hand Leveraging their technological advantage
American gun makers produced guns with interchangeable parts and perfected new types of small arms ranging from
revolvers to repeating rifles The federal government s staggering purchases of arms during the Civil War stimulated the
development of fast firing breech loading rifles and metal cased ammunition When in 1865 it became clear that every country
in the world had re equip itself with modern weapons the Americans had an overwhelming head start Salesmen from
Remington Winchester Colt and Smith Wesson and from lesser known firms too traveled the world marketing their guns
dominating or perhaps even inventing the international arms business American gun makers sold rifles and side arms by the
millions and cartridges by the billions to great powers restive colonies and fading empires alike Adding a new element to the
unstable global balance of power American gun makers affected the course of history *United States Code: Title 50, War
