Curran, Richard A. McCormick, SJ, 1999 Sketches the development of fundamental moral theology in the U S and then uses original sources to document the significant changes that have occurred in the discipline as well as the primary issues in Catholic moral theology today A History of Catholic Moral Theology in the Twentieth Century James F. Keenan, 2010-01-17 This is an historical survey of 20th Century Roman Catholic Theological Ethics also known as moral theology The thesis is that only through historical investigation can we really understand how the most conservative and negative field in Catholic theology at the beginning of the 20th could become by the end of the 20th century the most innovative one The 20th century begins with moral manuals being translated into the vernacular After examining the manuals of Thomas Slater and Henry Davis Keenan then turns to three works and a crowning synthesis of innovation all developed before during and soon after the Second World War The first by Odon Lottin asks whether moral theology is adequately historical Fritz Tillmann asks whether it s adequately biblical and Gerard Gilman whether it s adequately spiritual Bernard Haering integrates these contributions into his Law of Christ Of course people like Gerald Kelly and John Ford in the US are like a few moralists elsewhere classical gate keepers censoring innovation But with Humanae vitae and successive encyclicals bishops and popes reject the direction of moral theologians At the same time moral theologians like Josef Fuchs ask whether the locus of moral truth is in continuous universal teachings of the magisterium or in the moral judgment of the informed conscience In their move toward a deeper appreciation of their field as forming consciences they turn more deeply to local experience where they continue their work of innovation Each continent subsequently gives rise to their own respondents In Europe they speak of autonomy and personalism in Latin America liberation theology in North America Feminism and Black Catholic theology and in Asia and Africa a deep post colonial interculturism At the end I assert that in its nature theological ethics is historical and innovative seeking moral truth for the conscience by looking to speak crossculturally Catholic Moral Theology and Social Ethics

Curran, 2008-04-11 In this magisterial volume Charles E Curran surveys the historical development of Catholic moral theology in the United States from its 19th century roots to the present day He begins by tracing the development of pre Vatican II moral theology that with the exception of social ethics had the limited purpose of training future confessors to know what actions are sinful and the degree of sinfulness Curran then explores and illuminates the post Vatican II era with chapters on the effect of the Council on the scope and substance of moral theology the impact of Humanae vitae Pope Paul VI s encyclical condemning artificial contraception fundamental moral theology sexuality and marriage bioethics and social ethics Curran s perspective is unique For nearly 50 years he has been a major influence on the development of the field and has witnessed first hand the dramatic increase in the number and diversity of moral theologians in the academy and the Church No one is more qualified to write this first and only comprehensive history of Catholic moral theology in the United

States **Killing and Saving** John P. Reeder, 2010-11-01 This impressive work is fair balanced critical and insightful Choice Contrary to the views of Alasdair MacIntyre and others who assert that modern Western morality is in disarray torn by incommensurable moral views John Reeder believes that there is much agreement about taking and saving lives Many people might in fact agree on the various circumstances in which the death of a person constitutes a violation of the right to life or that people have a right to our help especially a right to life saving aid In Killing and Saving Reeder analyzes five sorts of situations in which we are morally permitted or even obligated to take human life e g when we repel an attacker who voluntarily forfeits the right to life when we are confronted with involuntary pursuit or material aggression when someone yields the right to life when all will die if nothing is done but some can be saved if others are killed and when there is a double effect in which we take life as a foreseen but unintended consequence of attempt to achieve a greater good Reeder argues that these and closely related categories account for many of our convictions ranging from abortion to infanticide to starvation to war He also examines the concept of absolute or exceptionless right to life Reeder draws on a number of moral views from theological ethics to Enlightenment notions of natural rights or respect for rational creatures He does not attempt to argue for a foundation for the right not to be killed and the right to be saved Rather he focuses on the content of the convictions themselves and argues that where disagreements remain such as the case of abortion they can be accounted for by the way the rights in question are explained and justified **Feminist Ethics and Natural Law** Cristina L. H.

Traina, 1999-04-28 Heated debates over such issues as abortion contraception ordination and Church hierarchy suggest that feminist and natural law ethics are diametrically opposed Cristina L H Traina now reexamines both Roman Catholic natural law tradition and Anglo American feminist ethics and reconciles the two positions by showing how some of their aims and assumptions complement one another After carefully scrutinizing Aquinas's moral theology she analyzes trends in both contemporary feminist ethics theological as well as secular and twentieth century Roman Catholic moral theology Although feminist ethics reject many of the methods and conclusions of the scholastic and revisionist natural law schools Traina shows that a truly Thomistic natural law ethic nonetheless provides a much needed holistic foundation for contemporary feminist ethics On the other hand she offers new perspectives on the writings of Josef Fuchs Richard McCormick and Gustavo Gutierrez arguing that their failure to catch the full spirit of Thomas's moral vision is due to inadequate attention to feminist critical methods This highly original book proposes an innovative union of two supposedly antagonistic schools of thought a new feminist natural law that would yield more comprehensive moral analysis than either existing tradition alone This is a provocative book not only for students of moral theology but also for feminists who may object to the very notion of natural law ethics suggesting how each might find insight in an unlikely place **The Origins of War** Matthew A.

Shadle, 2011-03-10 Debate rages within the Catholic Church about the ethics of war and peace but the simple question of why wars begin is too often neglected Catholics assumptions about the causes of conflict are almost always drawn

uncritically from international relations theory a field dominated by liberalism realism and Marxism which is not always consistent with Catholic theology In *The Origins of War* Matthew A Shadle examines several sources to better understand why war happens His retrieval of biblical literature and the teachings of figures from church tradition sets the course for the book Shadle then explores the growing awareness of historical consciousness within the Catholic tradition the way beliefs and actions are shaped by time place and culture He examines the work of contemporary Catholic thinkers like Pope John Paul II Jacques Maritain John Courtney Murray Dorothy Day Brian Hehir and George Weigel In the constructive part of the book Shadle analyzes the movement within international relations theory known as constructivism which proposes that war is largely governed by a set of socially constructed and cultural influences Constructivism Shadle claims presents a way of interpreting international politics that is highly amenable to a Catholic worldview and can provide a new direction for the Christian vocation of peacemaking

Symbols of Transcendence Paul J. Levesque, 1997 Volume 22 in the LTPM series offers a synchronic investigation of the thought of Christian philosopher Louis Dupre Working from a careful reading of Dupre s vast body of writings Paul Levesque demonstrates that in Dupre s work all religious expression insofar as it has a transcendent reference is intrinsically symbolic In the course of his study Levesque discusses the general necessity of employing symbols for religious expression investigates in depth Dupre s symbol theory and applies it to the religious symbols of ritual sacraments and religious art examines the modern inability to fully form religious symbols and explores Dupre s particular call to recover the mystical experience in personal life

Collinge, 2021-08-15 This work covers the whole history of Catholicism including the periods of Christian history prior to the present divisions into Catholic Orthodox and Protestant but within the earlier periods it focuses on the story line that leads to Catholicism in the Roman Rite and particularly to Roman Catholicism in the United States The *Historical Dictionary of Catholicism* Third Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 500 cross referenced entries on important persons and places as well as themes such as baptism contraception labor church architecture the sexual abuse crisis Catholic history doctrine and theology spirituality and worship moral and social teaching and church structure This book is an excellent resource for students researchers and anyone wanting to know more about Catholicism

Proportionalism Bernard Hoose, 1987-12-01 One of the most heated debates in recent times among Christian ethicists has been over what has come to be called proportionalism Opponents have argued that proportionalists are intent on relativizing theology norms and the concept of intrinsic evil Proponents on the other hand argue that they are merely developing a traditional notion of proportion of reason Bernard Hoose puts this debate in context by showing its roots in the writings of European moral theologians and its flowering in the writings of their American colleagues He uncovers a number of confusions that have bedeviled the argument while revealing how important the issues are for establishing in coherent Christian ethics in the twentieth century

Marriage William E. May, 2009-01-01 In this

revised and expanded edition of *Marriage The Rock on Which the Family is Built* internationally renowned theologian William E May makes the case for marriage's foundational role for family with marriage defined as the union of one man and one woman Drawing on Pope John Paul II's theology of the body he explains the person affirming love enabling life giving and sanctifying nature of marriage He shows how marriage is necessarily a complementary union of man and woman and how this rules out the idea of same sex marriage

Good Care, Painful Choices (Third Edition) Richard J. Devine, 2004 Reviews the issues involved in most of the principal medical ethical dilemmas that face our society from a multidisciplinary point of view Updated to reflect the many changes that have occurred in medical ethical issues

Introduction to Catholic

Theological Ethic Salzman, Todd A., Lawler, Michael G., 2019-05-22 Two renowned award winning authors in the field of virtue and sexual ethics introduce and then apply their ethical method to such topics as relativism ecology bioethics sexual ethics and liberation theology The result is a foundational text for undergraduate courses in Catholic theological ethics

Greater Good Garth L. Hallett, 1995-09-01 Garth L Hallett provides the first thorough systematic exposition and defense of proportionalism in Christian ethics Prominent in both philosophical and theological ethics proportionalism judges the morality of acts by their proportion of good and evil Hallett proposes judging acts using a norm he calls Value Maximization He defines this norm and offers a full response to such critics of all forms of proportionalism as Finnis and Grisez The author assesses the norm's moral and theological validity in and of itself in dialogue with the encyclical *Veritatis Splendor* and in comparison with various rival viewpoints stressing natural law divine commands respect for persons inviolable goods proportionate ends irreducible rights and agent centered ethics He appraises the norm's overall significance showing its rootedness in Christian tradition its inclusiveness and amplitude and its relevance to those seeking a foundation for Christian ethical thought and moral activity
