## **Nothing Is Lost:**

Nothing Is Lost in the Spirit Cynthia Graham, 2001-05-10 Two middle aged African American females analyze the way people in their lives handle various situations Anima and Baset both work corporate jobs and have families of their own As multiple issues creep into their lives the women decide to apply spirit to each situation that comes along to help them understand what they are undertaking In them analyzing others they learn how to deal with issues in their own lives They share their dreams culture and unexplained phenomena s to their close Italian friend However when there is a crisis with an associate of either of the women they call upon others for help This book has been designed so that you the reader can open to any section and relish the narratives as they unfold from the creases of the universe In these short stories each episode is done with drama and humor Although Baset and Anima the two main fictional characters are used in every chapter breath of wisdom and emotions are present so that you may experience the spirit of loneliness joy love and more Killing and Saving

John P. Reeder, 2010-11-01 This impressive work is fair balanced critical and insightful Choice Contrary to the views of Alasdair MacIntyre and others who assert that modern Western morality is in disarray torn by incommensurable moral views John Reeder believes that there is much agreement about taking and saving lives Many people might in fact agree on the various circumstances in which the death of a person constitutes a violation of the right to life or that people have a right to our help especially a right to life saving aid In Killing and Saving Reeder analyzes five sorts of situations in which we are morally permitted or even obligated to take human life e g when we repel an attacker who voluntarily forfeits the right to life when we are confronted with involuntary pursuit or material aggression when someone yields the right to life when all will die if nothing is done but some can be saved if others are killed and when there is a double effect in which we take life as a foreseen but unintended consequence of attempt to achieve a greater good Reeder argues that these and closely related categories account for many of our convictions ranging from abortion to infanticide to starvation to war He also examines the concept of absolute or exceptionless right to life Reeder draws on a number of moral views from theological ethics to Enlightenment notions of natural rights or respect for rational creatures He does not attempt to argue for a foundation for the right not to be killed and the right to be saved Rather he focuses on the content of the convictions themselves and argues that where disagreements remain such as the case of abortion they can be accounted for by the way the rights in question are explained and justified
