Nothing Is Without Poison:

Selected Writings Paracelsus, 1988 The enigmatic sixteenth century Swiss physician and natural philosopher Philippus Aureolus Theophrastus Bombastus von Hohenheim called Paracelsus is known for the almost superhuman energy with which he produced his innumerable writings for his remarkable achievements in the development of science and for his reputation as a visionary not to mention sorcerer and alchemist Little is known of his biography beyond his legendary achievements and the details of his life have been filled in over the centuries by his admirers This richly illustrated anthology presents in modernized language a selection of the moral thought of a man who was not only a self-willed genius charged with the dynamism of an impetuous and turbulent age but also in many ways a humble seeker after truth who deeply influenced C G Jung and his followers

Our Common Cosmos Zoë Lehmann Imfeld, Andreas Losch, 2018-12-27 This volume collects an international body of voices as a timely response to a rapidly advancing field of the natural sciences The contributors explore how the disciplines of theology earth and space sciences contribute to the debate on constantly expanding ethical challenges and the prospect of humanity's future The discussions offered in this volume see the community as central to a sustainable and ethical approach to earth and space sciences examining the role of theology in this communal approach but also recognizing theology itself as part of a community of humanity disciplines Examining the necessity for interaction between disciplines this collection draws on voices from biodiversity studies geology aesthetics literature astrophysics and others to illustrate precisely why a constructive and sustainable dialogue is needed within the current scientific climate

The Future of Predictive Safety Evaluation D.V. Parke, J. Marks, 2012-12-06 A N WORDEN D V PARKE AND J MARKS THE BACKGROUND There is nothing new about the fact that chemical substances derived either from natural

products or by synthetic means can give rise to toxicity in animals and human beings and that they must be subjected to controls The earliest writings speak of such toxicity and from the times of ancient Egypt and in the Old Testament controls have existed 1 In the Middle Ages Paracelsus 1493 1541 noted that All things are poisons for there is nothing without poisonous qualities It is only the dose which makes a thing a poison and hence he stressed the importance of dose relative to toxic reactions 2 Most of the early controls concentrated on substances that were to be deliberately administered to the human subject in the form of medicines Legislation for many centuries was mainly concerned with regulating the activities of apothecaries and physicians The Royal College of Physicians for example was originally established to control the activities of physicians within London Among the controls which it exerted was that over the use of medicinal substances Such controls were however poor based as they were on hearsay evidence of toxicity For many centuries no means existed for the accurate determination of toxicity
