Nothing To Do With The Case:

Harts V. Thieme ,1987 *Killing and Saving* John P. Reeder,2010-11-01 This impressive work is fair balanced critical and insightful Choice Contrary to the views of Alasdair MacIntyre and others who assert that modern Western morality is in disarray torn by incommensurable moral views John Reeder believes that there is much agreement about taking and saving lives Many people might in fact agree on the various circumstances in which the death of a person constitutes a violation of the right to life or that people have a right to our help especially a right to life saving aid In *Killing and Saving* Reeder analyzes five sorts of situations in which we are morally permitted or even obligated to take human life e g when we repel an attacker who voluntarily forfeits the right to life when we are confronted with involuntary pursuit or material aggression when someone yields the right to life when all will die if nothing is done but some can be saved if others are killed and when there is a double effect in which we take life as a foreseen but unintended consequence of attempt to achieve a greater good Reeder argues that these and closely related categories account for many of our convictions ranging from abortion to infanticide to starvation to war He also examines the concept of absolute or exceptionless right to life Reeder draws on a number of moral views from theological ethics to Enlightenment notions of natural rights or respect for rational creatures He does not attempt to argue for a foundation for the right not to be killed and the right to be saved Rather he focuses on the content of the convictions themselves and argues that where disagreements remain such as the case of abortion they can be accounted for by the way the rights in question are explained and justified The Complete Works John Bunyan,1877

Reports of Cases Determined in the District Courts of Appeal of the State of California, 1907 Absence and Nothing Stephen Mumford, 2021-11-23 Nothing is not Yet it seems that we invoke absences and nothings often in our philosophical explanations Negative metaphysics is on the rise It has been claimed that absences can be causes there are negative properties absences can be perceived there are negative facts and that we can refer to and speak about nothing Parmenides long ago ruled against such things Here we consider how much of Parmenides view can survive A soft Parmenidean methodology is adopted in which we aim to reject all supposed negative entities but are prepared to accept them reluctantly if they are indispensable and irreducible in our best theories We then see whether there are any negative entities this survive this test Some can be dismissed on metaphysical grounds but other problems are explained only once we reject another strand in Parmenides and show how we can think and talk about nothing Accounts of perception of absence empty reference and denial are gathered With these we can show how no truthmakers are required for negative truths since we can have negative beliefs concerning what is not without what is not being part of what is This supports a soft ontological Parmenideanism which accepts much though not all of Parmenides original position

Justification as Ignorance Sven Rosenkranz, 2021-03-09 Justification as Ignorance offers an original account of epistemic justification as both non factive and luminous vindicating core internalist intuitions without construing justification as an internal condition knowable by reflection alone Sven Rosenkranz conceives of justification in its doxastic and propositional varieties as a kind of epistemic possibility of knowing and of being in a position to know His account contrasts with recent alternative views that characterize justification in terms of the metaphysical possibility of knowing Instead he develops a suitable non normal multi modal epistemic logic for knowledge and being in a position to know that respects the

finding that these notions create hyperintensional contexts He also defends his conception of justification against well known anti luminosity arguments shows that the account allows for fruitful applications and principled solutions to the lottery and preface paradoxes and provides a metaphysics of justification and its varying degrees of strength that is compatible with core assumptions of the knowledge first approach and disjunctivist conceptions of mental states
