Notion Of Nothing

Nicholas Waghorn

Notion Of Nothing:

Nothingness and the Meaning of Life Nicholas Waghorn, 2014-08-28 What is the meaning of life Does anything really matter In the past few decades these questions perennially associated with philosophy in the popular consciousness have rightly retaken their place as central topics in the academy In this major contribution Nicholas Waghorn provides a sustained and rigorous elucidation of what it would take for lives to have significance Bracketing issues about ways our lives could have more or less meaning the focus is rather on the idea of ultimate meaning the issue of whether a life can attain meaning that cannot be called into question Waghorn sheds light on this most fundamental of existential problems through a detailed yet comprehensive examination of the notion of nothing embracing classic and cutting edge literature from both the analytic and Continental traditions Central figures such as Heidegger Carnap Wittgenstein Nozick and Nagel are drawn upon to anchor the discussion in some of the most influential discussion of recent philosophical history In the process of relating our ideas concerning nothing to the problem of life s meaning Waghorn s book touches upon a number of fundamental themes including reflexivity and its relation to our conceptual limits whether religion has any role to play in the question of life s meaning and the nature and constraints of philosophical methodology A number of major philosophical traditions are addressed including phenomenology poststructuralism and classical and paraconsistent logics In addition to providing the most thorough current discussion of ultimate meaning it will serve to introduce readers to philosophical debates concerning the notion of nothing and the appendix engaging religion will be of value to both philosophers and theologians The True

The True Intellectual System of the Universe

Cudworth, Birch, 1743

Everything and Nothing Graham Priest, Markus Gabriel, 2022-09-15 Is it possible for reality as a whole to be part of itself Can the world appear within itself without thereby undermining the consistency of our thought and knowledge claims concerning more local matters of fact This is a question on which Markus Gabriel and Graham Priest disagree Gabriel argues that the world cannot exist precisely because it is understood to be an absolutely totality Priest responds by developing a special form of mereology according to which reality is a single all encompassing whole everything which counts itself among its denizens Their disagreement results in a debate about everything and nothing Gabriel argues that we experience nothingness once we overcome our urge to contain reality in an all encompassing thought whereas Priest develops an account of nothing according to which it is the ground of absolutely everything A debate about everything and nothing but also a reflection on the very possibility of metaphysics

Kant and the Problem of Nothingness Ernesto

Mayz Vallenilla, 2024-01-25 The Latin American philosopher Ernesto Mayz Vallenilla published the first study of Kant s concept of nothingness in 1965 This translation of Mayz Vallenilla s ground breaking work makes it available in English for the first time Mayz Vallenilla s interpretation is deeply informed by Heidegger s reading of Kant against the background of the early 20th century neo Kantian tradition He offers a detailed interpretation and critique of nothing as it appears in the

Amphiboly chapter of the Critique of Pure Reason and presents an analysis of Kant's Table of Nothing which understands temporality as the horizon of all possible cognition AE1 including cognition of real nothings Accompanied by translator's notes and a glossary Addison Ellis translation includes extensive commentary and an introduction providing historical context and references to the original sources in German He preserves key terminology and phrasing from the original text and allows an often neglected connection to be made between the Kantian tradition in Latin America and the tradition in the Anglophone world

The True Intellectual System of the Universe ... With a Discourse concerning the True Notion of the Lord's Supper; and two sermons, on I John II. 3, 4. and I Cor. XV. 57 ... The second edition; in which are now first added references to the several quotations in the Intellectual System; and an account of the life and writings of the author: by Thomas Birch Ralph Cudworth,1820

Metaphysics and Mystery Thomas Dean,2019-07-15

Metaphysics and Mystery The Why Question East and West is a critical analysis comparison and evaluation of philosophical answers Western and Asian to the question Why is there something rather than nothing The question first posed by the seventeenth century philosopher Leibniz was reintroduced in the twentieth century by Heidegger Volume 1 begins with an introduction that lays out the issues raised by the why question It then analyzes contemporary Western philosophers who provide either cosmological metaphysical or existential ontological answers to the question It also considers transitional answers that bridge the two Volume 2 examines Asian philosophers classical and contemporary who though rejecting the assumptions behind the question put forward nondualist answers that have a direct bearing on it It concludes with an argument for a revised understanding of the why question that draws on the strengths and weaknesses of these Western and Asian philosophies and explores implications for ethics and religious thought

Scientific Discourse in John Donne's Eschatological Poetry Ludmila

Makuchowska,2014-10-16

Scientific Discourse in John Donne's Eschatological Poetry offers a compelling critique of John Donne's religious and erotic poetry focusing on the intersection of two seemingly antithetical discourses the language of the scientific revolution and of Christian eschatology Throughout its three chapters which correspond to three scientific disciplines cartography physics and alchemy the volume examines the ways in which the references to early modern and medieval science in Donne's poetry contribute to conceptualizing the Christian mystery of death

The World as Active Power ,2009-09-30 What is the ultimate explanatory factor for the existence of the world for all its

changing phenomena and the enduring order found in it In the history of Western thought we can find a longstanding philosophical tendency to answer this question in terms of power the universe is understood as an ordered whole produced by a rational power that is by the power of reason That power is thought to be active in the sense of being capable of existing and acting in itself as an infinite eternal and unchangeable cause of the world The essays in this collection discuss the idea of active power in the world explanations of Plato the Stoics Neoplatonism early and late medieval scholasticism Descartes Hobbes Spinoza Leibniz Kant Hegel and Schopenhauer *Modern Classical Philosophers* Benjamin Rand,1924

Pre-scholastic and scholastic philosophy Albert Stöckl,1911 The Philosophical Review Jacob Gould Schurman,James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham,1905 An international journal of general philosophy *The Works of George Berkeley D.D.* Alexander Campbell Fraser,2020-07-24 Reproduction of the original The Works of George Berkeley D D by Alexander Campbell Fraser *When Truth Gives Out* Mark Richard,2010-05-20 Is the point of belief and assertion invariably to think or say something true Is the truth of a belief or assertion absolute or is it only relative to human interests Most philosophers think it incoherent to profess to believe something but not think it true or to say that some of the things we believe are only relatively true Common sense disagrees It sees many opinions such as those about matters of taste as neither true nor false it takes it as obvious that some of the truth is relative Mark Richard s accessible book argues that when it comes to truth common sense is right philosophical orthodoxy wrong The first half of the book examines connections between the performative aspects of talk what we do when we speak our emotions and evaluations and the conditions under which talk and thought qualifies as true or false It argues that the performative and expressive sometimes trump the semantic making truth and falsity the wrong dimension of evaluation for belief or assertion Among the topics taken up are racial slurs and other epithets relations between logic and truth the status of moral and ethical talk vagueness and the liar paradox The book s second half defends the idea that much of everyday thought and talk is only relatively true or false Truth is inevitably relative given that we cannot work out in advance how our concepts will apply to the world Richard explains what it is for truth to be relative rebuts standard objections to relativism and argues that relativism is consistent with the idea that one view can be objectively better than another The book concludes with an account of matters of taste and of how it is possible for divergent views of such matters to be equally valid even if not true or false *When Truth Gives Out* will be of interest not only to philosophers who work on language ethics knowledge or logic but to any thoughtful person who has wondered what it is or isn t for something to be true
