**From Warm Center to Ragged Edge** Jon K. Lauck, 2017-06-01 During the half century after the Civil War intellectuals and politicians assumed the Midwest to be the font and heart of American culture Despite the persistence of strong currents of midwestern regionalism during the 1920s and 1930s the region went into eclipse during the post World War II era In the apt language of Minnesota s F Scott Fitzgerald the Midwest slid from being the warm center of the republic to its ragged edge This book explains the factors that triggered the demise of the Midwest s regionalist energies from anti midwestern machinations in the literary world and the inability of midwestern writers to break through the cultural politics of the era to the growing dominance of a coastal urban culture These developments paved the way for the proliferation of images of the Midwest as flyover country the Rust Belt a staid and decaying region Yet Lauck urges readers to recognize persisting and evolving forms of midwestern identity and to resist the forces that squelch the nation s interior voices

experience and one that is grounded in research from psychology and neuroscience This book is a must read for all museum practitioners and psychologists interested in the relationship between cultural heritage psychology and neuroscience It will also be of great interest to art therapists neuroscientists university students museum stakeholders and museum lovers A History of Sociological Research and Teaching at Catholic Notre Dame University, Indiana Anthony J. Blasi, Bernard F. Donahoe, 2002 In a series of documented chapters this work places the emergence of sociology at Notre Dame in the context of that institution's particular history and of the changing doctrines of Roman Catholicism more generally *Complexities and Dangers of Remembering and Forgetting in Rwanda* Olivier Nyirubugara, 2013 Can a society a culture a country be trapped by its own memories The question is not easy to answer but it would not be a bad idea to cautiously say It depends This book is about one society Rwanda and its culture traditions identities and memories More specifically it discusses some of the ways in which ethnic identities and related memories constitute a deadly trap that needs to be torn apart if mass violence is to be eradicated in that country It looks into everyday cultural practices such as child naming and oral traditions myths and tales proverbs war poetry etc and into political practices that govern the ways in which citizens conceptualise the past Rwanda was engulfed in a bloody war from 1990 until 1994 the last episode of which was a genocide that claimed about a million lives amongst the Tutsi minority This book the first in the Memory Traps series provides a new understanding of how a seemingly quiet society can suddenly turn into a scene of the most horrible inter ethnic crimes It offers an analysis of the complexities and dangers resulting from the ways in which memories are managed both at a personal level and at a collective level The main point is that Rwandans have become hostages of their memories of the long gone and the recent past The book shows how these memories follow ethnic lines and lead to a state of cultural hypocrisy on the one hand and to permanent conflict either open and brutal or latent and beneath the surface on the other hand Written from a memory studies perspective and informed by critical theory philosophy literature oral history and psychology amongst others this book deals with some controversial subjects and deconstructs some of the received ideas about the recent and the long gone past of Rwanda About the author Olivier Nyirubugara is a lecturer of New Media and Online Journalism at the Erasmus School of History Culture and Communication Erasmus University Rotterdam In 2011 he completed a PhD in Media Studies at the University of Amsterdam with a dissertation entitled *Surfing the Past Digital Learners in the History Class* in which he empirically explored ways in which pupils use the Web to find historical information Nyirubugara has also been practicing journalism since 2002 and has been training and coaching journalists in mobile reporting in Africa since 2007 On Autobiographical Memory Anita Kasabova, 2009-05-27 The aim of this book is to provide an account of autobiographical memory the memory of episodes in the subject's autobiography and to answer the following questions what happens when we remember something Why do we remember some things rather than others The main assumptions in this book are that autobiographical memory is an active structure of a representational nature and that autobiographical memory is a construct

of the imagination enabled by a semantic principle the ground consequence relation Anita Kasabova reconstructs the epistemological accounts of memory by the Prague philosopher and mathematician Bernard Bolzano and the Prague physiologist Ewald Hering as well as the phenomenological accounts by Edmund Husserl and Roman Ingarden and discusses various accounts put forward within analytic philosophy She examines the trace theory and its relation to the phenomenology of autobiographical memory and the different temporal perspectives that characterize this form of memory Kasabova formulates a philosophical explication of how autobiographical memory works dealing with issues such as what are the defining features of autobiographical memory how is it structured and how does it function what is a recollection and what are the necessary and for the most part sufficient conditions for a recollection to occur Kasabova argues that such conditions are a sense of self and a sense of connectedness of the self that is semantic rather than causal the subject's sense of ownership of past experiences and the capacity of imagination for mental time travel and thinking about past episodes you have to be able to produce representations not bound to the current situation It is argued that access to the subject's personal past cannot occur otherwise than by construction in imagination In order to reproduce a past experience in the present imagination is necessary for representing a past episode as if it were present Other necessary conditions for autobiographical memory are time awareness a continuous temporal reference frame a successive temporal order and the capacity to refer back to previous positions in time Finally semantic relations of part whole and ground consequence are crucial for explaining autobiographical memory It is argued that the part whole relation is the principle of the memory trace and that the grounding relation coordinates the subject's perspective on past episodes in recollective statements Kasabova argues that autobiographical memory is basically semantic as it is grounded by and constructed through a sense making relation expressed by the explanatory conjunct because we recall certain experiences or actions rather than other because we are sensitive to the reasons for having experienced it The new book by Anita Kasabova fills a gap between traditional philosophical armchair speculations about memory and contemporary cognitive theories which have grown out of extensive experimental research The book's main idea that autobiographical memory is not a mere recollection but rather an active reconstruction of our past memories is not an entirely new one Anita Kasabova however provides a new take on this idea by revealing that the theories of Bolzano Hering and Husserl not only bear historical significance but properly reconstructed they might be viewed as an important contribution to the contemporary interdisciplinary studies of memory An appreciable achievement of the book is the chosen conceptual framework it makes the idiosyncratic language of Bolzano and Husserl accessible to contemporary cognitive scientists as well as making the recent cognitive theories understandable for the traditional philosophical scholars Even if this were the only achievement of Anita Kasabova and it is not it would represent her monograph as a book of a great merit for a large community of memory scholars Assoc Prof Lilia Gurova Department of Cognitive Science and Psychology New Bulgarian University

Herrmann, Cathy McEvoy, Chris Hertzog, Paula Hertel, Marcia K. Johnson, 2014-02-04 Basic researchers unlock the secrets of nature applied researchers unlock the means by which those secrets of nature can change people's lives Neither basic nor applied research has an independent impact These volumes examine the convergence of basic and applied research in the field of memory Volume 1 Theory and Context focuses on the methods for understanding and applying basic memory theory while Volume 2 Practical Applications expands the understanding of practical memory research by providing in depth research examples and findings If the science of memory is to make a significant contribution to society coordinating our basic and applied efforts and determining how they complement each other become of paramount importance These volumes will help in this regard both as textbooks demonstrating how to investigate memory and apply basic memory theory and as reference sources leading to a better understanding of certain problems in basic and applied memory research Readers of these volumes will gain a thorough grasp of the way major themes relate to basic and applied research collaboration how programmatic basic and applied research can be conducted on particular memory problems and the manner in which basic and applied work in major problem areas has been incorporated into the field of memory Both volumes present important information that will be indispensable to researchers and students alike **Jim Kobak's Kirkus Reviews**, 1986

**University Library of Autobiography, Including All the Great Autobiographies and the Autobiographical Data Left by the World's Famous Men and Women**, 1918 *Resurrection Remembered* David Graeg, 2024-03-26 This book is the first major study to investigate Jesus resurrection using a memory approach It develops the logic for and the methodology of a memory approach including that there were about two decades between the events surrounding Jesus resurrection and the recording of those events in First Corinthians The memory of those events was frequently rehearsed perhaps weekly The transmission of the oral tradition occurred in various ways including the overlooked fourth model formal uncontrolled Consideration is given to an examination of the philosophy and psychology of memory including past and new research on 1 the constructive nature of memory 2 social memory 3 transience 4 memory distortion 5 false memories 6 the social contagion of memory and 7 flashbulb memory In addition this is the first New Testament study to consider the insights for a memory approach from the philosophical considerations of 1 forgetting and 2 the theories of remembering and from the psychological studies on 1 memory conformity 2 memory and age and 3 the effects of health on memory It is argued that Paul remembers Jesus as having been resurrected with a transformed physical body Furthermore the centrality of Jesus resurrection in Paul's theology suggests it was a deeply embedded memory of primary importance to the social identity of the early Christian communities New Testament scholars and students will want to take note of how this work advances the discussion in historical Jesus studies The broader Christian audience will also find the apologetic implications of interest

Autobiographical Memory and Moral Agency Daniel Vanello, 2025-10-27 This volume brings together for the first time perspectives from philosophy and psychology to investigate the role of autobiographical memory in moral agency

Autobiographical memory is the ability to recollect events in one's past as part of one's personal history. Moral agency is the ability to make moral judgements, act morally, and have a conception of the good life. Although a number of philosophers and psychologists have drawn attention to the role of autobiographical memory in moral agency, there is no sustained project that brings together these different lines of inquiry into a unified research area. The aim of this volume is to answer this need by bringing together leading voices in research in autobiographical memory and moral agency from both philosophy and psychology to provide a unified framework for a new interdisciplinary research area. Key areas of research explored in this volume include temporal perspectives, moral identity, autobiographical narrative, joint reminiscing, the internalisation of moral value, attachments, and amnesia. Autobiographical Memory and Moral Agency will appeal to researchers and advanced students in philosophy of mind, moral philosophy, philosophy of education, developmental psychology, and educational psychology who are interested in the role of memory in moral psychology and moral development.

**Memoir Ethics** Mike W. Martin, 2016-02-10. *Memoir Ethics: Good Lives and the Virtues* is a philosophical study of moral themes in memoirs, exploring how memoirists present and defend perspectives on good lives. It pays particular attention to the interplay of the virtues, including their interplay with additional, non-moral types of values in good lives. More generally, it explores the relevance of memoir to moral philosophy and, in turn, how moral philosophy enters into elucidating and critiquing memoirs. Memoirs are understood as non-fiction narratives written by oneself and significantly about oneself, including full life autobiographies. Mike W. Martin explores perspectives on good lives as they are expressed in memoirs written by both philosophers and non-philosophers. Most of the chapters focus on one of the generic aspects of good lives: moral goodness, authenticity, meaningfulness, happiness, health, and self-fulfillment. The book clarifies how memoirists often employ life-based arguments in defending value perspectives and includes a discussion of whether philosophers' memoirs are distinctive compared to memoirs by non-philosophers and also compared to other forums for doing philosophy. Martin highlights some parallels between features of good lives and features of memoirs; for example, both can be said to be meaningful, authentic, and having virtues such as wisdom and courage. Demonstrating how memoirs are rich resources in exploring the good lives and exploring ways in which philosophical ethics provide tools for interpreting memoirs, *Memoir Ethics* will be of interest to a broad audience of students, scholars, and general readers, including anyone interested in ethics or the connections between literature and philosophy.

**A Memoir of Mrs. Augustus Craven, (Pauline de la Ferronnays) with Extracts from Her Diaries and Correspondence by Maria Catherine Bishop** Maria Catherine Bishop, 1895. *Handbook of Research on the Relationship Between Autobiographical Memory and Photography* Ingham, Mark, Bruce, Nigel, Milic, Nela, Kantas, Vasileios, Andersdotter, Sara, Lowe, Paul, 2023-02-17. Autobiographical memory and photography have been inextricably linked since the first photographs appeared during the 19th century. These links have often been described from each other's discipline in ways that often have led to misunderstandings about the complex relationships between them. The Handbook of

Research on the Relationship Between Autobiographical Memory and Photography covers many aspects of the multiple relationships between autobiographical memory and photography such as the idea that memory and photography can be seen as forms of mental time and the effect photography has on autobiographical memory. Covering key topics such as identity, trauma, and remembrance, this major reference work is ideal for industry professionals, sociologists, psychologists, artists, researchers, scholars, academicians, practitioners, educators, and students.

**Autobiographies**, 1829 **The Sociocultural Turn in Psychology**

Suzanne R. Kirschner, Jack Martin, 2010

The sociocultural turn in psychology treats psychological subjects such as the mind and the self as processes that are constituted or made up within specific social and cultural practices. In other words, though one's distinct psychology is anchored by an embodied biological existence, sociocultural interactions are integral to the evolution of the person. Only in the past two decades has the sociocultural turn truly established itself within disciplinary and professional psychology. Providing advanced students and practitioners with a definitive understanding of these theories, Suzanne R. Kirschner and Jack Martin, former presidents of the American Psychological Association's Division of the Society for Theoretical and Philosophical Psychology, assemble a collection of essays that describes the discursive, hermeneutic, dialogical, and activity approaches of sociocultural psychology. Each contribution recognizes psychology as a human science and supports the individual's potential for agency and freedom. At the same time, they differ in their understanding of a person's psychological functioning and the best way to study it. Ultimately, the sociocultural turn offers an alternative to overly biological or interiorized theories of the self, emphasizing instead the formation and transformation of our minds in relation to others and the world.

*Mimesis in the Johannine Literature* C. Bennema, 2017-09-21

Mimesis is a fundamental and pervasive human concept but has attracted little attention from Johannine scholarship. This is unsurprising since Johannine ethics, of which mimesis is a part, has only recently become a fruitful area of research. Bennema contends that scholars have not yet identified the centre of Johannine ethics, admittedly due to the fact that mimesis is not immediately evident in the Johannine text because the usual terminology for mimesis is missing. This volume is the first organized study on the concept of mimesis in the Johannine literature. The aim of the study is to establish that mimesis is a genuine Johannine concept to explain its particulars and to show that mimesis is integral to Johannine ethics. Bennema argues that Johannine mimesis is a cognitive creative process that shapes the believer's identity and behaviour within the context of the divine family. Besides being instrumental in people's moral transformation, mimesis is also a vital mechanism for mediating the divine reality to people.
