Nouvelles Orientales Pb 1978:

The Variscan Orogeny K. Schulmann, J.R. Martínez Catalán, J.M. Lardeaux, V. Janousek, G. Oggiano, 2014-07-28 This volume summarizes the state of the art of Variscan geology from Iberia to the Bohemian Massif The European Variscan belt consists of two orogens the older northern and the younger southern The northern Variscan realm was dominated by Late Devonian Carboniferous rifting subduction and collisional events as defined by sedimentary records crustal growth recycling of continental crust and large scale deformations In contrast the southern European crust was reworked by major Late Carboniferous collision followed by Permian wrenching The Late Carboniferous Permian orogeny overprinted the previously accreted system in the north but with much lower intensity resulting in magmatic recycling and extensional tectonics These two main orogenic cycles do not reflect episodic evolution of a single orogenic system but a complete change in orientation of stress field thermal regime degree of reworking and recycling of European crust reflecting a major switch in plate configurations at the Early Late Carboniferous boundary Blueschists and Eclogites Bernard W. Evans, Edwin H. Brown, 1986 **Afrique de l'Ouest** J.M. Bertrand, J. Bertrand-Sarfati, B. Bessoles, 2013-10-22 Afrique de l'Ouest **Anais Da Academia Brasileira de Ciências**, 1979 *Beyond Boundaries* Susan E. Alcock, Mariana Egri, James F. D. Frakes, 2016-05-01 The Roman Empire had a rich and multifaceted visual culture which was often variegated due to the sprawling geography of its provinces In this remarkable work of scholarship a group of international scholars has come together to find alternative ways to discuss the nature and development of the art and archaeology of the Roman provinces The result is a collection of nineteen compelling essays accompanied by carefully curated visual documentation seven detailed maps and an extensive bibliography organized around the four major themes of provincial contexts tradition and innovation networks and movements and local accents in an imperial context Easy assumptions about provincial dependence on metropolitan models give way to more complicated stories Similarities and divergences in local and regional responses to Rome appear but not always in predictable places and in far from predictable patterns The authors dismiss entrenched barriers between art and archaeology center and provinces even good art and bad art extending their observations well beyond the empire's boundaries and examining phenomena sites and monuments not often found in books about Roman art history or archaeology The book thus functions to encourage continued critical engagement with how scholars study the material past of the Roman Empire and indeed of imperial systems in general **The Zoological Exploration of Southern Africa 1650-1790** L. C. Rookmaaker, 1989-06-01 The 18th century witnessed a new interest in African animals Research was undertaken at the Cape of Good Hope by explorers whose books manuscripts and drawings concerning mammals and birds are listed and discussed within this text This text gives details on four collections of 300 mammal and bird drawings connected with Levaillant's research Many examples are illustrated The zoological contents of the material left by these seven explorers are analyzed for all mammals and birds emphasizing the history taxonomy nomenclature and zoogeography
