Tornado Alley Howard B. Bluestein,2006 Tornadoes are the most violent magnificent and utterly unpredictable storms on earth reaching estimated wind speeds of 300 mph and leaving swaths of destruction in their wake In Tornado Alley Howard Bluestein draws on two decades of experience chasing and photographing tornadoes across the Plains to present a fascinating historical account of the study of tornadoes and the great thunderstorms that spawn them A century ago tornado warnings were so unreliable that they usually went unreported Today despite cutting edge Doppler radar technology and computer simulation these storms remain remarkably difficult to study Leading scientists still conduct much of their research from the inside of a speeding truck and often contend with jammed cameras flash floods and windshields smashed by hailstones and flying debris Using over a hundred diagrams models and his own spectacular color photographs Bluestein documents the exhilaration of hair raising encounters with as many as nine tornadoes in one day as well as the crushing disappointment of failed expeditions and ruined equipment Most of all he recreates the sense of beauty mystery and power felt by the scientists who risk their lives to study violent storms For scientists amateur weather enthusiasts or anyone who s ever been intrigued or terrified by a darkening sky Tornado Alley provides not only a history of tornado research but a vivid look into the origin and effects of nature s most dramatic phenomena *Tornadoes* Anna Prokos,2008-07-01 Introduces tornadoes discussing what causes them their different types and ten famous tornadoes of the past **Tornado Hunter** Stefan Bechtel,Tim Samaras,2009 METEOROLOGY With climate change and global warming creating more frequent and more violent storms there is a huge readership for weather disasters such as hurricanes and tornadoes This book will appeal to the audience for the bestseller Perfect Storm This page turning story of tornado chaser and National Geographic grantee Tim Samaras opens with a chilling play by play description of the F5 tornado that wiped off the map the town of Manchester North Dakota on June 24 2003 Stefan Bechtel author of the acclaimed Roar of the Heavens teams with Samaras to reveal the heart and people of the town the terror of the descending funnel Samaras fearless chase to the tornado s core and the ingenious equipment he masterminded to record the inner workings of a tornado to aid in future detection avoidance and destruction Skylanders SWAP Force Character Upgrade Edition BradyGames,2014-04-28 A new Skylanders adventure featuring the all new SWAP Force Skylanders You can mix and match the top and bottom halves of these amazing Skylanders to create 256 different combinations each with its own powers and abilities **Skylanders SWAP Force Signature Series Strategy Guide** BradyGames,2013-10-13 Prepare to embark on a new adventure in Skylanders SWAP Force Now the Skylanders have unique abilities to mix and match their top and bottom parts to create new characters The strategy guide provides a complete walkthrough of the game detailed character analyses location of every collectible and more **The**
